This project was a collaborative endeavour between the OISE Modern Language Centre and the University of Toronto Schools (UTS). The project was conceived as a result of a problematic situation which had emerged at UTS in recent years involving students who had completed their Ontario Academic Course in French by grade 10 as part of an accelerated program of studies at UTS. When these students later entered senior grades in the same school, they wished to maintain and further improve their French language skills, but UTS didn't offer a French course or a program of study which could meet the needs of this group. The objectives for this collaborative project were thus to design a course at the senior secondary level which meets the needs of FSL learners enrolled at the UTS, to implement the course in the UTS

context, and to document its effectiveness with a view to exploring implications for FSL instruction.

Innovative inservice in elementary science : final report to the Ontario Ministry of Education on a two year program of inservice education in science for elementary school teachers, 1988-89

by G. Hills. Kingston, Ont. : Frontenac County Board of Education ; Frontenac-Lennox and Addington County Roman Catholic Separate School Board ; Toronto : Ministry of Education, 1990. 93 p. Bibliogr. *ONTERIS: ON06042.*
MICROLOG 93-02021 2 fiche

Reports on a 2-year program of inservice education in science for elementary school teachers. The project focused on enabling teachers to arrive at a fuller understanding of the nature of science and of scientific inquiry itself. Training activities revolved around 'the science club', which met at least once a month, including 2 all-day workshops. Instructors provided hands-on experiences, which led to sharing and discussion periods. A selection from the end-of-year interview transcripts helps to evaluate the project from a teacher's perspective.

Innover pour l'avenir : un plan d'action pour la prospérité du Canada

Ottawa : Comité directeur de la prospérité, 1992. 83 p. *L'éd. anglaise (Inventing our future...) : 93-00845/1.* ISBN 0-662-97889-7
MICROLOG 93-00846 1 fiche

Il y a douze mois, le gouvernement du Canada lançait son Initiative de la prospérité et menait à cet effet des consultations intensives auprès des Canadiens sur la façon d'assurer la prospérité du pays. Les recommandations proposées dans ce plan d'action reflètent les milliers d'opinions exprimées au cours de consultations sur l'Initiative de la prospérité. Le document a pour sujets les points suivants: la parole aux citoyens; créer des perspectives d'avenir pour une société innovatrice; diffuser une culture du savoir au Canada; créer une société intégrée; stimuler l'action; les consultations; et, l'initiative de la prospérité.

Input admittance of multiply fed and/or loaded insulated linear antenna in air

by S.A. Saoudy and B.P. Sinha. St. John's : Memorial University of Newfoundland, Centre for Cold Ocean Resources Engineering, 1991. 5 p. : ill. Bibliogr. (C-CORE publication ; no. 91-19) *Presented at NECEC '91.*
MICROLOG 93-06007 1 fiche (Available on fiche only)

This paper presents analytic expressions derived for the input admittance of a multiply fed and/or loaded dialectic coated linear antenna in air using the axial field discontinuity (AFD) method based on the Wiener-Hopf type analysis. The method treats the conducting antenna surface as a series combination of longitudinal electric field surface functions that may exist owing to feeding and/or loading. The analysis can handle any shape of the feed gap electric field ranging from the delta function generator across infinitesimally thin gaps to the Fourier-Bessel series field across feed gaps. Typical results are presented for different feed and loading arrangements.

Insectes et maladies des arbres au Canada, 1989

compilation de B.H. Moody ; avec la collaboration de J. Hudak...et al. Ottawa : Forêts Canada, Relevé des insectes et des maladies des arbres, 1992. vi, 136 p. : cartes géogr. Bibliogr. *L'éd. anglaise (Forest insect and disease conditions...) : 93-01399/2. CSI 22189.004.* ISSN 0226-9767 ISBN 0-662-97759-9
MICROLOG 93-01397 2 fiche

Le Relevé des insectes et des maladies des arbres (RIMA) constitue un programme national dans le cadre duquel sont exercées diverses activités par 6 centres régionaux et par un groupe de travail qui, sous la direction des centres et des instituts du Service canadien des forêts, est chargé de mettre au point des technologies destinées au RIMA. Ce document fournit des informations détaillées sur les principaux insectes et maladies affectant les arbres pour chacune des régions canadiennes ainsi qu'un résumé de la surveillance de la santé des forêts, et des descriptions des relevés spéciaux (ravageurs des cônes et des graines, syndrome de Stillwell, nématode du pin, et ravageurs des jeunes peuplements et des plantations).

Insectes et maladies des forêts dans la région du Bas-Saint-Laurent/Gaspésie de 1936 à 1987

par D. Lachance...et al. Sainte-Foy, Québec : Forêts Canada, Région du Québec, Centre de foresterie des Laurentides, 1990. v, 223 p. : cartes géogr. (Rapport d'information ; LAU-X-93) *L'éd. anglaise (Forest insects and diseases ..) : 93-04145/3.* ISSN 0835-1635 ISBN 0-662-95995-7
MICROLOG 93-04146 3 fiche

Ce rapport sur les insectes et les maladies des arbres couvre la région administrative du Bas-Sain-Laurent/Gaspésie (Région 01). Il résulte d'un examen exhaustif de la situation qui prévalait en 1936 et 1987 et présente de façon ordonnée et synthétisée l'ensemble des observations récoltées dans la région. Il permet de mieux évaluer l'importance et le danger potentiel que représentent les ravageurs forestiers, et de chercher une information complète et précise sur les problèmes qui peuvent se présenter dans les forêts de cette région. Les problèmes entomologiques et pathologiques sont successivement regroupés par ordre alphabétique. On retrouve de plus 13 cartes de la région qui illustrent les problèmes les plus importants rencontrés, une liste alphabétique des codes des essences et un index des noms communs et scientifiques (latin) des différentes espèces.

L'Insémination hétérologue et ses implications

par R. Achilles. Ottawa : Commission royale sur les nouvelles techniques de reproduction, 1992. x, 76 p. Bibliogr. *L'éd. anglaise (Donor insemination : an overview) : 93-07460/1.* ISBN 0-662-97180-9
MICROLOG 93-07461 2 fiche

Le fait qu'il n'est désormais plus nécessaire d'avoir des rapports sexuels pour procréer a modifié les aspects sociaux de la procréation. Diverses interventions, thérapies et traitements peuvent modifier la probabilité de procréation, mais c'est dans les relations humaines que le terme révolution de la procréation prend tout son sens. Ce document porte précisément sur l'insémination hétérologue et ses implications. Il en donne d'abord la description et se penche ensuite sur les points suivants: les raisons d'utiliser l'insémination hétérologue; l'infertilité chez l'homme; la sélection des donneurs, les méthodes d'insémination; l'auto-insémination; les coûts; le taux de réussite; la tenue des dossiers; l'incidence; le survol historique; les questions psychosociales; l'attitude de la population; les donneurs; les bénéficiaires; le secret; les enfants; les médecins; les risques pour la santé; et, les banques de sperme.

The Inshore-offshore lobster issue in southwestern Nova Scotia

by D.S. Pezzack...et al. Halifax : Dept. of Fisheries and Oceans, Scotia-Fundy Region, Biological Sciences Branch, 1992. iv, 19 p. : maps. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2165) ISSN 0706-6473
MICROLOG 93-00541 1 fiche

For the past 20 years, the inshore-offshore lobster issue has existed. The concern expressed by the inshore fishermen is that the offshore fishery, which began in 1971, has had a negative impact on inshore production. This report addresses the question of whether catches by offshore fishermen significantly reduce catches by inshore fishermen. Information was gathered through a literature search and a workshop held in December 1990, to which physical and biological oceanographers working in the area were invited. Six component hypotheses are presented and discussed and evidence is presented for and against each. A choice is then made to accept, reject, or suspend judgement in cases with insufficient evidence. Further research topics are recommended

Institutional design for the economy and the environment : the identification and representation of stakeholders

by M. Sproule-Jones. Hull, Que. : Canadian Environmental Assessment Research Council, 1988. 32 p. Bibliogr. (Manuscript report ; MR13-92) *Paper presented at a workshop entitled Towards Integrated Environment and Economic Assessments.*
MICROLOG 93-05372 1 fiche

This paper clarifies the concept of a stakeholder and the representation of persons with interests in resource decision-making, then begins building a theory about the representation of socio-economic interests in environmental decision-making, with theoretical propositions drawn from property rights and public choice. Finally, the paper draws upon empirical evidence consisting of water quality management for the Lower Fraser River from 1974-75; the planning efforts organized by the Governments of British Columbia and Canada to provide appropriate environmental regulations for oil and gas exploration, drilling, and transportation in the Hecate Straits-Queen Charlotte Sound area in 1981 and 1982; and the development of a remedial action plan for Hamilton Harbour from 1968 to the present.

Instream flow requirements for fishes downstream of the Oldman River Dam

prepared for Alberta Public Works, Supply and Services, Oldman River Dam Project ; by D.A. Fernet, R.F. Courtney and C.P. Bjornson. Calgary, Alta. : Environmental Management Associates, 1990. vi, 301 p. : ill., maps. Bibliogr.
MICROLOG 93-04059 4 fiche

Fisheries investigations downstream of the Oldman River Dam began in 1985, examining the distribution and abundance of fishes between the damsite and the confluence of the Little Bow River in late spring, summer, and fall. The river was divided into six homogeneous segments, based on morphology and flow characteristics. Within each segment, a representative study reach was established where measurements of physical habitat features (depth, velocity, substrate, and cover) were conducted over the range of flows which occurred. These data were used with the Physical Habitat Simulation System group of models of the instream flow incremental methodology. This report determined the habitat availability and streamflow in the six study reaches for the range of flows measured during the 1985 field season.

Instruction manual for determination of Na and K by flow injection analysis and atomic absorption spectroscopy

by I. Sekerka and J.F. Lechner. Burlington, Ont. : Canada Centre for Inland Waters, National Water Research Institute, 1990. ii, 16 p. : ill. Bibliogr. (NWRI contribution ; 90-107)
MICROLOG 93-06304 1 fiche

This report provides details on the adaptation of a flow injection analysis (FIA) technique to automate the sample delivery in an atomic absorption spectroscopy analytical method. The procedure entails automated insertions of discrete volumes of sample into a constantly flowing cesium chloride reagent solution that is indirectly pumped into the nebulizer of the AA spectrophotometer. With this method, sodium and potassium analysis can be achieved at high precision and low detection limits at rates of 120-180 samples per hour.

Insulation contamination problems and mitigation methods recently employed at BPA

by P.E. Renner, A.L. Gabriel and C.L. Nellis. Montreal : Canadian Electrical Association, Engineering and Operating Division, Power System Planning and Operating Section, Electrical Performance of Insulators Committee, 1992. 7 p. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06066 1 fiche

Although not a widespread problem at BPA, contamination in localized areas have created operating difficulties. Recent experience in three such areas are presented in this paper. One is a natural contamination (alkali) occuring on the Pacific NW-SW 500 kV DC Intertie. The other two are situations where substation insulation is being contaminated by residual chemicals left when water vapor, from nearby cooling towers, evaporates. In all cases, identification of the contaminant and the process of insulation degradation is important. Discussions of mitigation procedures such as surface coatings or replacement with non-

ceramic insulators are included

Integrity assessment of aluminum alloy lined FRP hoop-wrapped cylinders

submitted to the Canadian Gas Association ; prepared for Transportation Development Centre, Policy and Co-ordination, Transport Canada ; by A. Akhtar...et al. Surrey, B.C. : Powertech Labs Inc., 1992. xi, 48 p. : ill. Bibliogr.
MICROLOG 93-03722 1 fiche

Aluminum alloy-lined fibre glass reinforced (FRP) plastic hoop-wrapped cylinders are designed so that at the burst pressure of 51 7 MPa the load is equally shared by the metallic liner and the FRP. Autofrettage or tape wrapping under tension allows the metallic liner to remain under compressive stress and the FRP in tension while the vessel remains unpressurized, thus enhancing the fatigue life of the metallic liner. This report gives the results of an investigation of cylinder degradation in the laboratory. Residual life and pressure retaining capacity of cylinders were established as a function of degrees of damage to the FRP using acoustic emissions

An Inter-laboratory analytical study on the analysis of gold in copper anode slimes

by C.J. Weatherell. Ottawa : Canada Centre for Mineral and Energy Technology, Mineral Sciences Laboratories, 1992. i, 14 p. : ill. (Report ; MSL 92-59(TR))
MICROLOG 93-00499 1 fiche

Copper anode slimes usually contain major amounts of silver and gold and trace quantities of platinum, palladium, transition metals, and other impurities. Fire assay methods are customarily used to determine the gold content of copper anode slimes. However, there are few experienced fire assayers and no replacements, specialized and expensive facilities are required to house the equipment, and the furnaces used exhibit non-uniform temperature profiles. These issues, compounded by manpower shortages in analytical laboratories and lengthy analysis times, led to an evaluation of alternative methods. This study compared traditional fire assay methods and wet dissolution or spectroscopic techniques. Umpire laboratories were included in the study at the request of the industry.

Interim guidelines on aboriginal use of fish and wildlife : discussion paper

Victoria : Ministry of Environment, Lands and Parks, Native Affairs Branch, 1993. 12 p.
MICROLOG 93-04971 1 fiche

In the absence of clear direction from the courts on how aboriginal priority use of fish and wildlife should be determined, provincial officials have had difficulty in assessing aboriginal sustenance needs and have been unable to establish clear enforcement regulations. These interim guidelines are intended to reduce that uncertainty by providing for clear guidance. The document includes a listing of the Ministry of Environment, Lands and Parks Resource management principles and guidelines on harvest allocation, procedures for general and restricted harvest allocation, enforcement for conservation purposes, and procedures on enforcement for conservation purposes.

Interim report

Manitoba Task Force on Distance Education and Technology. Winnipeg : The Task Force, 1992. 37 p.
MICROLOG 93-01101 1 fiche

Rural depopulation has been shrinking student enrolments in rural schools since 1930. As a result, rural residents have seen school after school close in their communities, and their children riding the buses further and further to receive an education. This report presents a discussion of the direction for distance education. It discusses supporting government policies and programs, funding, distance education technologies and applications, computer-assisted learning, the distance delivery system, inter-active instructional television, and satellite-delivered courses.

Interim report of the Municipal Reform Commissioner, Cape Breton County, Industrial Cape Breton

Nova Scotia. Municipal Reform Commissioner for Cape Breton County, Industrial Cape Breton. Halifax : The Commissioner, 1993 viii, 126 p. : ill., maps.
MICROLOG 93-08291 2 fiche

This report provides information needed for informed public consultation. Some recommendations focus public attention to specific issues. Experience teaches that public input is most valuable when it is focused on a specific question. It also provides the information needed to evaluate, and if so determined, to implement, municipal reform in Cape Breton County. Public consultation is needed, though, before implementation. The primary purpose of this report is to permit an initial determination of whether implementation should be further considered. If so, this report can form the basis for further consultation. It goes on to discuss the reallocation of services, municipal restructuring, unitary government in the County, and its organization and finance.

Interim report to the Minister of Energy, Mines and Petroleum Resources on long term firm electricity exports

British Columbia Energy Council. Vancouver, B.C. : The Council, 1992. ii, 59 p.
MICROLOG 93-02970 1 fiche

In July 1992, the British Columbia Government asked the B.C. Energy Council for a review of long-term firm electricity exports. This interim report addresses the requirement of the terms of reference, reporting the information received, the information issued to date, the public involvement processes and independent research undertaken, and summarizing what has been learned. The report describes the commercial potential for long-term firm exports of electrical power. Policy issues, including the integrated reservoir system and transmission grid, environmental and social impacts, security of supply, the potential impact of the Canada-United States Free Trade Agreement, the geographic distribution of benefits and costs, and the uncertainty of fuel and electricity prices are discussed. Questions for further consideration include B.C. Hydro's and the integrated reservoir and transmission system's role in long-term exports; environmental, social and regional impacts; security of supply; and the potential impact of the FTA.

Interior point algorithms for some monotone variational inequality problems

by J.H. Wu. Montreal : Université de Montréal, Centre de recherche sur les transports, 1993. 13 p. Bibliogr. (Publication ; no. 879)
MICROLOG 93-05287 1 fiche

This paper presents two interior point algorithms for some monotone variations inequality problems. It shows that the first algorithm is globally linearly convergent and generates an e-solution in polynomial iterations. Here each iteration takes only one Newton step over a parameterized linear equation. Then the algorithm is modified so that it turns to solve the same equation but with the parameter set to zero after a certain number of iterations. The modified algorithm is proved to be globally linearly and locally quadratically convergent under some assumptions.

Intermodality on the emergence of mega-urban regions : principles and equations

by J.-P. Rodrigue. Montreal : Université de Montréal, Centre de recherche sur les transports, 1992. 9 p. : ill. Bibliogr. (Publication ; no. 860)
MICROLOG 93-01783 1 fiche

Intermodality occurs in a three-dimensional transportation space where the first dimension is the spatial entities (points), the second is the modal interactions, and the third is the intermodal interactions. This paper gives a new perspective on urbanization by integrating the concept of intermodality to the development of large economic areas defined as mega-urban regions and to contribute to the understanding of the relationships between transportation and land use. The paper shows the main tendencies of modern transportation to verify the relationships between the modes and to present a definition of intermodality in emerging East Asian mega-urban regions.

International debt -- Rev.

by P. Berg. Ottawa : Library of Parliament, Research Branch, 1992. 21 p. Bibliogr. (Current issue review ; 84-30E) *Revised 13 May, 1992.* ISBN 0-660-14604-5
MICROLOG 93-02290 1 fiche

Few international economic issues have generated as much concern as the international debt problem. This concern has emanated from virtually all the key international financial players. Commercial banks, international financial institutions, central banks, as well as governments in both creditor and debtor countries, all had some stake in the massive rise in international lending and borrowing that occurred during the 1970s. This document discusses the extent and nature of the international debt problem, the origins of the problem, the post-1982 period, efforts to resolve the problem, and Canadian exposure.

International study of car-use, appendix to vol. 2 : description and specification of the reformatted UK databases

by Martin E.H. Lee-Gosselin, Université Laval and Graham P. Scholefield ; for Transportation Development Centre, Policy and Coordination Group, Transport Canada. Ile d'Orléans, Que. : Lee-Gosselin Associates Limited, 1991. 41 p.
MICROLOG 93-04649 1 fiche

As part of a project to compare evolving car-use trends in Canada, the United States, and Britain, a review was conducted of existing British travel survey data, focusing on the classification of car-use by individuals for as long a period as was covered by the survey instruments. Those considered as of particular interest included the 1978/79 and 1985/86 National Traffic Surveys, which covered seven days of travel, and the 1981 Greater London Transportation Survey, which covered one weekday of travel per respondent. This report describes the work undertaken to preformat the data from the 1978/79 NTS and the 1981 GLTS data bases to provide summaries of travel, by all modes, on a person-day and person-week basis. As part of the re-formatting, a substantial number of subcategories of time and distance were defined.

International study of car-use, vol. 1 : future patterns of car-use given changing traffic conditions, controls and technology : an exploration of survey methods

by Marten E.H. Lee-Gosselin and Université Laval ; for Transportation Development Centre, Policy and Coordination Group, Transport Canada. Ile d'Orléans, Que. : Lee-Gosselin Associates Limited, 1990. xvii, 25 p. Bibliogr.
MICROLOG 93-04658 1 fiche

This study covers experimental work on survey methods that measure how drivers' perceptions of actual trips during a diary period and of the cumulative stresses of driving relate to the set of travel opportunities they consider they have available. A series of 10 experimental interviews was undertaken in summer 1989, the first four of which determined how drivers defined and perceived hassle during a drive along a fixed route, which was videotaped. In the other six interviews, a variety of households implemented alternative diary instruments to record travel, and in some cases all activities, for either four or seven days. The data from these diaries were summarized using the techniques of a gaming-simulation method known as the Car-Use Patterns Interview-Game. This report presents the findings.

Internship programs in educational administration : a preliminary discussion

by E.S. Hickcox and J.H. House. Toronto : Ontario Institute for Studies in Education, 1990. 14 p. Bibliogr. *ONTERIS: ON06205.*
MICROLOG 93-08370 1 fiche

Addressed the notion of internships as component parts of professional training programs in educational administration. Discovered few published papers on the subject and decided to survey 18 Canadian universities with programs at either master's or doctoral level. Found few programs with any kind of practicum or internship, and, with the exception of O.I.S.E., none which make the internship central to the program. Discussed the reasons for this lack, and the pros and cons of various models.

Interpretation of ultimate biochemical oxygen demand data via kinetic curve extrapolation models

by F. Skinner and A. Van Roodselaar. Vegreville, Alta. : Alberta Environmental Centre, 1990. viii, 47 p. : ill. Bibliogr. ISBN 0-7732-0650-7
MICROLOG 93-02242 1 fiche

This report explains the methodology and limitations in the interpretation of biochemical oxygen demand (BOD) using databases of up to 257 days to yield ultimate BOD values. Procedures leading to the separation of the contribution of carbonaceous and nitrogenous BOD are illustrated and carbonaceous data sets are processed by a non-linear regression program employing either a one, two, or three term first order model. Subsets of the reflecting shorter duration experiments are analyzed and a review of the ratio of the fast and slow rate of the two term model is carried out for this and other studies.

Interprovincial barriers to trade : a review of the empirical evidence from a British Columbia perspective

by B.R. Copeland. Victoria : Ministry of Economic Development, Small Business and Trade, 1992. 36 p. Bibliogr.
MICROLOG 93-07570 1 fiche

While some studies claim that interprovincial trade barriers create significant inefficiencies in the Canadian economy, others argue that such barriers have relatively small efficiency effects. This paper present a critical review of the most significant recent studies which have attempted to estimate the quantitative effects of federal and provincial policies that distort interprovincial trade. It explains why some interprovincial trade barriers are inevitable, and gives some brief thoughts on the appropriate approach to take in dealing with them. Finally, it focuses on British Columbia issues, and provides a summary.

L'Intervention des tiers en période électorale et les contributions versées aux partis politiques et aux candidats au regard des chartes

Québec : Directeur général des élections du Québec, 1991. 33 p. *En tête du titre: Etudes électorales.* ISBN 2-550-21598-2
MICROLOG 93-05830 1 fiche

Ce document vise à exposer la problématique de certaines dispositions de la Loi électorale du Québec concernant le financement des partis politiques et le contrôle des dépenses électorales, dans le contexte de la Charte canadienne des droits et libertés ou de la Charte québécoise des droits de la personne. Cette problématique pose en fait deux grande questions, auxquelles on suggère des éléments de réponse. Devrait-on permettre à quiconque de faire des dépenses électorales? Doit-on continuer à limiter à limiter aux seuls électeurs la possibilité de contribuer au financement des partis politiques et des candidats? Le document traite également des dispositions des Chartes québécoise et canadienne afin de mettre en lumière les constestations de ces dispositions législatives en vertu des Chartes. Il fait état de la jurisprudence sur cette question au Québec, au Manitoba, en Saskatchewan, en Colombie-Britannique et en Alberta.

Interventions pédagogiques, secondaire, 1er cycle

Fredericton : Projet d'éducation à la solidarité internationale, 1992. 191 p. : ill. ISBN 1-55048-987-9
MICROLOG 93-05147 3 fiche

Ce recueil réunit les 60 interventions pédagogiques qui ont été préparées à la phase II du Projet d'éducation à la solidarité internationale. Ces interventions touchent la programmation du secondaire premier cycle en français, en mathématiques, en santé et sciences familiales, en sciences et en sciences humaines. Les interventions ont été élaborées selon la méthode d'infusion; les objectifs d'apprentissage contenus dans les programmes d'études sont ainsi demeurés les mêmes. Des objectifs spécifiques, conformes aux concepts d'éducation planétaire, sont venus préciser les objectifs d'apprentissage et des activités correspondantes ont été proposées.

Introducing BSM : a computer program of the Block-Spring Model for analyzing jointed rocks

by B. Wang. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1992. ii, 10 p. : ill Bibliogr (Report ; MRL 92-124(TR))
MICROLOG 93-04254 1 fiche

This report introduces a Block-Spring Model (BSM) for stress and deformation analysis of discontinuous rocks. The program can be used to simulate the blocky nature of heavily jointed rocks and can model sliding of the rock blocks along joints as well as separation and closure of the joints. The program can also simulate rock bolts (or cable bolts) and groundwater effect. A pre-processor of the program has been made to work under Microsoft Windows environment and all data required for a BSM analysis can be prepared using the pre-processor. An example is provided to illustrate the features of the program.

Introduction of remote meter reading for Hydro-Quebec's residential customers

by R. Haché and D. Pouliot. Montreal : Canadian Electrical Association, Metering Section, 1992. 20 p. . ill. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06060 1 fiche

In 1986 Hydro-Quebec set a province-wide objective, under its program to improve the quality of customer service, to achieve 95% billing based on real readings. Using market studies, Hydro-Quebec was able to determine a population (approximately 10% of customers) of hard-to-access meters. To reach the objective, they examined the options of using additional human resources or using new technology. In 1988, they decided to adopt inbound technology (TELEREADER) and carry out a pilot project to validate certain aspects of the technology. This document gives an introduction to TELEREADER, along with its requirements, parameters and information on its installation.

Introduction to real property taxation on reserve

Ottawa : Indian and Northern Affairs Canada, Indian Taxation Advisory Board, 1990. 34, 40 p. Bibliogr. *Bilingual (Introduction à l'imposition...)*. ISBN 0-662-57320-X
MICROLOG 93-02717 1 fiche

This document has been produced by the Indian Taxation Advisory Board to provide a basic introduction to property taxation under the Indian Act primarily for the benefit of first nations/bands who are contemplating the use of their taxation powers. It outlines the essential elements of property taxation, including its basic purposes, property assessment, the calculation of rates, different types of taxation, and the important aspect of appeals. It introduces the new Indian Taxation Advisory Board and describes its role and mandate. It also lays out the process for by-law approval with particular attention to the benefit of interaction between first nations/bands and the Board prior to the passage of a by-law. It provides a schedule for the by-law approval process.

Introduction to the Intelligent Graphic Interface Research Project

by J. Crawford. Montreal : Canadian Electrical Association, Engineering and Operating Division, Telecontrol and Telecommunications Section, Data, Automation and Control Subsection, 1992. 13 p. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06216 1 fiche

The Intelligent Graphic Interface (IGI) Research Project is a unique applied project linking Canadian industry and academic communities. The goal is to combine advanced computer graphics technology with expert systems and human factors engineering to produce an intelligent graphics interface, essentially an expert assistant for operators of real-time supervisory control systems. The advanced research is expected to result in significant benefits to industry in areas such as telecommunications network management, electric power distribution, pulp and paper operations, and industrial process control. An executive overview is provided of the IGI research project, including its anticipated benefits, the current level of research activities, and brief descriptions of project participants.

An Introductory guide to boating information sources

by K. Dixon. Ottawa : Canadian Parks Service, National Parks, Visitor Activities Branch, 1991. 57 p.
MICROLOG 93-01697 1 fiche

This guide was developed for Canadian Parks Service staff, particularly regional visitor activity specialists. Boating includes power boating, cruising or sailing on an open water body, river or canal for day, overnight and transient boater trips. Material published after 1980 was used including articles, brochures, books, directories, guidebooks, reports, and technical-standards information. The guide is organized by subject headings that include activity, experience-behaviour, market characteristics, operations, strategy-planning, public safety, resource protection, trends, and policy-regulations. For each major subject heading a list of information resources is provided with sample references, organized geographically.

Introspection : Canadian school boards look at themselves : school board effectiveness study

Ottawa : Canadian School Board Association, 1991. xiv, 115 p. Bibliogr. ISBN 0-920632-43-2
MICROLOG 93-03313 2 fiche

Who are the Canadians who govern the country's local education systems? Do they see themselves as effective? How do they measure up as leaders in the eyes of the many constituencies the system is designed to serve? The Canadian School Boards Association sought to find answers to these largely unposed questions with its effectiveness study. This document presents the study findings. It discusses the tradition of local governance of education, elements of decision-making, school board elections, board-staff relations, perceptions from the inside and outside on community relations, parents' voices, major findings in relation to achieving effectiveness, and indicators of an effective board.

Inventory of Aboriginal policing programs in Canada, part IV : police-community communication and liaison

by J. Jarvis. Ottawa : Solicitor General Canada, 1992. v, 64 p. (User report ; 1992-15) (Aboriginal policing series) ISBN 0-662-19870-0
MICROLOG 93-05872 1 fiche

This report highlights initiatives in which police and community members work together to improve policing services, including understanding local culture and traditions, and address issues of mutual concern. It is divided into three sections. In section one respondents identify a range of police-based initiatives which seek to educate members of Aboriginal communities regarding policing. Section two identifies police-initiated community committees or groups as a key strategy to enhance liaison and communication with members of Aboriginal communities. In section three, respondents identify inter-agency committees or groups as a key strategy in developing appropriate responses to community concerns.

Inventory of Aboriginal policing programs in Canada, part V : focus on youth

by J. Jarvis. Ottawa : Solicitor General Canada, 1992. v, 64 p. (User report ; 1992-16) (Aboriginal policing series) ISBN 0-662-19871-9
MICROLOG 93-05876 1 fiche

This report highlights police involvement in a wide variety of initiatives which offer a combination of education, skills development, and recreational opportunities for young people. It looks at the following initiatives: sports events and camps; field trips and exchange programs; organized community youth groups; community education and school visitation programs for youth; and skills development opportunities. It also identifies several initiatives in which police services are working with other agencies and members of the community to develop services for young offenders and youth at risk.

Inventory of federal science and technology activities in the North, 1991-92

Ottawa : Indian and Northern Affairs Canada, Circumpolar and Scientific Affairs, 1993. ix, 464 p. (Circumpolar and scientific affairs publication series ; 93-03)
MICROLOG 93-08835 5 fiche

This inventory was undertaken to ascertain the federal government's range, scope and level of funding vis-à-vis northern scientific research and technology development. It is broken down by department/agency, then by institute/branch/directorate, and finally by project/activity title all in alphabetical order. A short introduction is provided for each department/agency with a major stake in northern research. The project/activity information contained in each entry was collated entirely from the data provided on the inventory questionnaires. The project/activity data appear in French or English, depending on which language the respondent chose.

Investigating the application of a water-alternating gas flood using produced gas for the Senlac heavy oil field : final report

by E. Pappas and G. Nieuwenburg. Regina : Saskoil, 1990. vi, 60 p. : ill. *CANMET contract: 23440-8-9235-01-SQ.*
MICROLOG 93-08320 1 fiche

The use of produced gas for a water-alternating-gas (WAG) flood in Lloydminster area heavy oil fields may provide an inexpensive method to recover additional oil than is possible by simple waterflooding alone. The main purpose of considering a produced gas WAG flood is to provide injected-water mobility control and reservoir pressure and energy. The Senlac heavy oil field was first actively developed in 1980 and is now approaching economic limits under primary depletion. This report presents the results of a project that involved five tasks, the first two of which provided pressure-volume-temperature (PVT) and coreflood information, the third of which examined the economics of a produced gas WAG flood, the fourth of which investigated the effectiveness of the WAG scheme through the use of numerical simulation, and the fifth of which involved data analysis.

Investigation of air seeder performance for metering pulse seeds : final report

Prairie Agricultural Machinery Institute (Canada). Regina : Saskatchewan Agriculture Development Fund, 1990. 49 p. : ill. Bibliogr.
MICROLOG 93-08358 1 fiche

Over the past 10 years, an increasing share of the seeding equipment market has been taken over by air seeders. Since grain drill meters can cause damage to pulse seeds, there is concern that some air seeders or air seeder components may cause significant pulse seed damage. This project was designed to test different types of air seeder components. The study classified the main air seeder components into groups of similar though not identical components; selected a typical sample of each classification of component and measured the damage to the pulse seed caused by each component; conducted the tests with Princess and Trapper peas and Laird lentils at various seed flow and airflow rates representative of normal seeding conditions; and analyzed the results to determine the effect of crackage and germination of each tested component and the dependence upon seed flow rate and airflow rate.

Investigation of ice motion and wave generated ice conditions during LIMEX'89

by B.M. Eid...et al. St. John's : Memorial University of Newfoundland, Centre for Cold Ocean Resources Engineering, 1991. 15 p. : ill. Bibliogr. (C-CORE publication ; no. 91-24) *Presented at the International Conference on Port and Ocean Engineering under Arctic Conditions.*
MICROLOG 93-06006 1 fiche (Available on fiche only)

The marginal ice zone (MIZ) of the Southern Labrador Sea is an area of increasing interest from an economic and scientific point of view. The Waves-In-Ice program of the Labrador Ice Margin Experiment, LIMEX'89, provided in-depth investigation into wave processes in the MIZ to adequately model wave-ice interaction, to provide in-situ ice motion data for interpretation of airborne SAR images of surface waves, and to investigate the applicability and accuracy of in situ measurements of ocean waves and wave-induced ice motion using both traditional and new techniques. Data collected by the MV TERRA NORDICA during the field cruise included meteorological parameters, sea state, wave induced ice motion, ice dispersion, quantitative wave observation by shipboard marine radar and wave height altimeter, and ice properties. In addition, four SAR flights were carried out during the experiment. This paper describes the field experiment, data collection, and analysis techniques. Derivation of wave spectra from six degrees of freedom measurements is carried out, and the validity of using Longuet- Higgins technique for heave-pitch-roll buoy data is examined. The paper also presents preliminary results of intercomparisons between different data sources including the SAR wave data.

Iodine content of Saskatchewan milk : final report

by D.A. Christensen. Regina : Saskatchewan Agriculture Development Fund, 1991. 13 p. ISSN 0829-9455
MICROLOG 93-06780 1 fiche

A study was carried out to determine the iodine content of milk on individual Saskatchewan dairy farms over a six month period. Cow milk is a significant source of iodine in the human diet. Cows fed or treated with excessive levels of iodine may transfer significant amounts of iodine to milk, resulting in elevated iodine levels that may pose a hazard to human health. Milk samples were collected from 647 dairy farms. Experimental methods and results are presented, and impacts on cattle feeding practices are discussed.

Organic acids originate from both biogenic and anthropogenic sources and can account for up to 80% of total acidity in both cloud droplets and rainwater. The acids are present in significant quantity in the atmosphere and need to be determined accurately for proper accounting of atmospheric chemistry processes and precipitation ionic balances. This report describes an ion-exclusion chromatographic method for simultaneous analysis of organic acids usually found in precipitation-related samples. The method excludes most strong inorganic acids and resolves most organic acids, particularly lactic and acetic, which the powerful gradient method cannot resolve. The analyzable acids are citric, hydrofluoric, lactic, glycolic, formic, acetic, propionic, and butyric.

Is Bill C-15 working? An overview of the research on the effects of the 1988 child sexual abuse amendments

by V. Schmolka. Ottawa : Dept. of Justice Canada, Research Section, 1992. 113 p. Bibliogr. (Studies on the sexual abuse of children in Canada) *French ed (Le Projet de loi C-15 donne-t-il...) : 93-03849/2.* ISBN 0-662-20237-6
MICROLOG 93-03848 2 fiche

This report summarizes a number of studies on child sexual abuse that were undertaken under the direction of the Department of Justice Canada. Their purpose is to provide an accurate and impartial description of how the criminal justice system and, to some extent, the social services system deal with child sexual abuse. Appendices include a list of research studies, a list of cases referred to in this report, a list of projects relating to child sexual abuse funded by the Department of Justice Canada, and a description of the law information work undertaken by the Department of Justice Canada.

Island Falls to Points North transmission system planning studies

by G.R. Belanger. Montreal : Canadian Electrical Association, Engineering and Operating Division, Power System Planning and Operation Section, Transmission and Station Planning and Operations Subsection, 1992. 14 p. : ill. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06096 1 fiche

This paper describes the planning studies conducted in the development of a transmission line proposal to supply power to several remote mines located in northern Saskatchewan. In addition to the mine supplies, the new transmission line links the existing, formerly isolated, Athabasca transmission system with SaskPower's southern transmission grid. Because the length of transmission will be extensive, with large induction motor loads concentrated near the line end, the potential exists for extremes in voltage, both in steady state and during contingencies. The studies referred to in this paper principally address these possible voltage control problems. The planning studies focus on ensuring adequate steady state transfer capability, preventing voltage collapse and controlling overvoltages. Conclusions form the basis for the recommended system configuration.

Isocratic anion chromatographic method and comparison of methods for the determination of organic and inorganic acids in precipitation samples

by V. Cheam. Burlington, Ont. : Canada Centre for Inland Waters, National Water Research Institute, 1991. 23 p. : ill. Bibliogr. (NWRI contribution ; 91-129)
MICROLOG 93-06301 1 fiche

Organic acids originating from biogenic and anthropogenic sources are now known to play an important role in environmental chemistry. Both organic and inorganic acids need to be determined accurately to properly explain atmospheric chemistry processes and precipitation ionic balances. This report describes an isocratic anion chromatographic method for the analysis of samples containing these acids and assesses its performance against that of a gradient method and an ion-exclusion method.

Issues in integration : a background paper

Toronto : Ontario Public School Boards' Association, 1991. 39 p. Bibliogr. *ONTERIS: ON05935*
MICROLOG 93-00335 1 fiche

Describes legislative and litigative actions that have affected delivery of special education services in Ontario, presents definitions of integration, and summarizes various integration models. Highlights the need for an examination of the role of the education system in the provision of 'special services'; teacher education; parent and peer education and orientation, and financial and human resources. Stresses the lack of adequate research on the impact of integration in secondary schools and the need for in-depth financial analysis of integration options prior to implementation. Identifies 8 criteria predictive of success in integration: commitment to the concept by staff and principal; teacher training in behavioral principles and classroom management prior to mainstreaming; cooperative relationships among staff and principal; prior stability of staff and students in the special education class; academic and social skills comparable to those

of regular students; age compatibility; no serious budget constraints; and a positive attitude towards the exceptional student by students and staff.

La Justice : une responsabilité à partager : les actes du Sommet de la justice

Sommet de la justice (1992 : Québec, Québec). Québec : Ministère de la justice, 1992. 752 p. ISBN 2-550-26492-4
MICROLOG 93-05983 8 fiche

Les Actes du Sommet de la Justice se veulent une synthèse documentaire des principales informations qui peuvent être utiles à la compréhension de l'événement lui-même, de son contexte et de sa genèse, mais aussi des éléments de contenu qui ont été apportés, étudiés et discutés de même que des décisions, positions et engagements qui ont pu être exprimés à leur sujet. Le document est divisé en douze chapitres. Le premier résume les informations de nature générale relatives au Sommet de la Justice: origine, préparation, déroulement, participants, etc. Les onzes chapitres subséquents portent chacun sur l'un des onze grands sujets qui ont été retenus pour les délibérations du Sommet. Deux annexes complètent le document: la liste des participants et des observateurs officiels au Sommet ainsi que la liste des propositions qui ont été soumises par les divers organismes et groupes de travail en vue du Sommet. Pour faciliter la référence au document, une table des matières générale au début du document, une table des matières plus détaillée au début de chaque chapitre ainsi qu'un index analytique à la fin du document ont été inclus.

Juvenile Stages : the missing link in fisheries research : report of a workshop

edited by Y. de Lafontaine...et al. Mont-Joli, Que. : Ministère des pêches et des océans, Direction des sciences biologiques, Institut Maurice-Lamontagne, 1992. vii, 139 p. : ill., maps. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1890) ISSN 0706-6457
MICROLOG 93-04252 2 fiche

The workshop reviewed the present status of research on juvenile stages for fisheries management and provided recommendations for future research on juvenile stages as an index of recruitment. The first part of the workshop was dedicated to an overview of research activities through the presentation of new or unreported results on the ecology of juvenile stages. The report presents the extended abstracts of the contributed papers which embraced both vertebrate and invertebrate research studies. During the second part of the workshop, participants were divided into four working groups to formulate recommendations on sampling techniques, growth/mortality, recruitment indices, and preferred habitats. The discussion reports of each working group are presented, along with the final recommendations and the generalizations of the steering committee.

Kabinakagami Lake area (NTS 42C/NE), District of Algoma

by J.F. Gartner and D.F. McQuay. Toronto : Ministry of Natural Resources, Ontario Geological Survey ; Ministry of Northern Affairs, 1980. iii, 14 p. : map. Bibliogr. (Northern Ontario engineering geology terrain study ; 62) *Fold map not filmed.* ISSN 0709-4671 ISBN 0-7743-4338-9
MICROLOG 93-02416 1 fiche

This report contains an inventory of regional engineering terrain conditions in the Kabinakagami Lake area, District of Algoma. The information was obtained mainly from aerial photographs checked with published and unpublished literature documenting previous field visits and observations. In summer 1978, roads in the area were traversed and observed terrain conditions recorded as further verification of the office studies. The report describes the geological setting and the engineering terrain units of the area, including organic, bedrock, glaciolacustrine, moraine, glaciofluvial and alluvial.

Kalum North timber supply analysis

Victoria : Ministry of Forests, Integrated Resources Branch, 1993. ix, 61 p. : ill. Bibliogr. ISBN 0-7726-1757-0
MICROLOG 93-07674 1 fiche

As part of the provincial timber supply review, B.C. Forest Services has examined the availability of timber in the northern portion of the Kalum Timber Supply Area (Kalum North). The analysis assesses how current forest management practices affect the supply of wood available for harvesting over the next 200 years. It also examines the potential changes in timber supply stemming from uncertainties about forest growth and management actions. Changes in timber supply sensitivity include harvest flow, existing stand volume estimates, regenerated stand volume estimates, minimum harvest age, adjacency guidelines, regeneration delay estimates, green-up estimates, timber harvesting land base, and timing of access to the Upper Nass.

Kaministiquia River water quality study, part 5 : effluent and receiving water trace contaminant analysis

by S. Klose. Toronto : Ministry of the Environment, Environmental Services, Water Resources, 1992. ix, 142 p. : ill. Bibliogr. ISBN 0-7729-7072-6
MICROLOG 93-00734 2 fiche

The study of the Kaministiquia River, originally planned as a waste assimilation capacity investigation in 1985, was later expanded and included as a municipal industrial strategy for abatement (MISA) pilot site. This report, Part 5 in the series, completes the analysis of the 1986 water quality survey results initiated in the Part 1 report. Grab samples as well as composite samples were collected during a short-term intensive survey from the point source dischargers Canadian Pacific Forest Products Co. (CPFP), Reichhold Chemical, Ogilvie Mills, and the Thunder Bay Sewage Treatment Plant to the lower Kaministiquia River. Grab samples only were collected from 12 stations within the lower Kaministiquia River also during an intensive short-term survey. River stations included points upstream and downstream of the four point source dischargers. The major emphasis was on the discharge from CPFP, which operates a large pulp and paper mill discharging to the river about 10 km upstream of Thunder Bay harbour. Up to 148 organic and inorganic parameters were measured in samples collected from each sampling point.

Kamloops LRMP : environmental, economic and social profile

G.E. Bridges & Associates Inc. Victoria : Ministry of Forests, Economics and Trade Branch, 1993. x, 72 p. Bibliogr.
MICROLOG 93-07407 1 fiche

A socio-economic analysis of the Kamloops Resource Management Area was carried out as a key component of the Land and Resource Management Planning (LRMP) process. The first step of the analysis involved the preparation of an environmental, economic, social, and community profile to establish the base case against which various management options will be assessed during the management options development stage. This report summarizes the major results of the profile. The economic sector profile discussed the forestry, mining, agriculture, commercial fisheries, and tourism sectors and government revenues, and the social and community profile discussed population distribution, the labour force, social and community services, social integration, and the aboriginal community.

Key components of the 1993 GLG

Toronto : Ministry of Education, 1993. 15, 16 p *Bilingual (Eléments clés des subventions...). ONTERIS: ON06190.*
MICROLOG 93-08368 1 fiche

Provides details regarding the key components of the 1993 General Legislative Grants (GLG) and Pay Equity Funding (PEF). The early release of this information is designed to assist boards in their budgetary planning process. Changes outlined include ceilings to per pupil expenditure, salaries, the sharing between coterminous school boards of commercial and industrial assessment (pooling), projected standard mill rates, assessment equalization factors, board- and program-specific grants, and transportation. Details are also provided for textbook grants and the purchase of computer hardware. The changes that will occur as a result of the proposed Bill 88, and their ramifications for the budgeting process, are discussed. Finally, 1993 assessment equalization factors are outlined by county, region or municipality, and grant and apportionment.

Knowledge assessment based on the Dempster-Shafer belief propagation theory

by M.C. Desmarais and J. Liu. Montreal : Centre de recherche informatique de Montréal, 1993. 26 p. : ill. Bibliogr. (Rapport technique ; CRIM-93-/01-20) (Collection scientifique et technique) ISBN 2-921316-07-2
MICROLOG 93-04231 1 fiche

The Dempster-Shafer (D-S) theory of evidence offers a rigorous means for revising beliefs in the presence of new information (i.e., accumulated evidence). This report describes an application of the D-S evidential reasoning with user-knowledge assessment. The report first reviews some related work on assessing user-knowledge and reasoning under uncertainty. It then provides the methodological and procedural details of the knowledge-assessment approach for constructing the basis for inferencing knowledge structure and aggregate beliefs based on the D-S evidential reasoning. It describes an implemented system and shows its performance under various conditions by conducting a series of tests using simulated observation data (from empirically obtained user-knowledge models) and comparisons with other belief updating schemes. The general usefulness of the knowledge assessment methodology is discussed.

Laboratory experimentation in wood frame wall drying with comparisons to WALLDRY (Modified 1986 version) : final report

Morrison Hershfield Limited. Ottawa : Canada Mortgage and Housing Corporation, Research Division, 1991. ii, 167 p. : ill. Bibliogr.
MICROLOG 93-03119 2 fiche

A computer simulation program called WALLDRY is being developed to allow wall designers and researchers to predict the moisture performance of wood frame walls under selective climatic conditions. This study incorporated an air flow mechanism into the model and performed a laboratory experiment to provide data for validation of the modified program. In the test program, six walls (vented and sealed pairs) were monitored while undergoing simulated winter and summer conditions. The results of the experiment were compared with predictions from the modified WALLDRY program. This report outlines the experimental procedure conducted, along with comparisons of the simulation predictions.

Laboratory investigation of frazil evolution flocculation and the formation of anchor ice : progress report

by G. Tsang Saskatoon, Sask. : Environment Canada, Ground Water Division, National Hydrology Research Institute, 1989. 126 p. : ill. (NHRI contribution ; no. 89070) ISSN 0838-1992
MICROLOG 93-07222 2 fiche

A laboratory investigation into the evolution and flocculation of frazil, the vertical distribution of frazil, and the formation of anchor ice under different hydro-thermal conditions is now in progress, supported by Ontario Hydro, Hydro-Quebec, Manitoba Hydro, and the New York Power Authority. The study is conducted in a cold room using a circular flume with rotating bottom. This report summarizes the first year's work, during which the circular flume and an instrument capable of measuring the concentration of frazil at three points was designed and constructed. Open water background velocity measurements were made using three different roughnesses for the rotating bottom and the flow characteristics in the flume under different rotating speeds were established.

Laboratory measurements of mass transfer of carbon dioxide and water vapour for smooth and rough flow conditions

by F.J. Ocampo-Torres...et al. Burlington, Ont. : Canada Centre for Inland Waters, National Water Research Institute, 1991. 55 p. : ill. Bibliogr. (NWRI contribution ; 91-130)
MICROLOG 93-06300 1 fiche

The exchange of mass and heat across air-water interfaces is an important process in geochemical global cycles. A better understanding of the corresponding exchange coefficients and their dependence upon the relevant physical phenomena is urgently needed to address the problem of properly parameterizing and predicting large scale processes that influence our environment. The transfer of carbon dioxide is of particular importance since it plays a major role in the global warming process. This paper describes some laboratory measurements of the mass transfer of carbon dioxide and water vapour and the determination of the corresponding exchange coefficients. The wind speed dependence of these coefficients is for the first time revealed from experimental work.

Laboratory research analysis and testing of austenitic manganese steels for railway applications : final report

prepared for CP Rail and the Transportation Development Centre ; by W.B.F. Mackey [and] R.W. Smith. Kingston, Ont. : Queen's University, Dept. of Metallurgical Engineering, 1988. xiv, 50 p. : ill.
MICROLOG 93-03102 1 fiche

Results of a project to develop an improved Hadfield type of cast austenitic manganese steel for railway applications such as frogs and crossovers. Procedures were developed in laboratory foundry practice and heat treatment that correlated with commercial practice to produce rail head sections and investment-cast specimens for mechanical testing, chemical analysis, welding, explosive hardening and impact-wear testing on a unique machine developed at Queen's University. Heat treatment studies were preceded by work on phase diagrams, solutionizing temperatures and decarburization. The effect of pouring temperature and section size on grain size was evaluated and the influence of copper and phosphorus on mechanical properties was determined.

Labour force adaptability : implications for education and training

by M. Gunderson and W.C. Riddell. Victoria : British Columbia Task Force on Employment and Training, 1991. 49 p. Bibliogr. (Technical papers)
MICROLOG 93-01283 1 fiche

The purpose of this paper is to discuss the implications of labour force flexibility and adaptability for education and training. It discusses the changing workplace practices that are occurring as a result of the previously discussed pressures for change and the strategic response of business to those changes. It outlines the main features of the Canadian education and training system, emphasising those features that relate to the flexibility and adaptability of the workforce in the face of the changing workplace practices. It concludes with a discussion of the implications for education and training that result from the changing economic environment and associated workplace practices.

Labour, the most widely used and valued input in Canadian production, is exchanged in a market best described as being in a constant state of flux. Recent estimates suggest that more than four million people secure employment each year, while a similar number become unemployed or leave the labour market. Conditions in this market throughout the last decade and the beginning of the 1990s were influenced by a number of factors, the chief of which include two major recessions, disproportionate growth in regional employment and an increase in the incidence of long-term unemployment. This paper looks at these and other developments in the labour market that have occurred since the beginning of the last decade

Lagrangian current measurements from the Georges Bank frontal study, 1988-89, part I : drift buoy trajectories

by K.F. Drinkwater, M.J. Graça and J.W. Loder. Dartmouth, N.S : Bedford Institute of Oceanography ; Dept. of Fisheries and Oceans, Scotia-Fundy Region, Physical and Chemical Sciences Branch, 1992. iv, 105 p. : ill. Bibliogr. (Canadian data report of hydrography and ocean sciences ; no. 116) ISSN 0711-6721
MICROLOG 93-03756 2 fiche

From June to October 1988 and July 1989, an intensive multidisciplinary field study was conducted in the vicinity of the tidal front on the northeast peak of Georges Bank to examine the vertical and horizontal mixing processes and determine their effects upon biological production and species distribution. This report gives the current measurements obtained from the drifting buoys to determine the spatial structure of the near-surface current field near the tidal front, to investigate the occurrence and relative importance of surface convergence at the front, to evaluate the relations between near-surface (Lagrangian) drift and moored (Eulerian) current measurements, including an estimate of the Stokes drift; and to estimate horizontal dispersion rates. The report provides a graphical display of the oceanographic structure at the time of the buoy releases, the wind speed and direction during the tracking, the drift tracks of the buoys, and the detided or residual motion of the buoys.

Land rental arrangements

Regina : Saskatchewan Agriculture and Food, 1991. iv, 61 p. ISBN 0-88656-564-2
MICROLOG 93-00453 1 fiche

The large capital investment required in farms today can make renting farm property a good alternative to ownership. The 1986 census indicates that 54 percent of Saskatchewan farmers lease at least a portion of their farm land. Thirty-eight percent of the total farm land is under lease and bigger farms rent a larger portion of their land base as compared to smaller farms. This publication outlines the management, legal, and tax considerations of leasing privately owned land. In addition, it provides guidelines for the landlord and tenant when negotiating a rental agreement.

Land use change and soil conservation in southwestern Saskatchewan : final report

by D. Sauchyn, D. Patterson and C. Harlton. Regina : Saskatchewan Agriculture Development Fund, 1990. 106 p. Bibliogr.
MICROLOG 93-03123 2 fiche

This report describes the application of the ARC/INFO geographic information system (GIC) and remote sensing technology to the assessment and mapping of agricultural land use change, including the delimitation of marginal land for its capability for annual crop production, wind and water erosion risk and nonpoint source pollution potential. A detailed and comprehensive digital geographic data base was constructed for the rural municipalities of Webb and Gull Lake, including elevation, soil, hydrography, land cover, quarter section grid, field boundaries, land capability, and soil rating. From these was derived land cover change; slope gradient, aspect and length; wind and water erosion risk; nonpoint source pollution potential; and land use dynamics on marginal farmland

Land use zoning techniques used in forest planning in British Columbia

by S. Bellamy. Victoria : Ministry of Forests, Integrated Resources Branch, Resource Planning Section, 1992. v, 71 p. : maps. Bibliogr. ISBN 0-7718-9190-3
MICROLOG 93-02968 1 fiche

This report describes a number of plans within British Columbia that have used Resource Emphasis Area (REAs) or other forms of land use zoning. Each plan was examined for the issues involved, agency and public participation, REA development, nomenclature and emphasis, and size. All of the plans except one are Ministry of Forest's plans. A summary of REA use is also presented.

Landscapes : a guide to the landforms and ecology of southern Saskatchewan : reference manual

by J. Stan Rowe ; editor, Robert J. Long. Regina : Saskatchewan Environment, 1980. 101 p. : ill., maps. Bibliogr. *Cover title: Landscapes reference manual : a guide to the landforms and ecology of southern Saskatchewan.*
MICROLOG 93-08293 2 fiche

This manual is about Saskatchewan landscapes, with particular attention to those south of the Precambrian Shield country. It examines how landscapes are put together, and how they are used or misused. The aim is to encourage an affection for the environment and also to encourage an understanding of the ecological necessities for good land management. In Chaper 2, the theme 'caring for the biosphere' is developed by identifying the landscapes that surround us as ecological systems. Chapter 3 describes the common landforms of Saskatchewan, explaining their origins and the features by which they can be recognized, with reference to the work done by glaciers, and processes that have worked since the end of the ice age. Chapter 4 launches a more detailed explanation of the relationships among components of the landscape. Chapter 5 deals with the way we use land, and with the attitudes that have led to misuses. Finally, a glossary of technical terms and a list of references are provided.

Language and learning : effecting change through collaborative research in multilingual schools, vol. I : final report

to the Ontario Ministry of Education ; principal investigator: Gordon Wells. Toronto : Ontario Institute for Studies in Education, 1989. 276 p. : ill. Bibliogr. *ONTERIS: ON05837.*
MICROLOG 93-01234 3 fiche

Presents, from a variety of perspectives, some of what has been learned about learning in classroom communities dedicated to collaborative inquiry. Offers a variety of perspectives on language and learning in multilingual classrooms and schools. 6 issues shaped the analyses and interpretation of the sections. The development of literacy is principally addressed in parts 2 and 3 and in several of the papers in part 7. The classroom as a community of inquirers is discussed in part 6 and 7. Interaction with people and texts is considered from different perspectives throughout. The nature of school achievement, progress, and assessment is a central issue in part 2 and is discussed specifically with respect to writing in part 3. The relationship between school and home is the major theme in part 5. Collaborative research is another pervasive theme. It is the central issue in parts 4 and 6. Collaborative projects also figure in the papers.

Langue et statut économique au Québec, 1980-85

par F. Vaillancourt. Québec : Conseil de la langue française, 1991. xxiv, 218 p. Bibliogr. (Dossiers du Conseil de la langue française ; 34) ISBN 2-251-14897-9
MICROLOG 93-07562 3 fiche

L'objectif de ce travail est de faire le point sur l'importance des écarts de statut socio-économique entre groupes linguistiques au Québec à l'aide des données les plus récentes, soit celles de 1985, et d'en étudier l'évolution entre 1980 et 1985. Cette étude se divise en huit chapitres. Dans le premier, on présente les données, les méthodes d'analyse et les variables utilisées. Suivent quatre chapitres portant sur les disparités des revenus de travail. On y présente tout d'abord le cadre d'analyse ainsi que des résultats sur les écarts de statut, premièrement pour l'ensemble des Québécois, puis pour des sous-groupes constitués à l'aide d'un des cinq critères suivants: la langue maternelle, l'âge, la scolarité, le secteur d'activité et l'occupation. Les trois derniers chapitres portent respectivement sur le fait de travailler ou non et sur le nombre de semaines travaillées, sur le fait d'occuper ou non un poste de cadre et sur le fait de recevoir ou non des revenus de placements et sur le montant de ceux-ci. Trois annexes complètent cet ouvrage.

Large-scale dust explosion experiments to determine the effect of scaling on explosion parameters : final report

by R.K. Kumar and E.M. Bowles. Pinawa, Man. : Atomic Energy of Canada Ltd., 1990. 64 p. : ill. Bibliogr. *CANMET contract: 23440-8-907001-SQ.*
MICROLOG 93-04288 1 fiche

The explosion hazards in coal mines led researchers at the United States Bureau of Mines to carry out extensive work in experimental mines using pulverized coals. Based on their results, it appears that large-scale dust explosions can be modelled based on experiments in a much smaller 20-L vessel. However, the findings apply only to coal dust and it is important to verify the relationships with other types of dusts. Experiments were carried out in vessels of various shapes and sizes to confirm if the results of small-scale explosions can be extrapolated. This report describes the explosion characteristics of some of the common dusts in a 5.7-m-high, 1.5-m-I.D. cylindrical vessel using cornstarch and coal and sulphide ore dusts.

Larid breeding sites between Yellowknife and Gros Cap, north arm of Great Slave Lake, Northwest Territories, 1987

by J. Sirois, G.B. Cameron and K.J. McCormick. Yellowknife : Canadian Wildlife Service, Western and Northern Region, 1989. v, 42 p. : maps. Bibliogr. (Technical report series ; no. 69) ISSN 0831-6481 ISBN 0-662-17029-6
MICROLOG 93-00183 1 fiche

The Canadian Wildlife Service recently completed a compilation of the key migratory bird terrestrial habitat sites in the Northwest Territories. Any site that supports at least 1% of the Canadian population of a migratory bird species or subspecies, for any portion of the year, is considered to be a key habitat site. Evaluations are based on the best available estimates of national and regional populations and the number of individuals present at each site. Potential Caspian Term breeding sites along the Yellowknife-Gros Cap sector of the North Arm of Great Slave Lake were surveyed because the bird is considered a vulnerable species in Canada. This study determined the distribution and abundance of Caspian Terms and other larids between Yellowknife and Gros Cap; evaluated all or part of this sector of the North Arm as a potential key habitat site; and recorded observations on other wildlife.

Last in the queue : occasional paper

by Marcia H. Rioux ; presented to the International Association for the Scientific Study of Mental Deficiency and the annual national Conference of the Canadian Association for Community Living. Downsview, Ont. : G. Allan Roeher Institute, 1989. 8, 9 p. *Bilingual (Dernier en ligne...).* ISBN 0-920121-82-9
MICROLOG 93-02378 1 fiche (Available on fiche only)

In most countries, including Canada, people with mental handicaps must submit to the guidance of other persons or authorities before making important decisions such as to marry, vote, have children, enter into financial contracts, and live independently. There are many indications of how this differential treatment has come to be considered just and fair, and of how it is maintained. This document looks at two factors that have led to a generalized belief that the way people with mental handicaps are treated is fair and just.

Late Carboniferous and Early Permian drainage patterns in Atlantic Canada -- Rev.

by M.R. Gibling...et al. Halifax : Dept. of Mines and Energy, Mineral Resources Division, 1991. 17 p. : maps. Bibliogr. (Contribution series ; 92-007) *In* Canadian Journal of Earth Sciences : *29, 1992.*
MICROLOG 93-06728 1 fiche

The Maritimes Basin of Atlantic Canada is a complex of depocenters that extends from western New Brunswick to offshore southeastern Newfoundland and from northern Newfoundland and the Gaspe to southern Nova Scotia. Important questions include whether intrabasinal and marginal uplands were important drainage sources for the Maritimes Basin during the Late Carboniferous to Early Permian and whether distant, extrabasinal drainage sources were important, and if so, their location and the disposition of their drainage networks. Paleoflow data have been compiled for Late Carboniferous (late Westphalian A) to Early Permian alluvial deposits over this large area of Atlantic Canada. The data include more than 36,000 measurements of large-scale trough cross-strata. Conclusions are drawn as to the paleoflow prevailing in the basin and its drainage sources.

Leaching, degradation and fate of 14C-mexacarbate in columns packed with forest soils

by K.M.S. Sundaram...et al. Sault Ste. Marie, Ont. : Forestry Canada, Forest Pest Management Institute, 1985. ii, 34 p. : ill. Bibliogr. (Information report ; FPM-X-71) *French ed. (Percolation, dégradation et devenir...) : 93-02787/1.* ISSN 0704-772X ISBN 0-662-14428-7
MICROLOG 93-02776 1 fiche

Mexacarbate is a broad-spectrum insecticide that was first introduced in 1961 under the trade name Zectran. The chemical has potential for forestry use because of high insecticidal activity, short environmental persistence and low impact on most non-target species. It is now undergoing field trials in eastern Canada as a candidate material for large scale spruce budworm control operations This study was undertaken to elute 14C-labelled mexacarbate from fortified soil columns, hand-packed with forest soil profiles, to ascertain its adsorption and downward mobility; investigate the persistence and metabolic fate of mexacarbate in soil profiles under aerobic and anaerobic conditions; and obtain a mass balance for the pesticide to account for its disposition.

Lead-210 sedimentation in Lake Ontario

by S.R. Joshi, B.S. Shukla and A.G. Bobba. Burlington, Ont. : Canada Centre for Inland Waters, National Water Research Institute, 1991. 19 p. Bibliogr. (NWRI contribution ; 91-06)
MICROLOG 93-07473 1 fiche

The measurement of depth profile of lead-210 provides a suitable means for assigning dates to sediment core segments and deriving sedimentation rates. The interpretation of sedimentary 210-lead profile can be complicated by the mixing of old and new sediment. Estimates of mixing in Lake Ontario sediments have been previously derived by an analysis of porosity profiles. This paper suggests that realistic estimates are obtained when sedimentary lead-210 profiles are considered. A re-examination is presented of previously reported data in terms of the conventional approach assuming mixing is constant throughout the sediment core.

Leakage distance requirements for composite insulators designed for transmission lines

by J.N. Edgar, J. Kuffel and J.D. Mintz. Montreal : Canadian Electrical Association, 1993. 13 p. : ill. Bibliogr. *Presented at Electricity '93 : distribution power quality.*
MICROLOG 93-05242 1 fiche

This paper addresses the questions of the laboratory value of kV/cm of leakage distance corresponding to V50 for various polymer insulators under various values of ESDD; the reasonable estimate of the effects of in-service aging on the contamination performance of polymer insulators; and methods of implementation using cheaper insulators that do not compromise system reliability. This paper provides some answers to these general questions with specific attention concentrated on performance variations due to materials and shed design. The results of experiments to answer the first question were supplemented by limited experimental examination of field aged insulators that provided an indication of an answer to the second question. These data were then combined and applied through recognized design techniques to provide a general indication of an answer to the third question.

A Least squares technique for interpreting CODAR data

by K.J. Hickey, R.K. Howell and J. Walsh. St. John's : Memorial University of Newfoundland, Centre for Cold Ocean Resources Engineering, 1991. 4 p. : ill. (C-CORE publication ; no. 91-18) *Presented at NECEC '91.*
MICROLOG 93-06013 1 fiche (Available on fiche only)

The Coastal Ocean Dynamics Applications Radar (CODAR) system is a portable ground wave radar system capable of measuring ocean surface currents beyond the horizon. This paper presents a technique that uses the data from only one station to estimate the current field. The inverse problem of determining the current from its radial components is addressed by calculating the pseudo- inverse solution to the problem using a singular value decomposition.

La Lecture et les canadiens en 1991 : points saillants

Ottawa : Les Associés de recherche Ekos inc. ; Communications Canada, 1992. 38, 38 p. : ill. Bibliogr. *Bilingue (Reading in Canada, 1991 : highlights). CSI 21102.204.* ISBN 0-662-58892-4
MICROLOG 93-01360 1 fiche

Ce document a pour but de réunir des renseignements actuels sur les habitudes et les opinions des Canadiens de 14 ans et plus en matière de lecture. On y décrit l'état actuel de la consommation et des attitudes et on dégage certaines tendances grâce à la comparaison avec les conclusions d'une autre étude sur la lecture réalisée en 1978. Y sont particulièrement examinés les points suivants: la place de la lecture dans la société moderne; l'état actuel de la lecture au Canada; l'évolution de la lecture; la lecture et l'achat de livres, et, la lecture chez les enfants.

Legal issues in embryo and fetal tissue research and therapy

by B.M. Dickens. Ottawa : Royal Commission on New Reproductive Technologies, 1991. vii, 11 p. Bibliogr. *French ed. (Questions juridiques soulevées...) on the same fiche.*
ISBN 0-662-19093-9
MICROLOG 93-07452 1 fiche

Medical treatment of human life, before live birth, can be applied to gametes, pre-implantation embryos (pre-embryos), embryos, and fetuses. The Criminal Code recognizes a child that has not become a human being, meaning a fetus of full gestational age, or at least that is independently viable outside the uterus, meaning that is has not completely proceeded, in a living state, from the body of its mother. This paper considers pre-embryos, both *in vivo* and *in vitro*, and embryos and fetuses *in utero*. It addresses four individual categories: treatment of particular pre-embryos, embryos, and fetuses; treatment to benefit pre-embryos, embryos, and fetuses in general; treatment to benefit patients through the use of embryonic or fetal tissues; and the development of commercial interests through the use of embryonic or fetal tissues.

The Legal position of the Good Samaritan

by S. Schwartz. Ottawa : Emergency Preparedness Canada, 1987. 73 p. Bibliogr.
MICROLOG 93-00288 1 fiche

This document discusses the good samaritan and the common law and statutory modifications of the common law. It also looks at the common law rule, qualifications to the common law rule, and legislative reform for the United Kingdom, Australia, and the Commonwealth. It also looks at civil law jurisdiction for Quebec focusing on the duty to render assistance, liability for breach of duty to render assistance, and rights of the good samaritan. In addition, it looks at the law relating to the good samaritan in Europe. Finally, it presents proposals for reform.

A Legal rights handbook for abused woman

Fredericton . Public Legal Education and Information Service of New Brunswick, 1992. 38, 38 p. *Bilingual (Guide des droits des...).*
ISBN 1-55048-975-5
MICROLOG 93-03915 1 fiche

This document provides information about the law, not only for women who are being abused by a husband or boyfriend, but for those individuals in the helping professions and volunteers who work with abused women. It discusses what to do when things go bad at home, the cycle of violence, and what to do in times of crisis. It also presents information on exclusive possession orders; peace bonds and restraining orders, arrest, charge and trial; and compensation for victims. It looks at separation, divorce, and custody, as well as support and financial matters. Finally, it presents information on services for victims of family violence.

Leishmaniasis Control Strategies : a critical evaluation of IDRC-supported research : proceedings

edited by Pandu Wijeyaratne, Tracey Goodman and Carlos Espinal. Ottawa : International Development Research Centre, 1992. x, 380 p. : ill., maps. Bibliogr. (Manuscript report ; 322e) ISBN 0-88936-653-5
MICROLOG 93-02050 5 fiche (Available on fiche only)

Leishmaniasis is considered to be a disease of the poor, and it certainly has been shown to be a major obstacle to development in endemic countries. The papers included in this report introduce general topics related to control strategies such as the need for an interdisciplinary view of endemic diseases, the use of ecological and environmental methods, community participation, and health policy and delivery services for leishmaniasis. In each case, it stresses the importance of policy implementation as a key factor for control, particularly with respect to the mobilization of financial and human resources.

Leisure : a key to community integration

presented by Burt Perrin ; with the assistance of Kate Wiele, Sheila Wilder, Judith McGill ; to Services for Disabled Persons Branch, Ontario Ministry of Community and Social Services. Toronto : Burt Perrin Associates, 1989. ix, 67 p. Bibliogr. *French ed. (Les Loisirs : une rêponse à...) : 93-00193/2.*
MICROLOG 93-00194 1 fiche

The purpose of this study was to document the need and context for leisure for persons with disabilities, and to present a plan for action. The report presents a proposed vision for the future of leisure for persons with disabilities, as well as what is needed in order to turn this vision into a reality. It identifies primary roles and responsibilities regarding leisure services for persons with disabilities--for the Ministry of Tourism and Recreation and its community clients, and for the Ministry of Community and Social Services (MCSS). It also identifies some initial steps for MCSS to take in order to move toward the recommended vision.

Lender liability for contaminated sites : issues for lenders and investors

Ernst and Young (Firm). Ottawa : National Round Table on the Environment and the Economy ; Institute for Research on Public Policy, 1993. 48 p. (Working paper ; no. 3) *At head of title: Sustainability and prosperity program.*
MICROLOG 93-06383 1 fiche

This paper reviews the nature of the issues of lender liability and its linkage to environmental and economic objectives and highlights the ways in which the status quo is inadequate in addressing these environmental and economic objectives. It presents a series of principles for public policy in this area, and uses a range of cases to illustrate how these principles create conflicting choices for policy makers. Finally, it outlines the next steps that could be undertaken to progress towards consensus among the divergent interests involved and promote sound policy-making.

Leopold-Maddock equations for North Saskatchewan River water quality study, Edmonton-Saskatchewan border

prepared by C. Ray, K. Dykema ; submitted by M.E. Quazi. Edmonton : Alberta Environment, 1991. 82 p. : ill.
MICROLOG 93-02120 1 fiche

There is particular concern about the effects of effluent discharge on the water quality of the North Saskatchewan River from the City of Edmonton to the Saskatchewan border. To assess the impact of existing effluent discharges and determine the impact of future effluent discharges, several water quality models were used, all of which rely on a description of river hydraulics by using Leopold-Maddocks equations. This report performed field surveys to determine the geometric characteristics of nine reaches along the North Saskatchewan River and the hydraulic characteristics under ice cover conditions and open water conditions, and develop Leopold-Maddocks equations for the nine reaches under both open water and ice cover conditions.

Lester B. Pearson International Airport delay measurement system : methodology development

Aviation Research Corporation. Ottawa : Transport Canada, Policy and Coordination, Transportation Development Centre, 1992. xx, 267 p. : ill.
MICROLOG 93-06405 3 fiche

Project to develop a methodology for determining the magnitude and sources of delays at Canadian airports in general and at Lester B. Pearson International Airport (LBPIA) in particular. This involved developing a logical data base of all relevant data about aircraft movement at LBPIA from air traffic services, air carriers, voice tapes of communications between pilot and air controller, and other data generated from ARC sources or organizations such as ICAO. The decoding of the voice tapes involved the use of a proprietary, human-operated speech component recognition software that ran in parallel with the playback of the tapes. This report describes the data sources and the detailed data analysis and development of appropriate prototype algorithms.

Level change system for federally subsidized vessel, phase II : design and installation, phase III : evaluation

prepared for Transportation Development Centre, Policy and Coordination Group, and Marine Policy and Programs, Transport Canada ; by W.R. Davis Engineering Limited, German and Milne, and Behavioural Team. Ottawa : Davis, 1992. xi, 234 p. : ill.
MICROLOG 93-01464 4 fiche

This report documents the work performed under Phase II and III of the project. In Phase I, a federally subsidized ferry service on the East Coast was evaluated for accessibility to disabled and elderly persons and concepts for a level change system were developed for boarding and between deck transfers. Based on this work, an on-board level change system was designed for installation on the MV PRINCE EDWARD and submitted for approvals to the Canadian Coast Guard and Lloyd's Register of Shipping. After receiving approval, the system was manufactured, installed, tested and commissioned. Once the level change system was put into operation, an evaluation program was implemented to determine passenger and crew acceptance and to identify any safety concerns and improvement possibilities. Both passengers and attendants provided feedback and the National Transportation Agency of Canada also evaluated the system.

The LG 2A powerhouse : evolution of the design with respect to the LG 2 powerhouse

by A. Mérand...et al. Montreal : Canadian Electrical Association, Engineering and Operating Division, Hydraulic Power Section, 1991. 31 p. : ill. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06056 1 fiche

This paper presents the principal aspects of the underground complex of the LG 2A development. The criteria used to establish the general arrangement of the power plant and to define the principal electrical and mechanical systems are described. The power plant, in general, is similar to LG 2 which shares the same forebay. The differences between the two installations reflect operating experience gained since commissioning of LG 2 and the evolution of technology over the period. This paper highlights these differences and analyzes the principal factors leading to the evolution.

LG2A turbine-generator units : evolution in design, manufacture and installation

by B. Mahé and J.-G. Miron. Montreal : Canadian Electrical Association, Engineering and Operating Division, Hydraulic Power Section, 1991. 32 p. : ill. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06057 1 fiche

Even though the output of the LG2A units is identical to those of LG2, and the operating heads are very similar, the speed of rotation chosen for LG2A is three steps faster. This, combined with a more favorable setting, allowed us to design somewhat smaller units without affecting their characteristics which, to the contrary, have benefitted from technical developments that have taken place since 1975. An analysis of the main machine characteristics and components allows us to quantify the improvements made and to show the technical evolution.

Le 2 janvier 1988, le premier ministre Mulroney et le président Reagan ont signé l'Accord de libre-échange entre le Canada et les Etats-Unis, qui éliminera pratiquement tous les droits de douane entre les deux pays d'ici à dix ans. Ce document se penche précisément sur la question du libre-échange Canada-Etats-Unis. Il examine précisément les points suivants: les échanges commerciaux entre le Canada et les Etats-Unis; les enjeux de l'Accord de libre-échange Canada-Etats-Unis; la mise en oeuvre; et, les mesures parlementaires.

Licensing assessment of Mineral Sciences Laboratories technologies

Turnbull Engineers Inc. Vancouver, B.C. : The Corporation, 1992. 48 p. *CANMET contract: 23440-1-9115-01-SQ*
MICROLOG 93-01569 1 fiche

A total of 28 technologies, including eight patents, 12 patent applications and eight business opportunity documents, were assessed as to marketability and licensing potential. Because of the lack of information on most of the technologies it was not possible to conduct an in-depth assessment. Therefore all were reviewed and recommendations were made as to which to pursue. This report includes a summary of the recommendations and an action plan for each technology.

The Lichens of southern Ontario, Canada

by P.Y. Wong and I.M. Brodo. Ottawa : Canadian Museum of Nature, 1992. 79 p. Bibliogr. (Syllogeus ; no. 69) ISSN 0704-576X ISBN 0-660-13064-5
MICROLOG 93-00656 1 fiche

This guide records the frequency, habitat, substrate, and counties of occurrence for each taxon, including taxonomic comments for many. Keys to species of some genera are also included. Field work was carried out over the past 20 years, with about 3,900 specimens collected. Another 1,800 specimens deposited in either the National Herbarium of Canada or the University of Toronto were also examined and verified. Southern Ontario is defined as the area lying to the south of Algonquin Park and the major part of the Canadian Shield, and includes the southwestern peninsular area bounded by the Great Lakes together with the lowland between the Ottawa and St. Lawrence Rivers.

Les Liens entre les échanges commerciaux, la productivité et les coûts

par P.S. Rao et T. Lemprière. Ottawa : Conseil économique du Canada, 1992. xi, 152 p. : ill. Bibliogr. (Document de travail ; no 46) *L'éd. anglaise (An Analysis of the linkages...) : 93-00125/2. CSI 22215.272F.*
ISSN 1180-3495
MICROLOG 93-00124 2 fiche

Dans cette étude, on analyse les liens existant entre la productivité, les coûts et les échanges commerciaux au Canada. L'analyse commence par un bref résumé des tendances récentes des flux des importations et des exportations, auquel fait suite à un examen des facteurs qui influencent théoriquement les profils et les flux des échanges commerciaux du Canada. On présente ensuite une estimation économétrique des échanges commerciaux (importations et exportations) avec les Etats-Unis, le Japon, la Communauté européenne et les nouveaux pays industrialisés d'Asie.

Lieu historique national du phare de Pointe-au-Père : étude sur les visiteurs et leurs besoins

Urbanex, Roche ltée ; en collaboration avec Impact, recherche. Ottawa : Environnement Canada, Service canadien des parcs, 1993. 77 p. : ill.
MICROLOG 93-07609 1 fiche

La Section politiques et recherche a réalisé à l'été 1992 une enquête auprès des visiteurs du lieu historique national du Phare-de-Pointe-au-Père puis a confié à la division Urbanex du groupe-conseil Roche la tâche d'analyser les résultats de cette enquête. Le mandat consiste à dresser un profil de la clientèle actuelle, caractériser les segments de clientèle et définir les besoins de la clientèle. Ce document se divise en trois parties. La première partie porte sur les éléments méthodologiques de l'enquête; elle en précise les objectifs, la portée et l'organisation et évalue la représentativité de l'échantillon. La seconde partie présente les résultats de l'enquête; les résultats sont regroupés sous cinq thèmes qui sont les caractéristiques socio-démographiques des visiteurs, les caractéristiques de voyage, les caractéristiques des visites, l'appréciation des visiteurs et les caractéristiques des segments de clientèle. Finalement, la troisième partie dresse un bilan et énonce des recommandations relatives à la mise en valeur et la mise en marché du site.

LIFAC demonstration at Poplar River Power Station

by M.E. Ball and T. Enwald. Montreal : Canadian Electrical Association, Engineering and Operating Division, Thermal and Nuclear Power Section, Environmental Requirements Subsection, 1991. 16 p. : ill. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06242 1 fiche

A full scale demonstration unit of Tampella's LIFAC flue gas desulfurization process was tested at SaskPower's Poplar River Power Station Unit 1. The LIFAC process is a combination of limestone injection into the furnace and post-furnace humidification of the flue gas to reactivate the sorbent as it leaves the air heaters. A description is presented of the two stages of the LIFAC process. Parametric testing was conducted to evaluate the sulphur dioxide removal performance of the process. A 1500 hour operability test was performed to assess impacts on the power plant's operation. Capital and operating costs of the LIFAC process were evaluated based on the demonstration unit's costs.

Lifelong learning for the 21st century : a report on the future development of adult/continuing education in British Columbia

by R. Faris. Victoria : Ministry of Education ; Ministry of Advanced Education, Training and Technology, 1992. ii, 54 p. Bibliogr.
MICROLOG 93-01216 1 fiche

The objective of this study is to make recommendations regarding the policy framework and delivery of adult/continuing education in British Columbia. It accomplishes this by analyzing good practice at the international and national level and taking into account the historic context of adult education development in British Columbia. It provides recommendations in four areas: the creation of a provincial lifelong learning framework; greater equity and access; guaranteeing quality programs and services for adult learners; and recommendations to enable more systematic response to community needs.

Light emitting diode warning signal for highway-railway grade crossings : prototype development

prepared for the Transportation Development Centre, Transport Canada ; by J.D.E. Wong and S.W. Taylor. Ottawa : Davis, 1987. xvi, 139 p. : ill. Bibliogr.
MICROLOG 93-08473 2 fiche

This report documents the development of five types of LED- based signal systems for grade level crossing protection. Photometric and electrical tests were performed to characterize each type of system and the most promising were produced in sufficient quantity to assemble a grade crossing mock-up for demonstration purposes. Experiments were conducted at Carleton University to assess detectability and reaction times for various signal modulation rates and luminance levels. As of September 1987, the LED systems do not provide luminance levels comparable to those available with incandescent signals. Reasons for this deficiency are detailed.

Limnology of Figure Eight Lake in 1988 : effects of 1986 and 1987 : lime treatments on water quality

by T.P. Murphy, E.E. Prepas and J. Babin. Burlington, Ont. : Canada Centre for Inland Waters, National Water Research Institute, 1991. 28 p. : ill. Bibliogr. (NWRI contribution ; 91-13)
MICROLOG 93-07474 1 fiche

Figure Eight Lake is a naturally productive lake in the northern prairies of Alberta. Lime (calcium carbonate or calcium hydroxide) was applied to the surface of the lake a total of four times during the summers of 1986 and 1987. This paper discusses the effects of this liming on phosphorus and oxygen concentration, algal biomass and fish.

Linear or nonlinear utility functions in logit models? The impact on German high speed rail demand forecasts

by B. Mandel, M.J.I. Gaudry and W. Rothengatter. Montreal : Université de Montréal, Centre de recherche sur les transports, 1992. iii, 15 p. : ill. Bibliogr. (Publication ; no. 837) (Cahier de recherche ; 9214)
MICROLOG 93-01801 1 fiche

This paper shows that nonlinearity of the representative utility functions of the logit model applied to an intercity mode choice model implied the presence of asymmetry and of thresholds in the response curve, as well as results that had more reasonable properties (diminishing marginal values of time savings, elasticities and values of time that differed among the modes). It also yielded very different high speed rail market shares for Germany than results obtained with the usual linear utility functions.

Linen flax project, phase I : final report

by S. Risk. Regina : Saskatchewan Agriculture Development Fund, 1989. 4 p. Bibliogr.
MICROLOG 93-02405 1 fiche

The linen flax project was undertaken as part of an attempt to diversify the farm economy. The project began in 1988 with four farmers growing linen flax to the test the quality of a Saskatchewan crop, after which the fibre would be tested in the laboratory or manually. This report presents the results from phase I, in which the flax grown was processed into woven products. Techniques and equipment for processing was evaluated and the active participation of weavers and spinners was encouraged

Linking affordable housing and environmental protection : the community land trust as a sustainable urban development institution

by M. Roseland. Winnipeg : University of Winnipeg, Institute of Urban Studies, 1992. 19 p. Bibliogr. *In* Canadian Journal of Urban Research : *1:2, December, 1992.*
MICROLOG 93-05773 1 fiche (Available on fiche only)

Affordable housing and environmental protection are generally considered to be completely separate problems to be addressed by completely separate organizations employing completely separate strategies. Not surprisingly, these strategies are rarely mutually reinforcing: at times they can even be in conflict. This paper examines sustainable development and its implications for North American communities; explores links between affordable housing and environmental protection within the context of sustainable urban development; and suggests an institution to enable sustainable urban development in Canada.

Liquefaction of uranium tailings

Acres International Limited. Ottawa : Atomic Energy Control Board, 1992. vii, 61 p. : ill. Bibliogr. (Research report ; INFO-0409)
MICROLOG 93-07487 1 fiche

Tailings from uranium mining in Elliot Lake, Ontario are pumped via pipelines to natural basins and are retained by engineered earth dams at the mouths of the basins. The stability of these tailings in the event of an earthquake is an important issue in planning the proper long-term management of the waste. This report first reviews the literature on total stress and effective stress analysis, presenting basic analysis algorithms and available computer programs, then describes improvements in the state of practice of both total stress and effective stress analysis. These are implemented into two new computer programs, then applied to the analysis of the tailings disposal area at the Quirke Mine.

Liquid Waste Management Plan, stage 1 : Greater Vancouver Regional District

Greater Vancouver (B.C.). Water Quality and Water Use Committee. Vancouver, B.C. : The Committee, 1988. xvi, 183 p. . maps. Bibliogr. *Cover title: Greater Vancouver Liquid Waste Management Plan, stage 1.*
MICROLOG 93-07914 3 fiche

This study is one element of the Stage 1 Liquid Waste Management Plan for the Greater Vancouver Sewerage and Drainage District. The purpose of the report is threefold, namely to identify insofar as is possible the existing condition of the wastewater receiving environment and how designated uses are affected; issues and priorities within the region's receiving environment; and the nature and scope of additional information which is necessary to assess the impact of wastewater discharges and the scope of wastewater management programs. The B.C. Ministry of Environment and Parks have embarked on a program of evaluating the suitability of waterbodies to support designated uses by establishing provisional water quality objectives. These objectives are necessary to the liquid waste management planning process, and the district supports the development of objectives which are acceptable to all agencies.

Greater Vancouver (B.C.). Sewage Treatment Upgrading and Sludge Disposal Committee. Vancouver, B.C. . The Committee, 1988. xxvii, 301 p. : ill., maps. Bibliogr. *Cover title: Greater Vancouver Liquid Waste Management Plan, stage 1.*
MICROLOG 93-07912 4 fiche

The report reviews a spectrum of wastewater and sludge treatment methods to ensure full consideration of present-day technology and costs should treatment plant upgrading be required at any of the District's treatment plants. This is followed by an evaluation of environmental conditions at each of the District's four major wastewater treatment plant outfall areas based on limited information contained in study reports prepared during the past two decades. Using wastewater plume dilution models, estimates were made of the impact of the treatment plant discharges on the receiving water quality at the respective outfall sites, for both the present time and 50 years into the future. Water quality impact estimates were made for both primary and secondary levels of treatment, and in some cases, relative to an improved outfall diffuser design.

Vancouver, B.C. : Greater Vancouver Regional District, 1989. xvi, 153 p. : ill., maps. Bibliogr. *Cover title: Greater Vancouver Liquid Waste Management Plan, stage 1.*
MICROLOG 93-07909 2 fiche

The purpose of the Liquid Waste Management Plan (LWMP) is twofold. First, to determine how well existing sewerage facilities can handle existing and future sanitary flows. Second, to find the most environmentally acceptable, and cost effective ways to dispose of Greater Vancouver's liquid wastes. This, the first stage in the LWMP process has used only existing information to address a variety of waste management issues. A Steering Committee advised the GVS and DD on direction of stage 1, while four Technical Committees studied and advised on specialized technical subjects namely: water quality/water use; combined sewer overflows and urban runoff; sewage treatment plant upgrading and sludge disposal; and source control.

Liste des espèces de la faune vertébrée susceptibles d'être désignées menacées ou vulnérables

par H. Beaulieu. Québec : Gouvernement du Québec, Ministère du loisir, de la chasse et de la pêche, 1992. vii, 107 p. : cartes géogr. Bibliogr. ISBN 2-550-27104-1
MICROLOG 93-07638 2 fiche

Ce document démontre l'intérêt et l'importance de faire connaître ces espèces en regard des dispositions législatives applicables. Les critères utilisés pour la sélection des espèces sont présentés. Un portrait de chaque espèce qui a été retenue est dressé et accompagné d'une représentation cartographique de sa répartition nord-américaine. Le document présente d'abord les définitions d'espèce menacée et d'espèce vulnérable et explique l'intérêt et l'importance de faire connaître les espèces de la faune vertébrée susceptibles d'être désignées menacées ou vulnérables. Enfin, les critères considérés pour sélectionner les espèces fauniques sont discutés. Le document dresse également le portrait des espèces retenues selon chacune des classes de vertébrés. Une attention particulière a été portée au type de répartition de chacune de ces espèces représentée sur le continent nord-américain, aux populations (fréquence, abondance) et à leur tendance au Québec de même qu'aux facteurs limitatifs responsables de leur précarité. Enfin, la problématique générale des espèces jugées préoccupantes de même que les contraintes vécues et les constats faits au cours de cet exercice seront soulevés afin de favoriser la compréhension et de justifier la sélection établie.

Listening to Albertans at risk of HIV/AIDS : an assessment of risk reduction messages

Alberta Management Group. Edmonton : Alberta Health, Public Health Division, Provincial AIDS Program, 1992. x, 118 p. : ill. Bibliogr. *CSI 35304.200.* ISBN 0-7732-1031-8
MICROLOG 93-01354 2 fiche

The Provincial AIDS Program commissioned this study in order to learn which approaches are considered effective in helping those at risk to choose safer behaviours. The objectives of the study were to determine the extent to which risk reduction messages have been received by those who are or have been at risk of becoming infected with HIV or spreading the infection to others; the nature and sources of messages that have been received; the perceived effectiveness of value of those messages in terms of assisting persons who have or have had risky behaviours to practice safer behaviours; and the factors, where known, which lead to change in behaviour or the adoption of safer behaviour. This document presents the study findings.

Literacy needs assessment for the Beausoleil First Nation

by L.M. Bell and J. Fraser. Guelph, Ont. : Ontario Union of Indians, 1992. 18 p. : ill. *ONTERIS: ON06156.*
MICROLOG 93-07255 1 fiche

This research identifies the literacy needs of the Beausoleil first nation. 51 adults responded to a questionnaire designed to determine the profile of the potential student population. Their educational background was primarily grade 10 and they required senior credits. Questionnaires and reading tests for vocabulary and comprehension reflected the need for literacy training in English, mathematics and computer studies. As a result of the interest shown by the students, the Simcoe County Board of Education Summer School opened on July 6, 1992 with English and mathematics courses. Students felt they experienced personal growth and many expressed the wish to continue. Mathematics and English courses were available the following fall. Assessment of technical education needs was suggested.

Lithostratigraphic revisions of the upper Carboniferous to lower Permian strata in the Cumberland Basin, Nova Scotia and the regional implications for the Maritimes Basin in Atlantic Canada

by R.J. Ryan, R.C. Boehner and J.H. Calder. Halifax : Dept. of Mines and Energy, Mineral Resources Division, 1991. 26 p. : ill., maps. Bibliogr. (Contribution series ; 91-010) *In* Bulletin of Canadian Petroleum Geology *: vol. 39, no. 4, 1991.*
MICROLOG 93-06727 1 fiche

The Late Paleozoic strata exposed in the Cumberland Basin, part of the larger regional Maritimes Basin of Atlantic Canada, have been considered as classic carboniferous sections since their original description in the mid 1800's. New lithostratigraphic subdivisions are introduced at the formation level for previously undivided or informally divided Upper Carboniferous strata, and these new and existing formations are assigned to a revised and coherent framework of groups. These refinements are necessary in order to build a modern lithostratigraphic nomenclature based on formations with a system of groups which can simplify regional correlations of laterally extensive packages of related rock units within the Maritimes Basin.

Lobster holding and handling system

by G. Scott. S.l. : Canada/Nova Scotia Economic Regional Development Agreement, Fisheries Subagreement, 1987. 8 p. : ill. (ERDA report ; no. 2) ISBN 0-88871-168-9
MICROLOG 93-04411 1 fiche

The conventional method of holding live lobsters is to place them in a tidal pound or a storage tank system, but that method produces losses of 3-15 percent with average shrinkage of 5-8 percent being considered normal. This project was conducted to determine if holding lobsters individually in a cage system would be commercially viable for small to medium-sized operators. The proposed system should also permit easy size grading, increase the length of the storage period, and increase the concentration of lobsters per cubic foot of storage volume. The trial period extended from late November 1985 to July 1986.

Local government elections legislation : a discussion paper

Victoria : Ministry of Municipal Affairs, Recreation and Housing, 1992. 47 p. ISBN 0-7726-1642-6
MICROLOG 93-00800 1 fiche

This paper is about changing the legislation on local government elections to bring them into the 1990s. It outlines proposals for change that will revise, clarify, and add to parts 2 and 3 of the Municipal Act; flags the options for other changes; discusses some important campaign issues for the 1990s, for which specific proposals have not been developed; and invites comments.

Local government, meeting challenges today to prepare for tomorrow : Municipal Act and related statutes review : discussion document

Winnipeg : Manitoba Rural Development, 1993. iii, 52 p. *French ed. (Administration locale, relever les défis aujourd'hui...) : 93-08895/1.*
MICROLOG 93-08896 1 fiche

This paper is intended to stimulate and focus discussion on issues of concern and interest as part of an in-depth examination of municipal legislation and a consideration of service delivery issues. The review process and panel are described. Seven issue areas are then presented with an introduction on each and subsections which are discussed in the context of the current situation. Examples illustrate how local governments may be affected. Concerns and questions are raised for consideration about each subsection. The issues covered concern municipal rights and provincial approvals, the structure of municipalities, elections and accountability of municipal councils, council practices and proceedings, municipal finance, legal proceedings, and local service delivery.

Local health area statistical profiles for British Columbia

by C.L. Nicholls, K.K. Ho and L.T. Foster. Victoria : Ministry of Health and Ministry Responsible for Seniors, 1992. v, 501 p. : maps. Bibliogr. *CSI 37134.200.* ISBN 0-7726-1588-8
MICROLOG 93-01060 6 fiche

This purpose of this publication is to provide selected information on health status, health risk factors, and the use of health services by community. These community statistical profiles will help inform communities about local health issues and can be used by local health service providers, planners, educators, researchers, and the general public. It provides information that will assist communities and local organizations in identifying their own health priorities and challenges. It provides a list of communities by local health area.

Locomotive diesel engine cylinder liner coatings, phase I : evaluation of thermally sprayed coatings

prepared for Transportation Development Centre, Policy and Coordination Group, Transport Canada ; by K.N. Tandon...et al. Winnipeg : University of Manitoba, Dept. of Mechanical Engineering, 1991. xii, 72 p. : ill. Bibliogr
MICROLOG 93-02877 1 fiche

Wear of the internal surfaces of a liner in a diesel locomotive engine is of concern because it eventually must be replaced using hard chrome plating, a process that uses hazardous chemicals. This project applied various coatings such as thermally sprayed metal or ceramics onto the wall surface of the liners and evaluated the adhesion, porosity and wear of these coatings. The coated liners were then tested in an experimental diesel engine to determine the performance of the new coatings and to compare them with the conventional hard chrome plating.

Log-handling impacts on estuarine environments : an analysis of the Campbell River estuary, B.C.

by M.E. Hagen. Hull, Que. : Canadian Environmental Assessment Research Council, 1987. viii, 66 p. : ill. Bibliogr. (Manuscript report ; MR13-87)
MICROLOG 93-06019 1 fiche

The focus of this report is log handling impacts on estuarine salmon resources. Four assessment categories are identified representing types of information needed to properly assess the impacts of log handling in estuaries: the value of estuaries to log handling; the physical and chemical impacts of log handling, the importance of estuaries to salmon, and the actual direct and indirect impacts of log handling on salmon and salmon habitats. These issues are addressed in a case study of the Campbell River estuary.

Logical encoding of conceptual graph type lattices

by V. Dahl and A. Fall. Burnaby, B.C. : Simon Fraser University, Centre for Systems Science ; Laboratory for Computer and Communications Research, 1993. 11 p. Bibliogr. (Technical report ; CSS/LCCR TR93-04)
MICROLOG 93-08839 1 fiche (Available on fiche only)

Recent research on computational linguistics and knowledge representation has produced efficent ways of encoding formalisms such as system networks and description spaces. These formalisms, which on the surface appear quite distinct, have recently been shown to have equivalent expressiveness. This article presents some preliminary definitions, and discusses type lattices viewed as a special case of description spaces, encoding type lattices through logic terms, and unification-based representations of conceptual graphs.

Loi sur la réforme du droit : un commentaire

Fredericton : Cabinet du Procureur général, Direction de la réforme du droit, 1993. 53, 45 p. *Bilingue (Commentary on the Law Reform Act).*
MICROLOG 93-06778 2 fiche

Le dépôt du projet de loi 60 constituait la première étape du processus de consultation sur la Loi sur la réforme du droit proposée. Ce commentaire constitue la 2e étape. Le projet traite de plusieurs règles de common law à l'égard desquelles la Division de la réforme du droit a recommandé qu'une attention particulière soit portée au niveau législatif. Une telle loi permettrait de regrouper diverses mesures législatives qui ne peuvent se rapporter à d'autres lois existantes et permettrait aux avocats de suivre plus facilement les changements. Elle donnerait aussi une forme permanente aux lois non publiées qui peuvent s'avérer difficiles à trouver. Ce document se penche sur les questions suivantes: l'action *per quod servitium amisit*; la responsabilité des occupants; les dommages-intérêts; le lien contractuel; la rupture de contrat contributive; les clauses pénales; et la rescision de contrats exécutés.

La Loi sur les agressions sexuelles au Canada, une évaluation : étude de la jurisprudence en matière d'agression sexuelle de 1985 à 1988

Ottawa : Ministère de la justice, Section des programmes et de la recherche, 1992. viii, 92 p. Bibliogr. (Rapport ; no 6) *L'éd. anglaise (Sexual assault legislation...) : 93-04242/2.* ISSN 0839-444X ISBN 0-662-97371-2
MICROLOG 93-04300 2 fiche

La Section de la recherche du ministère de la Justice du Canada a commandé des études pour apprécier les répercussions de la nouvelle loi sur les agressions sexuelles entrée en vigueur en janvier 1983. Ce rapport a un double objet: d'abord passer en revue les décisions rendues par les tribunaux entre mai 1985 et avril 1988, et ensuite, voir comment les tribunaux ont interprété la loi afin d'y relever une toute nouvelle tendance dans leurs prises de décisions. Il fait suite au rapport no 2, intitulé 'Les nouvelles infractions en matière d'agression sexuelle : questions juridiques d'actualité'. On trouvera, à l'annexe 3, la liste complète des études du ministère de la Justice sur les agressions sexuelles.

Long range contamination and transport of toxic organic chemicals in the St. Lawrence, Fraser and Mackenzie rivers of Canada

by R.J. Allan. Burlington, Ont. : Canada Centre for Inland Waters, National Water Research Institute, 1990. 13 p. : ill. Bibliogr. (NWRI contribution ; 91-17) *Paper presented at the symposium 'Gestion environnementale des eaux continentales'.*
MICROLOG 93-07481 1 fiche

Many of Canada's largest rivers in terms of discharge and drainage basin area, are contaminated by toxic organic chemicals. This paper overviews some of the results obtained over the last decade as they relate to two aspects of contamination of large rivers by toxic organic chemicals: forms and degree of long-range transport. Specific chemicals are used as examples in specific river systems: polychlorinated biphenyls, lindane and mirex in the Niagara-St. Lawrence; chlorinated guaiacols in the Fraser; and polycyclic aromatic hydrocarbons in the Mackenzie Rivers.

Long term fate and persistence of stranded oil from the BIOS Project, N.W.T., Canada and from the Metula spill, Tierra del Fuego, Chile, 1987 results

by E.H. Owens and B. Humphrey. Ottawa : Environment Canada, Environmental Protection Directorate, River Road Environmental Technology Centre, 1988. xi, 109 p. : ill., maps. Bibliogr. (Report ; EE-107)
MICROLOG 93-08976 2 fiche

This study makes observations of collected data on stranded oil. The field investigation involved the resampling and resurveying of oiled control and countermeasure plots at two sites. Samples of contaminated sediments were collected systematically in order to provide a data set that would be comparable with previous field studies at these sites. The samples were later analyzed chemically to determine total extractable hydrocarbon concentrations and to evaluate the degree to which the oil had been weathered. The results are presented.

Lot drainage characteristics study : clay till soils

CH2M Hill Engineering Ltd. Edmonton : Alberta Municipal Affairs, Housing Division, 1992. viii, 157 p. : ill., maps. Bibliogr. ISBN 0-88654-380-0
MICROLOG 93-04352 2 fiche

Foundation drain systems around residential basements contribute significant flow into the sanitary sewers to which they are connected, causing extra capital and operating costs for collection and treatment facilities. This project determined to what extent different lot drainage characteristics affect foundation drain flow in clay till soils. A test facility was constructed in Strathcona County in fall 1990 and factors such as lot grading, backfill practice, ground covers, and roof leader discharge locations were monitored. The facility's foundation drains, sump pump installations, and site instrumentation were designed to carry out lot drainage characteristics testing.

Lower Notch GS stabilizer tests

by G.R. Bérubé. Toronto : Ontario Hydro, Research Division, 1992. 27 p. : ill. Bibliogr. (Report ; no. 92-162-K)
MICROLOG 93-02914 1 fiche

On Saturday, May 2, 1992, unit G1 at Lower Notch GS experienced dynamic instability when loaded to a real power output corresponding to 100 percent gate opening. Investigations revealed that the speed probes on unit G2 were faulty, and that the unit G1 stabilizer was being automatically removed from service at gate positions approaching 100 percent. The necessary repairs and adjustments were made, and tests were performed to confirm correct operation. Based on this event, a number of recommendations have been made regarding the maintenance of the stabilizers and associated equipment at this and similar stations.

La Lutte contre les vertébrés nuisibles dans les musées

par T.J.K. Strang et J.E. Dawson. Ottawa . Institut canadien de conservation, 1991. 11, 9 p. Bibliogr. (Bulletin technique ; no 13) *Bilingue (Controlling vertebrate pests...)*
ISSN 0706-4152 ISBN 0-662-54950-3
MICROLOG 93-05867 1 fiche

Ce bulletin porte sur la lutte contre les vertébrés nuisibles dans les musées et met l'accent sur les vertébrés nuisibles qui sont le plus susceptibles de se trouver dans les musées canadiens, à savoir les rongeurs (rats, souris et écureuils), les oiseaux (pigeons, étourneaux et moineaux) et les chauves-souris, mais les lignes directrices qui y sont données pour combattre ces animaux peuvent tout aussi bien s'appliquer à d'autres espèces. On y examine particulièrement des points tels que la façon de reconnaître la présence des espèces, les méthodes de lutte chimiques et non chimiques, et les fournisseurs de produits et de matériaux.

Mackenzie River water level forecast : Annual report 1991

by P. Squires. Vancouver, B.C. : Environment Canada, Conservation and Protection, Inland Waters Directorate, Western and Northern Region, 1992. iv, 31 p. : ill. *Prepared for the Western Arctic Athabasca-Mackenzie Workshop. CSI 22539.002.*
MICROLOG 93-02667 1 fiche

The Mackenzie River stage forecast is a daily open water public report of the projected one, two and three day water level (or stage) at selected points along the Mackenzie River in the Northwest Territories. The report includes the current daily stage at hydrometric station locations on the Mackenzie, Liard and Peel Rivers and a summary of weather conditions over the basin. During periods of high stage, additional reports are prepared on an as-required basis, and summary plots of the daily stage at important points and ferry crossings are prepared and released on a weekly basis. This report describes the activities during the 1991 season, the hydrometric observation network, forecast users, weather reports, the costs of the 1991 program, new initiatives in 1991, the accuracy of the forecast and proposed improvements for the 1992 season.

Magnetic fields in a residential neighbourhood by network analysis and field calculation

by D.L. Mader. Toronto : Ontario Hydro, Research Division, 1992. 32 p. : ill. Bibliogr. (Report ; no. 91-281-K)
MICROLOG 93-03021 1 fiche

Interest in the subject of possible health effects from exposure to magnetic fields produced by 60 Hz electric power has prompted detailed studies on the nature of the sources of these fields, with special attention to those in the home. This study includes power lines (transmission and distribution) and building wiring (grounding circuit) in an unified model, but does not include appliances. A magnetic-field research facility was used for validation of a method to compute 60 Hz magnetic fields in a residential neighbourhood. Network analysis is used to solve for currents in a mathematical model of the electric power distribution system, including grounding conductors and metallic water supply pipes. Magnetic fields are then calculated using the currents and locations of all conductors.

Mail order and catalogue selling : direct marketing information sources

Ottawa . Industry, Science and Technology Canada, Service and Construction Industries Branch, Distribution Services Industries Directorate, 1992. 27 p. *French ed. (La Vente par correspondance...) on the same fiche.* ISBN 0-662-20145-0
MICROLOG 93-07323 1 fiche

Direct marketing refers to all of the activities connected with a seller transferring some kind of good, service or information to a buyer. It includes the use of controlled communications by some kind of media (mail, telephone, etc.) to reach a specific audience (those most likey to respond). One of the major types of direct marketing is mail order/catalogue selling, which is used to generate both consumer and business-to-business sales. This document assists those interested in mail order/catalogue selling. Identifies sources of information in a variety of areas and focuses on Canadian association and print information sources, although some American sources are also listed. This publication is not all inclusive because the direct marketing industry is changing rapidly and new sources of information appear daily.

Main steam lines : quenching and related distortions

by J.S. Mandke. Montreal : Canadian Electrical Association, Thermal and Nuclear Section, Research and Development Subsection, 1992. 15 p. : ill. Bibliogr. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06232 1 fiche

A survey of the North American power industry was conducted to gather information about experiences in fossil fuel-fired power stations with thermal quenching of main steam piping. Thermal quenching occurs during forced cool-down of the boiler for emergency repairs or during emergency shutdown, and can lead to excessive pipe bending, damage to pipe hangers, permanent distortion of steam lines, and steam line cracking. Information about the corrective actions taken was acquired, including pipe repairs, design modifications, operational changes, and new monitoring methods. Additional testing and evaluation is being conducted to produce comprehensive guidelines in order to control thermal quenching events and their effects. A compilation of the industry survey results and an update on the testing and evaluation programs on the pipe quenching problem are presented.

Maintenance experience of one heavy-haul railway using 120-ton cars -- Rev.

prepared for Association of American Railroads ; by G.W. English, A.B. Hazell [and] J.O Igwemezie. Kingston, Ont. : Queen's University, Canadian Institute of Guided Ground Transport, 1991. iii, 21 p. : ill (CIGGT report , no. 90-15) ISBN 0-88911-097-2
MICROLOG 93-06588 1 fiche (Available on fiche only)

North American railways are evaluating the economics of increasing car capacity from a nominal 100 tons to 125 tons. The Quebec Cartier Mining Railway (QCM) and the Labrador Railway (QNS&L) operate under similar conditions on the north shore of the St Lawrence River using 100-ton cars exclusively, although records show the QNS&L railway used a mix of 100, 110, and 120 ton cars on its southern segment from 1973-82. This report compares the operation of QCM and QNS&L, particularly tie maintenance, and the rail defect and rail wear of the two railways.

La Maison de faubourg : l'architecture domestique des faubourgs Saint-Jean et Saint-Roch avant 1845

par H. Bourque. Haldimand, Québec : Institut québécois de recherche sur la culture, 1991. 199 p. : ill. Bibliogr. (Collection Edmond-de-Nevers ; no 10) ISSN 0714-0592 ISBN 2-89224-157-X
MICROLOG 93-05754 3 fiche

Le 28 mai 1845, le feu ravage plus de 1 600 maisons du faubourg Saint-Roch et le 28 juin, un mois plus tard, entre 1 4000 et 1 500 maisons du faubourg Saint-Jean. Ces graves conflagrations détruisirent l'aspect originel des deux plus vieux faubourgs de Québec. Apparus dès le début du XVIIIe siècle, ils auraient connu une expansion rapide et constituaient déjà, au moment des incendies, les deux tiers de la ville. C'est un vaste ensemble architectural et de surcroît toute une époque qui a disparu sous les flammes et, de ce fait, manque aujourd'hui dans le paysage de la ville de Québec. Ce document porte sur la maison de faubourg et examine particulièrement l'architecture domestique des faubourgs Saint-Jean et Saint-Roch avant 1845. De plus, on aborde la morphologie des faubourgs, la pratique architecturale des faubourgs, et la typologie architecturale des faubourgs.

The Making of the Canadian Cancer Registry : cancer incidence in Canada and its regions, 1969 to 1988

by P.R. Band...et al. Ottawa : Health and Welfare Canada, Canadian Council of Cancer Registries ; Statistics Canada, 1993. viii, 151 p. : ill. Bibliogr. *Bilingual (Développement du Registre canadien...).* ISBN 0-660-54887-9
MICROLOG 93-08624 2 fiche

This monograph documents the 1st 20 years' experience of the National Cancer Incidence Reporting System. It is organized into 3 main sections. The initial section describes the Canadian population and health care system, the history of cancer registration in Canada, and the methods employed. The body of the monograph includes descriptive analyses for selected cancer sites with a special section on childhood cancer. Temporal trends and regional variations are emphasized. A summary section examines cancer patterns by region. Detailed incidence data are presented as an appendix.

Making representative democracy work : the views of Canadians

by A. Blais and E. Gidengil. Toronto : Dundurn Press, 1991. xxi, 254 p. Bibliogr. (Research studies ; vol. 17) *French ed. (La Démocratie représentative : perceptions...) : 93-04454/4. CSI 22497.209.* ISSN 1188-2743 ISBN 1-55002-113-3
MICROLOG 93-04455 3 fiche

A Royal Commission was formed to take into account public concerns regarding the electoral process. It conducted a number of public opinion surveys to assess citizen attitudes regarding electoral reform. This document contains the results of these consultations. It discusses Canadians' political values; Canadians' beliefs about politicians, parties, and money; attitudes about the representative process, electoral finance, and electoral communication; and an overall evaluation of electoral procedures. It includes tables on the above topics.

Maladies de concombre

par W.R. Jarvis. Ottawa : Agriculture Canada, 1992. 53 p. : ill. *L'éd. anglaise (Cucumber diseases) : 93-04147/1.* ISBN 0-662-97712-2
MICROLOG 93-04148 1 fiche

Plusieurs maladies du concombre constituent un fléau pour les producteurs et les transformateurs. Par exemple, les pertes causées dans les champs par le blanc et la gale peuvent s'élever à 45 p. 100, la gale réduisant en outre la qualité et la durée de vie des fruits. Cette publication a pour but d'aider le producteur à prévenir et à combattre les nombreuses maladies du concombre. On examine les causes des maladies, la lutte contre les maladies, les maladies bactériennes, les maladies fongiques, les pourritures fongiques du fruit, les viroses, les autres maladies, les troubles physiologiques, et les accidents causeés par les produits chimiques.

Male violence against women : the brutal face of inequality : a brief to the House of Commons Subcommittee on the Status of Women : violence against women

Canadian Advisory Council on the Status of Women. Ottawa : The Council, 1991. i, 34 p. Bibliogr.
MICROLOG 93-02191 1 fiche

In this document, the Canadian Advisory Council on the Status of Women maintains that violence is perhaps the most visible, dramatic, and potentially deadly manifestation of the inequality women experience as part of their daily reality. It discusses the range of physical and sexual violence women suffer, patterns of physical and sexual violence against women, non-physical forms of violence, the long-term costs of violence against women, the factors which contribute to violence against women, holistic perspectives on violence against women, and what women want and need to prevent violence. It also includes recommendations and proposals for action.

The Management of financial resources in Canada

by R. Domingue and M. Salvail. Ottawa : Library of Parliament, Research Branch, 1992. 10 p. (Background paper ; BP-297E) *French ed. (La Gestion des finances publiques au Canada) on the same fiche.* ISBN 0-660-14588-X
MICROLOG 93-01907 1 fiche

During the fiscal year from 1 April 1990 to 31 March 1991, the federal government spent almost $150 billion, of which public debt charges alone took $42.5 billion. Revenues amounted to $199.4 billion, so that the deficit stood at $30.6 billion. The federal government's liabilities totalled $434 billion. A simple accounting error or slight mishap in a government program could result in a loss of several hundreds of millions of dollars. The tabling of the budget papers on budget day ends the budget development process. A cycle of financial management that extends over more than 20 months then begins. This document explains the public finance management cycle in detail.

Management of forage production under irrigation : final report

by B. Gossen...et al. Regina : Saskatchewan Agriculture Development Fund, 1990. 31 p.
MICROLOG 93-02719 1 fiche

The program was initiated in 1986 on a four-hectare site at Outlook to examine the causes of low alfalfa seed yields. Three trials were successfully established in 1986, examining the forage yield of 31 alfalfa varieties, the impact of cottony snow mould of alfalfa on nine varieties, and winter wheat survival following alfalfa in a rotation. A study to examine the effect of alfalfa stand density on seed production was partially established. Five trials were established in 1987 using Kentucky Bluegrass and forage grass in addition to alfalfa. The program conducted uniform alfalfa variety tests and stand density trials and studied the effects of fertilizers.

Management of organic soils

by W.K. Head. Regina : Agriculture Development Fund, 1990. xiv, 57 p. : ill. Bibliogr.
MICROLOG 93-08347 1 fiche

Field scale copper and potassium fertilizer test strips were established on copper and potassium deficient organic soils at five sites and monitored for three years. Establishment of forage grasses on organic soils was attempted at three sites. Timothy and reed canarygrass were seeded using a large land roller equipped to broadcast the seed and pack the seedbed in one operation. In 1988, a forage establishment and seed production trial was established on organic soil. Nine grasses and six forage legumes were seeded in a randomized complete block experiment with four replicates.

Managing hazardous air pollutants : EPRI's PISCES R-D project

by W. Chow, L. Levin and M.J. Miller. Montreal : Canadian Electrical Association, Engineering and Operating Division, 1992. 28 p. : ill. Bibliogr. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06227 1 fiche

The US Environmental Protection Agency (EPA) regulates air toxics under Section 112 of the Clean Air Act. To date the agency has established emission standards for 8 hazardous air pollutants, but the US electric industry was not determined to be a source category requiring regulation. The 1990 Clean Air Act amendments require a new evaluation of electric utility industry emissions of hazardous air pollutants. Key features of the air toxics provisions of the Clean Air Act Amendments are summarized, the Electric Power Research Institute (EPRI's) activities on the subject are described, and preliminary insights from EPRI's research are presented. The PISCES database, monitoring chemical species, the control technology engineering reference manual, field monitoring, systems model, hydrochloric acid and mercury management, and risk assessment are discussed.

Managing the response to industrial decline

by J.L. Bower. S.l. : British-North American Committee, 1984. iv, 28 p. (Occasional paper ; no. 2) ISBN 0-89068-077-9
MICROLOG 93-08435 1 fiche

This paper presents a framework for thinking about the response to industrial decline from the perspective of management in business, government, and labour. It distinguishes normal competitive shifts from the special challenge posed by the national strategies of the East Asian competition. It treats the problem of identifying threats as a normal one for industry and competitor analyses and presents devising a response as a contingent proposition. It considers the social cost of adjustment from a managerial perspective. Finally it discusses cooperation among competitors as a key to ameliorating destructive competitive conditions.

Manitoba ambient air quality annual report, 1989

Winnipeg : Manitoba Environment, Environmental Management Division, Air Quality Management Section, 1993. iv, 59 p. : ill. Bibliogr. (Report ; no. 93-02) *CSI 42154.003.*
MICROLOG 93-06621 1 fiche

Ambient air has been monitored at several locations throughout the province since 1968. Monitoring activities in 1989 took place in Winnipeg, Brandon, Thompson, and Flin Flon. The majority of the sampling is of a continuous nature involving dedicated monitors in permanent stations, divided into general or urban air quality monitoring and source specific or industrial monitoring. This report covers the 1989 data for carbon monoxide, nitrogen dioxide, nitric oxide, nitrogen oxides, ozone, ammonia, sulphur dioxide, soiling index, total suspended particulate, inhalable particulate, lead, sulphates, and nitrates. The report outlines ambient air monitoring activities, provides summary statistics and a comparison to air quality objectives and/or guidelines where applicable, compares 1989 data with previous years, and provides a rating of the air quality relative to the Canadian Annual Index of Air Quality.

Manitoba heritage site designations and heritage building grants, 1991-92

Edmonton : Manitoba Culture, Heritage and Citizenship, Historic Resources Branch, 1992. 71 p. : ill. *CSI 41106.008.*
MICROLOG 93-08910 1 fiche

This document describes, in 2 main sections, the designation of heritage sites and the Heritage Resources Act, and the Heritage Building Grants Program. Heritage sites can include buildings, structures, and land of archaeological, historical and natural significance. When a property is considered to be of special significance, either the provincial government or a municipal government may identify it and protect it. In the latest year, 10 provincial and 15 municipal heritage sites were designated. Each site is named, the location and owner are given, a photograph shows the site, and the significance of the site is described. The grants program is designed to assist owners and lessees of designated buildings in undertaking projects related to the conservation of their historic buildings. The program is described and the final section of the document gives site name, location, applicant, program, payment amount, and a description of the project, according to whether the payment is the initial or final amount, and related to a provincial or municipal designation. Appendices name all sites in the province with the address and date of designation, and list municipal heritage advisory committees.

Manitoba science assessment, 1990 : final report

Winnipeg : Manitoba Education and Training, Curriculum Services Branch, 1993. viii, 127 p. : ill. ISBN 0-7711-1082-0
MICROLOG 93-05756 2 fiche

The purposes of the assessment are to provide benchmark indicators about the level of student achievement; to obtain data on student achievement that will assist in curriculum and program improvement; to assist school divisions in student and system evaluation; and to help teachers improve their evaluation skills. This report contains a description and analysis, along with conclusions and recommendations of the Assessment conducted in Science 100, Biology 200, and Physics/Physique 300. Since the number of Francais and French Immersion students taking Physique 300 was very small, the results of these students were combined with those of English-language Physics 300 students and reported as one group.

Manitoba's policy for recreation opportunities : health and well-being for individuals, social and economic health for communities

Winnipeg : Manitoba Culture, Heritage and Citizenship, Recreation, 1993. 4, 4 p. *Bilingual (Politique manitobaine des...).*
MICROLOG 93-05258 1 fiche

This policy statement has been prepared to strengthen and promote recognition of the value of recreation opportunities throughout Manitoba. The policy sets out four basic principles to guide the actions of the provincial government as it works with Manitobans to provide recreation opportunities to enrich the lives of citizens and enhance the strength of communities. These principles are: planning for community choices; developing the role of local governments; reducing barriers to recreation opportunities; and learning and sharing knowledge about recreation.

Manuel de lutte contre l'eutrophisation dans les régions subarctiques

par V.H. Smith...et al. Ottawa : Affaires indiennes et du Nord Canada, Programme des affaires du Nord, 1985. 36 p. Bibliogr (Etude environnementale ; no 33) ISBN 0-662-93426-1
MICROLOG 93-05007 1 fiche

A partir des données recueillies au cours d'une étude effectuée de 1977 à 1983 sur 10 lacs situés près de Schefferville (Québec), on a mis au point un ensemble de modèles applicables à la gestion de l'eutrophisation d'origine anthropique dans les régions subarctiques. L'étude a révélé que, tout comme dans les lacs tempérés, il y avait une étroite corrélation en été entre, d'une part, la concentration de phosphore totale dans l'eau et, d'autres part, la prolifération d'algues et la transparence de l'eau mesurée avec le disque de Secchi. Ces modèles ainsi que l'analyse des incertitudes ont servi à mettre au point une méthode permettant de prévoir par étape l'état trophique d'un lac d'après sa charge en phosphore. Les données publiées sur le lac Harding, un lac subarctique d'Alaska, ont servi à démontrer et à vérifier le procédé de modélisation.

Manufactured homes' legislative review : recommendations report

by Rick Kasper [and] Malahat-Juan de Fuca ; assisted by P.A. Research Consultants Ltd. Victoria : Ministry of Labour and Consumer Services, 1992. viii, 42 p. ISBN

0-7718-9330-2
MICROLOG 93-02703 1 fiche

The legislative review looked at issues affecting manufactured homes situated in rental parks in British Columbia. Specific issues noted by the Minister of Labour and Consumer Services for review included: annual rent increases; rent reviews; payment for park improvements; security of tenure; restrictions on owners selling homes; plain language standard lease and rental agreements; and feasibility of provincial 'one-stop' service. During the review, two themes emerged the unique situations that affect manufactured home owners located on rental sites; and the insecurity and vulnerability felt by many manufactured home and park owners about the future. This report addresses these themes.

Marco Polo II feasibility update

Fredericton : Fiander-Good Associates Ltd., 1992. 152 p. : ill *Executive summary (10 p.) laid in Funded under the Canada/New Brunswick Cooperation Agreement on Planning*
MICROLOG 93-03924 2 fiche

The initial proposal for the Marco Polo II was based on summer use of the vessel mainly as a day sailing service out of St. John, along with shore visitations. The vessel would also provide accommodations, dining, and special charters. The winter operating scenario for

daily sailing trips was based out of Antigua in the Caribbean. This study re-evaluated the financial feasibility of operating the Marco Polo II. The report gives information on the original proposal and the important factors in the project; discusses the revisions to the operating scenarios; and gives revenue and cost estimates and financing costs.

Marine Ecosystem Enclosed Experiments : proceedings

editor: C.S. Wong and P.J. Harrison Ottawa : International Development Research Centre, 1992. vii, 439 p. : ill., maps. Bibliogr. ISBN 0-88936-543-1
MICROLOG 93-01984 5 fiche (Available on fiche only)

This symposium on marine ecosystem enclosed experiments consists of nine review papers describing various types of ecosystem enclosures and a series of papers resulting from enclosure experiments in Xiamen, People's Republic of China, and Saanich Inlet, British Columbia. The reviews on types of enclosures include benthic enclosures for rocky and sand shores and the effects of pollutants (mainly hydrocarbons) on bacteria, macroalgae and invertebrates. The pelagic enclosures were used to study the control of phytoplankton blooms, the uptake and release of dissolved organic substances and the effects of pesticides on freshwater ecosystems. Six enclosure experiments were conducted in China and Canada from 1986-87, some of which examined the effects of contaminated sediments, primarily heavy metals, on bacteria, phytoplankton and zooplankton and the pathways and fates of these heavy metals in the seawater. Other experiments studied the chemistry and biological effects of chemically dispersed oil.

Market opportunities for the utilization of wood waste generated by small sawmills

Sterling Wood Group Inc. S.l. : The Corporation, 1992. 56 p. : ill. Bibliogr. *Commissioned by the Ministry of Forests*
MICROLOG 93-02295 1 fiche

Only about 50 percent of the wood residues created in sawmills, pulp and paper, veneer, shake and shingle, chipping and pole and pilling plants in the province are currently used. This study explored the utilization potential for the residue throughout the province and reviewed the economics as they apply to small mills, those registered under category II of the Small Business Forest Enterprise Program. An analysis of those small mills that have solved their problems is presented as case studies. Telephone interviews were conducted, with specific information on products manufactured and type and handling of mill residue. Mill operators were also asked to comment on the importance of the problems and how they could be solved.

Market research results for the Grasslands National Park 1992 visitor survey

University of Saskatchewan. Tourism and Hospitality Research Unit and Business Consulting Services. Ottawa : Environment Canada, Canadian Parks Service, 1993. viii, 92 p. : ill. *Cover title: Grasslands National Park visitor survey, 1992.*
MICROLOG 93-07612 2 fiche

Situated in Southwestern Saskatchewan between Val Marie and Killdeer, Grasslands National Park is the first national park in North America set aside specifically for original mixed-grass prairie. The park is in the early stages of development, with Canadian Parks Service scheduling management planning to begin in 1993/94. CWS thus needs reliable and relevant market research and consumer preference information on which to base its decision. A survey was distributed from the Information Centre in Val Marie from 15 May-30 September, with about 600 registration cards distributed to one randomly selected person in each group visiting the centre. Those who provided name and address were mailed a questionnaire. In total, 272 surveys were returned by the cutoff date, representing a response rate of 65%. This report provides information taken from the survey and an analysis of the written comments, as well as types of visits and an analysis of the rodeo ranch questionnaire.

Les Mauvaises herbes de l'Ontario : descriptions, illustrations et clé d'identification

par J.F. Alex. Ottawa : Ministère de l'agriculture et de l'alimentation, Centre d'information des consommateurs, 1992. 308 p. : ill. *L'éd. anglaise (Ontario weeds : descriptions, illustrations ..) : 93-00993/4. Publication 505F.* ISBN 0-7729-9692-X
MICROLOG 93-00801 4 fiche

Les mauvaises herbes sont des plantes ordinaires qui présentent certaines caractéristiques indésirables. La plupart du temps, elles poussent là où l'on n'en veut pas. Ce document se penche sur les points suivants: qu'est-ce qu'une mauvaise herbe; pourquoi identifier les mauvaises herbes; l'objet du document, et, les noms des mauvaises herbes. Il examine également sur la lutte contre les mauvaises herbes, les mauvaises herbes nuisibles et la loi; les personnes-ressources; et, l'identification des mauvaises herbes.

Maximizing barley production under high-input conditions via semi-dwarf varieties in Saskatchewan : final report

by B.G. Rossnagel. Regina : Saskatchewan Agriculture Development Fund, 1990. 20 p. Bibliogr. *CSI 72228.200*
MICROLOG 93-06771 1 fiche

Semi-dwarf barleys Duke, Samson and Winchester were compared with the standard cultivars Heartland and Leduc for performance under high yielding irrigated and low yielding dryland conditions from 1986 to 1989. Various planting rates were evaluated to determine the optimum seed rate for their production. The use of irrigated sites was evaluated to develop methodology for straw strength selection purposes in a barley breeding program. The development of strong strawed barley genotypes for Saskatchewan was evaluated, the effect of variable seeding depth was studied, and the relative response of semi-dwarf and normal genotypes to residual soil incorporating trifluralin herbicide was evaluated.

Mayor's Task Force on Community and Family Violence final report

Calgary (Alta.). Mayor's Task Force on Community and Family Violence. Calgary, Alta. : The Task Force, 1991. 166 p. : ill.
MICROLOG 93-00006 2 fiche

On April 23, 1990, the Mayor's Task Force on Community and Family Violence was created to investigate all aspects of violence in Calgary. This report of the Task Force presents information on funding of social programs, coordination of funding and services, wife abuse, child abuse, youth and violence, elder abuse, immigrant women, urban design and safety, prevention through education and programs, the justice system, commercialization of violence against women and children, and male related issues. It also provides a summary of recommendations.

The Measurement of long range reaction stresses and the shakedown effect : final report

by Fleet Technology Limited ; for Metals Technology Laboratories. Kanata, Ont. : The Corporation, 1992. iv, 41 p. : ill. *CANMET contract: 23440-1-9058-01-SQ*
MICROLOG 93-01562 1 fiche

Stress states in welded structures are the result of applied service, short range residual and long range reaction. There is very little full scale data on the magnitude of long range reaction stresses and they are often ignored in establishing fracture toughness requirements. This study measured the magnitude of the long range reaction stresses and the subsequent shake-down on B.C. Ferry Corp.'s 470 car ferry now under construction. Six uniaxial strain gauges were mounted on each of two steel side shell plates, equally spaced, aligned longitudinally and transversely to the ship structure and within 150 mm and 325 mm of two butt welds. The plates were butt welded in both directions, and a tank top and stiffener plate were fillet welded to the plates. The baseline strains were measured after the installation of the gauges, and one week after the plates were welded. Strain measurements were taken in December 1991, February 1992 and April 1992 after the ship structure was launched, towed and drydocked. The strain changes and the corresponding calculated principal stresses were tabulated and plotted.

Measurement uncertainty calculations for radiological environmental monitoring

by A.J. Burnham. Toronto : Ontario Hydro, Research Division, 1992. 17 p. Bibliogr. (Report ; no. 92-27-K)
MICROLOG 93-02899 1 fiche

This report describes the methodology proposed for determining the uncertainty in the reported values of environmental radiological levels in media surrounding Ontario Hydro nuclear stations and in other areas for comparison purposes. These measurements are made at the Eastern Health Physics Laboratory (EHPL). Uncertainty is to be quantified into measures of precision and accuracy. The methodology is a procedural error analysis in which the testing procedures were broken down into their component parts and errors determined for each part. Overall errors were simulated from the components using Monte Carlo simulation techniques. The product of this work is a computer application which can be used to determine uncertainty for a given set of initial conditions and to perform sensitivity analysis on various sources of error. It can also be used to compare different methods of measurement in relation to the uncertainty involved. Recommendations for further analyses are also included.

Measurements of 129I in spent ion exchange resins and related nuclear systems by accelerator mass spectrometry

by S.A. Dias. Toronto : Ontario Hydro, Research Division, 1992. iv, 16 p. Bibliogr. (Report ; no. 92-149-K)
MICROLOG 93-04368 1 fiche

Radioiodines constitute an important class of fission products of both biological and radiochemical importance. In-line purification systems using ion exchange resins are expected to mobilize these from CANDU aqueous nuclear systems. Due to technical difficulties in determining these species, the iodine loadings on spent ion exchange resins have remained mainly unknown. Using accelerator mass spectrometry (AMS), the low levels of the long-lived volatile fission product Iodine-129 were measured in a spent ion exchange resin sample and water samples from the Irradiated Fuel Bay system and the Pressurized Heat Transport system.

Measurements of the radiation fields around the radiography facility of the SLOWPOKE II reactor at Royal Military College, Kingston (U)

by T. Cousins, B.E. Hoffarth and K. Jaansalu. Ottawa : Defence Research Establishment Ottawa, 1992. x, 30 p. : ill. Bibliogr. (Report ; no. 1123)
MICROLOG 93-03789 1 fiche

The SLOWPOKE II reactor facility at Royal Military College, Kingston, has provided the Department of National Defence in general, and Defence Research Establishment Ottawa (DREO) in particular, with a venue for conducting a variety of radiation experiments including dosimetry, neutron activation analysis, and transient radiation effects on electronics. Recently a neutron radiography facility was constructed at the SLOWPOKE consisting of a vertical through-tube pointed slightly to one side of the core. Preliminary measurements indicated that the radiation fields around the radiography facility were higher than expected, allowing DREO to use its new mobile nuclear laboratory to perform detailed neutron and gamma-ray dosimetric and spectroscopy measurements to determine the cause of and potential shielding against the excess fields. This report provides the results of the analysis.

Measurements of the spatial distribution of tritium-in-air above a chronically contaminated surface

by W.J.G. Workman...et al. Chalk River, Ont. : Atomic Energy of Canada Limited, 1993. 14 p. : ill. Bibliogr. (AECL research ; AECL-10752) ISSN 0067-0367 ISBN 0-660-14962-1
MICROLOG 93-08634 1 fiche

This investigation grew out of the need to better define the movement of tritium from a liquid disposal area on the Chalk River Laboratories site of AECL Research. Tritium introduced to the disposal pit over 35 years has been carried with surface water and groundwater to Perch Lake, a small, shallow lake about 750 m away. However, tritium levels in the lake have not risen to expected concentrations based on measured tritium levels in the aquifer. It is believed that tritium is being lost to the atmosphere from the terrestrial area between the source and the lake. To test this out, measurements of tritium concentration in air were taken at six locations over a 13 month period. This report presents the results.

Measures of mother tongue vitality for non-official languages in Canada (1986)

by B. Harrison and R. Lachapelle. Ottawa : Multiculturalism and Citizenship Canada, 1990. 57, 60 p. : ill. Bibliogr. *Bilingual (Mesures de la vitalité de...). CSI 22514.201.*
MICROLOG 93-03591 2 fiche

The focus of this study is the non-official languages in Canada, that is, languages other than English and French. It describes the evolution of non-offical languages collectively and provides measures of vitality both for all non-official languages taken as a whole and for certain individual languages. It compares the mother tongue of mothers with the mother tongue of their children to determine the extent to which languages are transmitted to the next generation. While much of the data pertain to Canada as a whole, several tables deal with the provinces and census metropolitan areas.

Measuring early adolescent scientific creativity : a validation study

by J.F. Engemann. St. Catharines, Ont. : Brock University, Faculty of Education, 1990. vii, 79 p. : ill. Bibliogr. *ONTERIS: ON06113.*
MICROLOG 93-05957 1 fiche

Examines scientific creativity as a measurable phenomenon in adolescent children by designing and implementing a 'New Uses for Scientific Equipment' test. The respondents, 54 grade 7 and 8 students from a single elementary school, were asked to think of uses for 6 common pieces of elementary school science equipment. Evaluation of each subject's performance gave 2 scores: number of new uses suggested (fluency), and mean scientific quality/originality rating of the proposed uses. The test demonstrated content validity, but concurrent validity, compared with scores from the Torrance Test of Creative Thinking, exists only for the fluency scoring. No correlation between scientific creativity and academic achievement in science or attitude toward science exists. A teacher-made test measured achievement and the Attitude Toward the Subject Science Scale measured attitude.

Measuring zooplankton net filtration efficiency in Dorset lakes : report

by N.D. Yan...et al. Toronto : Environment Ontario, 1992. v, 15 p. : ill. Bibliogr. ISBN 0-7729-9768-3
MICROLOG 93-01813 1 fiche

While the importance of determining the filtration efficiency of plankton nets has been recognized for decades, a survey of recent literature indicates that fresh water zooplankton ecologists rarely employ flow meters in their plankton hauls. As a reminder of the hazards of this omission, this paper documents large inter and intra-annual variability in plankton net filtration efficiency in a 10-year data set from an oligotrophic Canadian Shield lake. The stall speeds of the DRC plankton meter and the Rigosha meter used by Dorset Research Centre staff are determined. The paper experimentally demonstrates the influence of net design (i.e., open area ratio), haul speed and zooplankton community structure on net filtration efficiency.

Medical effects of cocaine/crack

by S. Clark. Edmonton : Alberta Family Life and Substance Abuse Foundation, 1993. vii, 25 p. Bibliogr.
MICROLOG 93-08824 1 fiche

This document discusses the addictive potential of crack and cocaine, as well as the pattern of withdrawal from these drugs. It looks at cocaine/crack babies in terms of growth and development, fetal abnormalities, complication during pregnancy, and withdrawal following birth. It discusses the cardiovascular effects including heart attacks, strokes, heart rhythm abnormalities, and heart muscle abnormalities. It also discusses the effects of the drugs on the respiratory system, the nervous system, psychiatric effects, and other medical effects.

MEND Program Project, passive treatment project at Heath Steele Mines, phase I : bench evaluation of prospective processes : research report -- Draft

by N. Kuyucak and P. St-Germain. Pointe Claire, Que. : Noranda Technology Centre, 1992. v, 32 p. : ill. Bibliogr. *CANMET contract: 23440-1-9203-01-SQ.*
MICROLOG 93-04273 1 fiche

Bench scale experiments were conducted to evaluate various methods being developed by other institutions, and to explore new ideas to achieve passive in situ processes for treating acid mine water (AMD). The methods included anoxic limestone (ALS), lime-organic mixture (LOM), biotrench (BT), and biosorbents (BIOS). All tests were performed in continuous mode in 30-L columns under anoxic conditions. The materials placed in the columns for ALS, LOM, BIOS, and BT processes were 0.25 in. limestone, a mixture of cow manure, soil and 1 in. limestone, and a mixture of wood wastes and a mixture of straw and brewer's dried grain. Moderate strength AMD with pH of 2.5 containing 160, 150, 300, 60, and 4000 mg/L of iron, aluminium, zinc, copper, and sulphur dioxide was treated in all column tests. In addition, biotrench was assessed by replicating the process in troughs in continuous mode.

Mergers and abuse of dominant position : legal aspects -- Rev.

by M. Smith. Ottawa : Library of Parliament, Research Branch, 1992. 20 p. Bibliogr. (Current issue review ; 91-3E) *Revised 17 September 1992. French ed. (Les Fusionnements...) on the same fiche* ISBN 0-660-14900-1
MICROLOG 93-06659 1 fiche

The passage of the Competition Act and the Competition Tribunal Act in 1986 was heralded as the beginning of a new era in Canadian competion policy. For nearly two decades, various governments had unsuccessfully attempted to resuscitate the ineffective merger and monopoly provisions of the Combines Investigation Act. A difficult yet essential task was distinguishing between behaviour that is anti-competitive and exclusionary and that which is the result of superior competitive performance and efficiency. This paper reviews the various proposals to reform the merger and monopoly provisions of the Combines Investigation Act and examines the operation of the 1986 Competition Act amendments in these areas.

Mesozoic stratigraphy and Jurassic paleontology west of Harrison Lake, southwestern British Columbia

by A.J. Arthur...et al. Ottawa : Energy, Mines and Resources Canada, Geological Survey of Canada, 1993. 62 p. : ill., maps. Bibliogr. (Bulletin ; 441) *Fold. maps not filmed.* ISBN 0-660-14680-0
MICROLOG 93-04303 1 fiche

The Mesozoic sequence west of Harrison Lake is the most complete and best understood section of Middle Triassic (Ladinian) to Lower Cretaceous (Albian) rocks of the western part of the Coast Belt in British Columbia. This detailed study of the lithostratigraphy and biostratigraphy of the strata permits a reconstruction of much of the history of sedimentation, volcanism, plutonism, uplift and erosion during Mesozoic time in the Coast Mountains, an area commonly devoid of stratigraphic sections with reliable fossil control. In this bulletin, several fossil groups are used to date the various lithological units that can be traced into the plutonic complex. The studies in which this report is based were carried out during a three month period in 1985.

Metal concentrations in bottom sediments from uncontaminated B.C. lakes

by K. Rieberger. Victoria : BC Environment, Water Management Division, 1992. ix, 332 p. : ill. Bibliogr. ISBN 0-7726-1668-X
MICROLOG 93-02321 4 fiche

This report summarizes sediment data collected for 369 lakes recognized as being relatively unaffected by humans to provide baseline data for comparison with other lakes of similar geological background and to monitor changes to the sampled lakes themselves. The lakes are categorized on the basis of tectonic region and each region is arbitrarily divided into sub-regions, based on latitude and sample sizes. The 28 variables were also compared in regression analyses as a function of lake water and sediment pH, organic carbon, sulphur, iron and manganese sediment concentration, lake surface area, mean depth, volume and altitude, sample depth, watershed size and runoff.

Metal transport at retention : the role of dissolved organic carbon

by B.D. LaZerte. Toronto : Ministry of the Environment, 1992. 12 p. : ill. Bibliogr.
MICROLOG 93-03879 1 fiche

Metals that bind tightly to humic substances in inner sphere, covalent complexes or chelates tend to follow the same pattern of transport as dissolved organic carbon (DOC). This paper shows that lead, copper, and iron behave as predicted in the dilute waters of the Precambrian Shield and that cadmium, zinc, and manganese are not so tightly correlated, if at all, with DOC. Metal concentrations and budgets of well drained, usually oxic, upland forest soils with living plant, litter, and organic soil layers on top of mineral soils or bedrock, and mineraltrophic, frequently anoxic, wetland soils with living plant, litter, and organic soil layers on top of organic peat are considered.

Metallogenic domains and their reflection in regional lake sediment surveys from the Meguma Zone, southern Nova Scotia, Canada

by P.J. Rogers, A.K. Chatterjee and J.W. Aucott. Halifax : Dept. of Mines and Energy, Mineral Resources Division, 1990 22 p. : ill., maps. Bibliogr. (Contribution series ; 90-011) *In* Journal of Geochemical Exploration : *39, 1990*
MICROLOG 93-06846 1 fiche

Approximately 3000 samples from a regional centre-lake bottom sediment survey of southern Nova Scotia were re-analyzed for sixteen elements of metallogenic significance. Analytical results for Cu, Pb, Zn, Ag, Li, F, Nb, Sn, Ti, Zr, Rb, Th, Sb, As, W and Au have confirmed that most known mineral deposits and metallogenic domains in the Meguma Zone (MZ) have detectable geochemical signatures in lake sediments. Lake sediments geochemistry is described in terms of a model that considers the catchment basin as the area of influence for the lake sediment sample. This catchment model is used as the basis for application of single and multiple element data reduction methods to the MZ lake sediment survey.

A Method of computing smooth transitions between a sequence of straight line paths for an autonomous vehicle

by R. Liscano and D. Green. Ottawa : National Research Council Canada, Division of Electrical Engineering, 1990. 10 p. ill Bibliogr.
MICROLOG 93-07942 1 fiche (Available on fiche only)

A method is described that computes a continuous-curvature transition curve from a straight line path that an autonomous vehicle is following to another desired straight line path The curve transcribed by the vehicle during the transition phase is a combination of two identical clothoid curves, one for the angular acceleration portion of the vehicle and the other for the deceleration portion. The clothoid-pair curves are a result of maintaining the linear velocity and angular acceleration of the vehicle constant along the transition path. Implementation issues concerning the use of clothoid curves are presented along with special conditions that arise from limits on the position and velocity of the vehicle.

MICROLOG 93-03263 1 fiche

Les professionnels et la population en général sont beaucoup mieux informés aujourd'hui sur les abus sexuels à l'égard des enfants qu'ils ne l'étaient il y a une décennie. Divers organismes sont chargés de donner suite aux allégations d'abus sexuels, mais les conflits entre leurs mandats respectifs nuisent à une intervention cohérente. La collaboration entre ces divers services apparaît donc essentielle. Cet article présente un modèle de formation et de coopération multidisciplinaire et en donne quelques exemples pratiques.

Méthode d'essai biologique : essai d'inhibition de la croissance de l'algue d'eau douce *Selenastrum capricornutum*

Ottawa : Environnement Canada, Service de la protection de l'environnement, 1992. xxv, 43 p. : ill. Bibliogr. (Rapport ; SPE 1/RM/25) ISBN 0-662-98164-2
MICROLOG 93-04849 1 fiche

Ce rapport décrit les méthodes recommandées par Environnement Canada pour déterminer la toxicité chronique d'effluents, d'élutriats, de lixiviats, de milieux récepteurs ou de produits chimiques chez l'algue verte Selenastrum capricornutum, au moyen de la microlitration sur plaque. Il présente les conditions et méthodes générales ou universelles permettant de réaliser cet essai de toxicité chronique sur diverses substances à expérimenter. On y trouvera des instructions sur les conditions de culture et les exigences de l'espèce soumise à l'essai, la manipulation et le stockage des échantillons, les installations d'essai requises, les méthodes de préparation des solutions d'essai et de mise en route des essais, les conditions prescrites pour les essais, les observations et mesures appropriées, les résultats des essais, les méthodes de calcul et l'utilisation de produits toxiques de référence.

Méthodes de lutte préconisées contre les ennemis des cultures abritées en Ontario -- Rév.

Toronto : Ministère de l'agriculture et de l'alimentation, 1990. 66 p. *L'éd anglaise (Pest management recommendations...) : 93-06950/1.* ISBN 0-7729-8094-2
MICROLOG 93-06949 1 fiche

Ce document porte sur les méthodes de lutte préconisées contre les ennemis des cultures abritées en Ontario. Dans la plupart des cas, on donne une liste des pesticides préconisés pour la répression de l'insecte ou de la maladie en cause. Autant que possible, les produits les moins dangereux ainsi que ceux qui se sont montrés satisfaisants au cours de plusieurs années d'utilisation par les producteurs sont listés les premiers. Suivent ensuite les pesticides plus toxiques ou d'apparition plus récente sur le marché et avec lesquels nous avons peu d'expérience. Plusieurs marques de pesticides sont mentionnées dans les calendriers de traitements dans le but unique de faciliter la tâche du producteur.

Methods for promoting the use of New Brunswick stone : decorative and architectural

Three-D Geoconsultants Limited. Fredericton : Dept. of Natural Resources and Energy, Minerals Resources Division, 1989. 71 p. (Open file report ; 89-43) ISSN 0712-4562
MICROLOG 93-03731 1 fiche

Investigation of methods for the distribution of promotional material on New Brunswick stone and recommendations for the effective utilization of this material. The study area includes the Atlantic Provinces, Ontario, Quebec, and 13 states in the United States. A number of major architectural, consulting, and development firms were contacted to determine their commitment and record on the use of stone. Professional and trade associations and similar organizations for the provinces and states in the study area were also contacted. A directory format summary of all contacts was prepared and a listing of scheduled occurrences such as trade shows, building products exhibits, architectural association meetings, and related promotional opportunities

Methyl methacrylate

Ottawa : Health and Welfare Canada ; Environment Canada, 1993. v, 27 p. Bibliogr (Priority substances list assessment report) *At head of title: Canadian Environmental Protection Act. French ed. (Méthacrylate de méthyle) on the same fiche* ISBN 0-662-20418-2
MICROLOG 93-06794 1 fiche

The Priority Substances List identifies substances, including chemicals, groups of chemicals, effluents, and wastes that may be harmful to the environment or constitute a danger to human health. This paper studies methyl methacrylate which is used in manufacturing acrylic sheets and emulsions and in molding and extrusion resins. The report provides a summary of critical information, discusses identity, properties, production and uses of the substance and its entry into the environment. It then goes on to look at exposure-related and effects-related information. Finally, it provides an assessment of toxic under the Canadian Environmental Protection Act and recommendations for research and evaluation.

Metrology and monitoring of 220Rn progeny

by J. Bigu. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1992. ii, 58 p. : ill Bibliogr. (Report ; MRL 93-036(TR))
MICROLOG 93-08316 1 fiche

Reliable measurements of radon-220 and its progeny concentration in air are very important for radiation exposure calculation purposes as well as for atmospheric tracer studies and other scientific and engineering applications. This report outlines the basic theory and fundamentals of radon-220 progeny sampling, giving theoretical expressions to calculate the growth of radon-220 progeny radioactivity during an arbitrary sampling period as well as the activity that would be measured by a detector system during the sampling period, or any part thereof, and any arbitrary period after sampling. Active and passive sampling are examined and a number of methods for measuring and monitoring radon-220 are discussed, as well as methods to measure radon-220 progeny in the presence of radon-222 progeny.

Metropolitan Toronto exceptional load route designations : research report

Toronto : Metropolitan Toronto Transportation Dept., Policy Development and Research Branch, 1989. iv, 62 p. : ill., maps.
MICROLOG 93-01675 2 fiche

An exceptional load vehicle is defined as one whose height, width, length and/or weight is greater than regulated by the Highway Traffic Act or municipal by-laws for unrestricted movement on public roadways. This study addresses the concern of decreasing route opportunities by proposing a set of roads to be designated as exceptional load (E.L.) routes, and a set of dimensions to comprise the E.L. envelope. Activities undertaken during the study included the determination of provincial, Metropolitan Toronto and area municipal roads used by exceptional load vehicles; the establishment of the dimensions that encompass the majority of exceptional loads; the establishment of an interim exceptional load network currently capable of accommodating the chosen dimensions; and the determination of a long-term exceptional load network.

Microbially influenced corrosion (MIC) analyses of the BNGS-B vacuum building

by D.K. Jain. Toronto : Ontario Hydro, Research Division, 1992. 16 p. : ill. Bibliogr. (Report ; no. 92-185-K)
MICROLOG 93-04358 1 fiche

Microbially influenced corrosion (MIC) has been found to play a significant role in causing corrosion, especially in those industries which use natural waters. The most significant of the organisms found to cause corrosion are the sulphate-reducing bacteria (SRB), particularly with anoxic deposits or stagnant weirs. In May 1992, the Bruce Nuclear Generating Station B Vacuum Building was inspected for MIC after being in service for 10 years. This report provides results for both on-site MIC inspection and for microbiological analysis of sediments, water, and slime deposits for evidence of MIC bacteria.

Microbiological analyses of stainless steel coupons immersed in the irradiated fuel bay, Darlington NGS

by D.K. Jain. Toronto : Ontario Hydro, Research Division, 1992. 14 p. : ill. Bibliogr. (Report ; no. 92-178-K)
MICROLOG 93-04357 1 fiche

Corrosion was detected in the irradiated fuel bay (IFB) at Darlington Nuclear Generating Station A. After investigation, it was suggested that bacteria may have played an important role in the process because corrosion was occurring in locations distant from the welds and corrosion product analyses revealed bacteria that have been implicated in the corrosion of stainless steels. A surveillance program was initiated in which stainless steel coupons, placed in the IFB, were examined for corrosion and the presence of microorganisms, including microbially influenced corrosion bacteria.

Microprocessor controller for Magnatech Pipe Welding System

by S.C. McNabb and X. Liu. Toronto : Ontario Hydro, Research Division, 1992. vii, 75 p. : ill. Bibliogr. (Report ; no. 92-47-K)
MICROLOG 93-02888 1 fiche

In electricity generating plant construction and maintenance, manual welding techniques are used exclusively for field assembly of heavy wall piping. Because these techniques are slow, and commercially available machanized pipe welding systems are unsuitable for field application, there is strong incentive to assemble a custom mechanized pipe welding system that requires minimal operator intervention and skill, and yet provides significantly improved productivity with acceptable weld quality. One part of the required pipe welding system is a microprocessor-based controller, the developments of which are discussed herein

MICROLOG 93-06067 1 fiche

This paper look at two different microprocessor board arrangements which serve as the base for a variety of power system protection devices They typically calculate the first 15 harmonic components of up to 9 nominal power frequency inputs and update these harmonies every 2 months. They dynamically track the fundamental frequency and alter the sampling rate to remain at 32 per fundamental cycle. The harmonic components are available for use in a variety of protection algorithms and typical examples are given.

Microscopical investigation of froth structure, phase 1

by W.W. Lam and R.J. Mikula. Ottawa : Canada Centre for Mineral and Energy Technology, Western Research Centre, 1992. vii, 22 p. : ill. Bibliogr. (Report ; CRL 92-16(TR))
MICROLOG 93-08535 1 fiche

Understanding the microscopic basis for froth structure will have important implications in the improvement of bitumen extraction from oil sands. In the initial separation of bitumen from oil sands via the Clark hot water process, the system is best described as an oil (bitumen)-in-water emulsion. At some point, however, this emulsion inverts and becomes a water-in-oil emulsioin. Understanding this inversion process will help in maximizing water and mineral matter drainage from the bitumen product. The initial steps in the study are designed to establish the appropriate sampling protocol for the labile froth samples, to determine what the microscopic froth structure is, and to confirm that froth structure is similar in the batch extractors, in pilot-scale experimental circuits, and in the primary separation vessels at the Syncrude and Suncor extraction plants. This report presents the preliminary results of this first step.

Microwave Landing System (MLS) studies and analysis

by R. MacNeil. Montreal : Transport Canada, Policy and Coordination Group, Transportation Development Centre, 1991. xxiii, 93 p.
MICROLOG 93-03106 2 fiche

Microwave Landing System (MLS) equipment is planned to replace existing VHF/UHF instrument land systems (ILS) in the 1990s. MLS equipment must conform to MLS performance specifications and standards in accordance with requirements of the International Civil Aviation Organization (ICAO). To assure that Canadian MLS conforms to these international requirements, developmental and testing activities in specific aspects of MLS were undertaken. This report describes the development of an independent hardware based integrity verification monitor for MLS; completion of development of microwave corporate feeds, transient protection and effective radiated power monitor modules; logistics analysis for reliability, integrity, failure mode, effects and criticality; and certification testing to verify operational and performance requirements.

The Middle immersion programme : update, 1989

by J. Unitt and L. Donne. Ottawa : Ottawa Board of Education, Centre for Research, Professional Development, and Evaluation, 1989. 17 p. : ill. (Research report ; 89-07) *ONTERIS: ON06159.*
MICROLOG 93-07261 1 fiche

The purpose of this project was to update the previous year's examination of the middle French immersion (MFI) program, which begins in grade 4. This was introduced as an intermediate entry point, compared to early immersion (EFI) which begins in kindergarten. The aim of the research were: to compare the French proficiency of the first and second MFI cohorts and of the EFI students at the end of grade 6; to compare the French proficiency of three cohorts of MFI students at the end of grade 4; and to examine and compare English reading and mathematics scores of the grade 4 cohorts and of students in other programs. Two French proficiency tests were administered to students in grades 4 and 6 at the end of April; other scores were available as part of the normal testing program.

La Migration des jeunes : perspectives pour le nord : un rapport des Conseils de développement du Nord

présenté lors de l'assemblée annuelle des Conseils de développement du Nord
Toronto : Ministère du développement du Nord et des mines, 1991. ii, 63 p. : ill. *L'éd. anglaise (Youth migration : northern...) : 93-02676/1. CSI 55117.202F.*
MICROLOG 93-02675 1 fiche

Au cours des années 1980, la migration des jeunes du Nord ontarien a été de plus en plus marquée. Conscient des effets de cette saignée sur les communautés du Nord, le ministre du Développement du Nord a demandé aux neuf Conseils de développement du Nord, réunis à Timmins en 1989, de faire enquête sur les causes de cette migration. Ce document examine particulièrement les points suivants: pourquoi les jeunes quittent le Nord; pourquoi les jeunes vont s'établir dans le Nord ou y demeurent; les émotions sous-jacentes, et les réflexions finales.

Mine reclamation in Northwest Territories and Yukon

Ottawa : Indian and Northern Affairs Canada, Northern Affairs Program, Northern Water Resources Studies ; S.l. : Steffen Robertson and Kirsten (B.C.) Inc., 1992. xii, 114 p. : ill., maps. Bibliogr. ISBN 0-662-20451-4
MICROLOG 93-03975 2 fiche

This project reviewed the approach to reclamation practices in other jurisdictions in Canada and identified the factors to be considered in reclamation of abandoned, operating, and proposed minesites, including northern climatic and hydrological conditions, open pit and underground mines, special mines such as uranium, sand and gravel, and coal, waste rocks and tailings disposal, acid generating and leaching, and added costs associated with northern sites. It developed methods to estimate the costs of minesite reclamation in northern areas and prepared a generic guide for use by the Department of Indian and Northern Affairs and mining companies to estimate costs of mine abandonment and reclamation.

Mineral exploration and tourism : a handbook

by Pat Smith ; in cooperation with Northern Ontario Tourist Outfitters Association...et al. Sudbury, Ont. : Ministry of Northern Development and Mines, 1991. iii, 22 p : ill. Bibliogr. (Education series ; no. 1) *French ed. (Prospection des minéraux...) on the same fiche.* ISSN 1183-2436 ISBN 0-7729-8038-X
MICROLOG 93-01913 1 fiche

This manual sets out standards of practice for the mineral exploration industry in Ontario in relation to tourism, with particular emphasis on tourist outfitter operations. The manual gives the background for the development of the handbook and defines the areas of interest motivating the tourist outfitter and mineral exploration industries. It then details tourist values to provide explorationists with an understanding and awareness of the priorities of the tourist facility operator. An overview of the activities tourist facility operators may expect to encounter in areas under exploration is next presented, along with the regulatory framework, including the amended Ontario Mining Act and the Public Lands Act. Specific standards of practice for mineral exploration leading to the protection of tourism values conclude the handbook. A glossary is also included.

British Columbia. Ministry of Government Services. Community Grants Branch. Victoria : The Branch, 1993. 60 p.
MICROLOG 93-07934 1 fiche

This report lists all commitments made by the Ministry through the Branch from April 1, 1992 to March 31, 1993, and any payments made against these commitments. It lists community archives assistance grants, annual grants, Maritime bicentennial grants, special projects, and sea-to-sea. A short description of each program, and overall amounts committed and paid to each is given.

Mink contaminants study, field component, January to March 1992

by L.P. Horstman and T.E. Code. Edmonton : Northern River Basins Study, 1993. 52 p. (Northern River Basins Study project report ; no. 1) ISSN 1192-3571 ISBN 0-662-20008-X
MICROLOG 93-07237 1 fiche

The Northern River Basins Study was initiated through the Canada-Alberta-Northwest Territories Agreement Respecting the Peace-Athabasca-Slave River Basin Study, signed in September 1991. The study was conducted to characterize the cumulative effects of pulp mill development on the water and aquatic environment of the study area by coordinating with existing programs and undertaking appropriate new technical studies. This report provides the results of a study to obtain mink carcasses from the 1991/92 trapping season for laboratory analysis and to provide detailed procedural recommendations for mink carcass collection in 1992/93. The report describes the methods of mink carcass collection and shipment, the use of RMFA holders for trapping, and contract trapping.

The Miramichi earthquake : the media respond to an invisible emergency

by J. Scanlon, K. Dixon and S. McClellan. Ottawa : Emergency Preparedness Canada, 1982. 33 p. Bibliogr. (ECRU field report ; 82/1)
MICROLOG 93-05057 1 fiche

Major earthquakes in New Brunswick are rare. Inevitably, therefore, the one that occurred on January 9, 1982 caught everyone by surprise. People hearing the rumble and feeling the vibrations did not know what was happening. They had to search for information either by conducting their own investigations or by asking someone or by turning to the news media. This study is about that search for information and its effects. It is based on research conducted by the Emergency Communications Research Unit at Carleton University during the two weeks following the two most severe quakes.

MISA report on the assessment of the quality assurance and quality control data for the organic chemical manufacturing sector

by S. Michajluk and D. Boyd. Toronto : Environment Ontario, Municipal/Industrial Strategy for Abatement, 1993. ı, 268 p. Bibliogr. ISBN 0-7778-0333-X
MICROLOG 93-06719 3 fiche

Twenty-six organic chemical manufacturing (OCM) sector plants were regulated under the MISA (Municipal-Industrial Strategy for Abatement) program to provide twelve months of effluent monitoring data. To assess the quality of the effluent monitoring data, OCM sector plants were also required to submit specified quality assurance and quality control (QA/QC) data. The assessment of QA/QC data provided information on the analytical quality of the larger effluent monitoring database, allowing decisions on the suitability of the effluent monitoring data for use in the effluent limits setting process. Details are presented of the QA/QC assessment process, including retrieval and screening, sorting and summarizing, and evaluation of data. Specific parameter QA/QC data assessment is discussed and results are presented.

Missinaibi Lake area (NTS 42B/SW), districts of Algoma and Sudbury

by H.A. Lee and S.A. Scott. Toronto : Ministry of Natural Resources, Ontario Geological Survey ; Ministry of Northern Affairs, 1980. iii, 12 p. : map. Bibliogr. (Northern Ontario engineering geology terrain study ; 74) *Fold map not filmed.* ISSN 0709-4671 ISBN 0-7743-4350-8
MICROLOG 93-02410 1 fiche

This report contains an inventory of regional engineering terrain conditions in the Missinaibi Lake area, districts of Algoma and Sudbury. The information was obtained mainly from aerial photographs checked with published and unpublished literature documenting previous field visits and observations. Roads in the area were traversed and observed terrain conditions recorded as further verification of the office studies. The report describes the geological setting and the engineering terrain units and their significance, including bedrock, moraine, glaciofluvial, glaciolacustrine, alluvial and organic landforms.

Misuse of the null hypothesis in data reporting and interpretation

by D.E. King. Toronto : Ministry of the Environment, 1992. 22 p. : ill. Bibliogr. ISBN 0-7778-0607-X
MICROLOG 93-03771 1 fiche

Analytical method detection capability (MDC) has been used for several decades as the basis for determining measurement reporting limits. One outcome has been inadequate control of method performance at low-levels. As a result, the poor comparability of such data among laboratories has led to the introduction of progressively higher data reporting limits and the consequent loss or degradation of potentially valuable low-level environmental data. This paper reviews the application of the null hypothesis, in particular the requirement that this hypothesis be the opposite of what one suspects to be true. The paper demonstrates how the statistical logic must be inverted when the target analyte is strongly suspected to be absent (no analytical response at a level above Sw). It demonstrates the need to re-examine data reporting practices and to improve data quality management objectives for low-level data.

Mitigation measures for the La Grande 1 hydroelectric development

by O. Faucher and R. Gagnon. Montreal Canadian Electrical Association, Hydraulic Power Section, 1991. 19 p. Bibliogr. *Paper presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-07726 1 fiche

The La Grande 1 hydroelectric development comprises of a run-of-river power plant, a spillway, two gravity dams extended by embankments, and erosion control structures along the north shore. This paper briefly outlines all measures to mitigate environmental impact of the La Grande 1 project. The paper focuses on corrective, protective and enhancement measures rather than compensation measures (such as electrification of the village of Chisasibi). To clarify reasons for the mitigation reasons, the paper begins with a brief technical discription of the project and the receiving environment and a summary of the main repercussions anticipated.

Mobility rights and the Charter of Rights and Freedoms -- Rev.

by M. Dunsmuir and K. Douglas. Ottawa : Library of Parliament, Research Branch, 1992. 10 p. Bibliogr. (Current issue review ; 90-4E) *Revised 16 November 1992. French ed. (La Liberté de circulation...) on the same fiche.* ISBN 0-660-14895-1
MICROLOG 93-06660 1 fiche

As Canada is a vast country with various economic opportunities distributed throughout its length and breadth, it is important that the right to travel, both inside and outside Canada, be reflected in the Charter. Section 6, giving every citizen the right to enter, remain in and leave Canada, recognizes this. It also gives both citizens and premanent residents the right to move into any province and pursue economic gain. However, these latter rights can be reduced by certain categories of provincial laws, as well as affirmative action programs. These restrictions are discussed in this report.

Un Modèle du coût du financement et du ratio d'endettement des entreprises non financières

par J.-F. Fillion. Ottawa . Banque du Canada, 1992. ii, 63 p. : ill. Bibliogr. (Rapport technique ; 61)
MICROLOG 93-01739 1 fiche

Cette étude vise principalement à calculer le coût du financement des entreprises non financières canadiennes et à élaborer un modèle qui permette d'en expliquer l'évolution à partir de certaines variables macroéconomiques. Dans la section 2, qui suit l'introduction, on examine brièvement l'évolution du coût du financement et du ratio d'endettement à partir des années 60. Dans la section 3, on expose la structure du modèle et on montre comment l'équation du ratio d'endettement optimal peut être déterminée à l'aide de l'objectif de minimalisation des coûts. Dans la section 4, on présente les résultats empiriques de chacune des évaluations du modèle. Dans la section 6, on examine les liens entre les taux d'intérêt réels et le coût du financement, de même que l'effet de l'inflation sur le coût du financement et sur le ratio d'endettement, ce qui permet d'expliquer les observations mentionnées plus haut. La section 6 contient nos principales conclusions.

Modèles et algorithmes pour problèmes de planification de réseaux et de localisation

par B. Gendron. Montréal : Université de Montréal, Centre de recherche sur les transports, 1993. ii, 51 p. : ill. Bibliogr. (Publication ; no. 882)
MICROLOG 93-05281 1 fiche

Dans ce travail, on énonce un modèle général décrivant une large classe de problèmes déterministes, statiques et à objectif linéaire pour la planification de réseaux. Ce modèle renferme, outre son caractère hautement combinatoire, deux autres caractéristiques qui le rendent intrinsèquement difficile: un flot à plusieurs produits (ou multiflot) et des capacités sur les arcs. On étudie plusieurs cas particuliers plus simples de ce modèle, notamment quelques problèmes classiques de localisation. On fait une revue des méthodes de programmation mathématique utilisées pour résoudre ces cas particuliers. Une avenue de recherches ouverte à la suite de ce travail consiste à adapter certaines de ces méthodes pour la résolution du modèle général. Une autre voie de recherches examinée dans ce travail concerne l'implantation de ces méthodes de résolution sur des architectures parallèles.

Modélisation des indicateurs sur la qualité de vie au Canada : une étude de faisabilité

par R.A. Murdie, D. Rhyne et J. Bates. Ottawa : Centre d'études prospectives sur l'habitation et le cadre de vie, 1992. v, 98 p. Bibliogr. *L'éd. anglaise (Modelling quality of life indicators...) : 93-06159/1.*
MICROLOG 93-06158 2 fiche

Cette étude avait trois principaux objectifs 1) analyser les écrits existants sur la qualité de vie, 2) élaborer un modèle complet de la qualité de vie qui soit approprié pour le niveau municipal, et 3) explorer la disponibilité de données pour le modèle dans diverses échelles spatiales et à divers intervalles de temps et définir les données requises qui n'existent pas déjà. Le rapport comprend quatre grandes sections. Dans la première, on résume les grands thèmes des écrits et on signale les questions importantes concernant la qualité de vie. Une brève analyse de chaque grande question forme la base de la deuxième section. Dans la troisième section, deux modèles sont analysés, le premier concerne les perspectives traditionnelles de la qualité de vie selon les indicateurs objectifs et subjectifs et le second est fondé sur les idées récentes au sujet du développement durable et des villes en santé. Ce dernier, qui est le modèle préféré, situe le contexte pour la définition des indicateurs appropriés qui ont été retenus et les mesures particulières de ces indicateurs. Enfin, dans la quatrième section, on passe en revue les indicateurs qui ont été choisis et les mesures particulières les concernant.

Modelling of oil spills in snow

by S.L. Ross Environmental Research Ltd. and D.F. Dickins Associates Ltd. Ottawa : Environment Canada, Environmental Protection Directorate, River Road Environmental Technology Centre, 1988. v, 71 p. : ill. Bibliogr (Report ; EE-109)
MICROLOG 93-08978 1 fiche

This paper describes the development of process equations to predict the fate and behaviour of oil spills on land or ice or under snow. Prior to the detailed planning of the experiments, it was necessary to retrieve, collate and study the considerable body of data already existing on the behaviour of oil in, under or on snow to fill in data gaps. Based on the results of this survey, small scale field experiments were conducted to collect data on oil evaporation rates beneath snow and oil transport by blowing snow and mid-scale experiments were conducted to measure oil spreading beneath snow.

pulverised coal combustion for the prediction of flow and combustion characteristics of swirling flames in axi-symmetric furnaces. The model is based on the solution of the time-averaged equations for the conservation of mass, momentum, species and energy for gaseous and particulate phases. The model validations involved an extensive predictive study that used data gathered from large scale experimental furnaces at the Imperial College for Science and Technology (ICSTM), the International Flame Research Foundation and the Canadian Combustion Research Laboratory. The data collected in the ICSTM laboratory was specifically for validation purposes, thus allowing special emphasis to the near burner region that dominates the flame stability behaviour and emissions of nitrous oxide.

Modelling quality of life indicators in Canada : a feasibility analysis

by R.A. Murdie, D. Rhyne and J. Bates. Ottawa : Centre for Future Studies in Housing and Living Environments, 1992. iv, 68 p. Bibliogr. *French ed. (Modélisation des indicateurs sur la qualité...) : 93-06158/2.*
MICROLOG 93-06159 1 fiche

Study to analyze existing quality of life literature, to develop a comprehensive quality of life model that is appropriate to the municipal level, and to explore the availability of data for the model for various spatial scales and time intervals and to identify needed data that do not currently exist. The report summarizes the major themes and important issues and provides a brief discussion of each; discusses two models, one related to traditional perspectives of quality of life based on objective and subjective indicators, and the other based on recent ideas about sustainable development and healthy cities; and outlines the indicators selected and specific measures of these indicators.

Modernization of weapons and the qualitative problems of arms control

by G. Lindsey. Ottawa : Canadian Institute for International Peace and Security, 1992. viii, 116 p. : ill. Bibliogr. (Working paper ; no. 42) *CSI 22305.209.* ISBN 0-662-19700-3
MICROLOG 93-00011 2 fiche

This document presents information on assessing capabilities and controlling armaments by numbers and by quality of weapons; the modernization of strategic ballistic missiles under numerical limitations; the modernization of combat aircraft; and the modernization of armoured forces. To concentrate on military systems already involved in arms control and to consider systems for which historical data is available, the discussion focuses on strategic systems (ICBMs, SSBNs, SLBMs, strategic bomber aircraft, ALCMs, and to some extent on their nuclear weapons), tactical air systems (fighter/attack and interceptor aircraft), and tactical land force (tanks and anti-tank guided missiles).

Modification and testing of a portable reciprocating kiln for cleaning oiled sand and gravel

S.L. Ross Environmental Research Ltd. Ottawa : Environmental Studies Research Funds, 1992. viii, 77 p. : ill. Bibliogr. (Environmental Studies Research Funds report ; no. 119) ISBN 0-921652-20-8
MICROLOG 93-03385 1 fiche

Over the last decade, several studies have investigated the use of combustion for cleaning oil contaminated beach material but few have been studied in detail under experimental conditions. This study evaluated the concept of a shoreline burner, reviewed existing technology, and redesigned the reciprocating kiln. The test program evaluated the efficiency of, and emissions from, a prototype reciprocating kiln for the removal of oil from contaminated beach sediment. Trials were conducted at Chebucto Head Lighthouse near Halifax, Nova Scotia.

Moisture determination in insulating liquids by thin film capacitance sensor

by H. Azizian and K. Nanjiani. Toronto : Ontario Hydro, Research Division, 1992. iii, 18 p. : ill. Bibliogr. (Report ; no. 92-77-K)
MICROLOG 93-03291 1 fiche

To improve reliability of equipment and to expand the knowledge of the effects of thermal and electrical stress on dielectrics and equipment and of fault detection and monitoring, an investigation was begun of an on-line transformer performance analysis system (TPAS). The TPAS monitors partial discharge activity, gas and moisture content of insulating oil and current. The current signal is used in conjunction with mathematic models to calculate the 'hot spot' and transformer top oil temperatures. This report contains the initial findings on the performance and presents potential applications of the thin film capacitance moisture sensor. The sensor was used to determine the moisture content of oil in laboratory experiments and during vacuum degassification of oil in a field demonstration, and to monitor the moisture migration between paper and oil insulation. Other potential applications are described.

Moisture in framing lumber : field measurement, acceptability and use surveys

by P. Garrahan, J. Meil and D.M. Onysko ; Forintek Canada Corp. Ottawa : Canada Mortgage and Housing Corporation, 1991. viii, 96 p. : ill. *French ed. (Teneur en eau du bois de charpente...) : 93-06164/2*
CSI 22118 244
MICROLOG 93-06161 2 fiche

This national survey was undertaken to quantify the moisture content of lumber in actual use at the stage when it is closed in by the vapour retarder and drywall and to determine what factors influence the supply of dry vs green lumber to the market and how this impacts on choices individual lumber builders make concerning framing lumber. The field moisture study was performed over one year to ensure that all seasons of construction were included at each of 10 different regional population centres across the country. In the second part of the study, three surveys were conducted, one for 88 builders to determine the factors that influence their decision to use green or dry lumber and to identify recurring problems, one for 31 building material suppliers to obtain their perception of local builder's purchasing habits and their opinions about the potential for greater use of dry lumber in the future, and the third by telephone to obtain typical production figures for green and dry lumber from 21 lumber producers, to assess their export practices and markets for dry lumber, the price differentials between green and dry lumber, and the protection provided for dried material.

Monitoring a sealed longwall panel

by D.J. Kennedy, G.W. Ellerbrok and D.G. Chipman. Ottawa : Canada Centre for Mineral and Energy Technology, Coal Research Laboratories, 1992. iii, 32 p. : ill. (Report ; CRL 92-7(TR))
MICROLOG 93-03425 1 fiche

Methane gas from many sources is steadily released into the void left behind by mining and accumulates in a sealed area of a coal mine. The gas reservoir in a sealed area is directly influenced by changes in barometric pressure, with the greatest quantity of methane released into the mine's ventilation network during periods of rapidly falling barometric pressure. The 8 East District of Lingan Mine was chosen as the trial site because the area was being sealed at the time. Nine continuously recording instruments were used to measure barometric pressure, the differential pressure across the seal, the methane and oxygen levels at selected locations inside the sealed area, the vacuum pressure in the main methane drainage line, the differential pressure across an office plate in the methane drainage line to the district, the pressure at the orifice plate relative to ambient conditions and the methane content of the ventilating air used to sweep the level before and after any gas from the sealed area is added to it. This report provides the results of the measurements.

Monitoring costs and their implications for direct dischargers in the Ontario Mineral Group A sector : final report

Ontario. Ministry of the Environment. Socio-Economic Section. Toronto : The Section, 1989. vii, 66 p. : ill. Bibliogr. ISBN 0-7729-6115-8
MICROLOG 93-02330 1 fiche

The Municipal-Industrial Strategy for Abatement (MISA) program is a regulatory program with the ultimate goal of virtual elimination of persistent toxic contaminants from all discharges to Ontario waterways. This report provides estimates and evaluates the implications of the incremental capital and operating costs to 67 metal and salt mines and associated refinery and smelting plants that directly discharge into the waterways. Capital and operating costs were estimated for sampling and analytical requirements, toxicity testing, flow measurement and reporting. Because of uncertainties as to how mines would implement the sampling requirements, two scenarios were developed, one of which assumes that sampling would be undertaken by mine personnel, and the other that sampling would be contracted out.

Monitoring of large mining induced seismic events

by M. Plouffe...et al. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1993. iii, 14 p. Bibliogr. (Report ; MRL 93-008(TR))
MICROLOG 93-05438 1 fiche

CANMET/MRL's contribution to the Canadian Rockburst Research Program is the study of the mining induced seismic events located in the upper range of magnitude, 1.0 and above. To achieve this objective, a remote-controlled macroseismic system was designed and developed that is now operating in four mines across northern Ontario. A menu-driven waveform analysis software was also developed in-house to analyze the waveforms recorded. To determine magnitude from local mine camps, a network of eight regional seismograph stations is being operated, with the most important part of the network the Sudbury local telemetered network that includes three uniaxial and one triaxial outstations. Empirical local magnitude scales were developed to extend national magnitude values to smaller seismic events.

Montrose/Santa Rosa area redevelopment plan, Bylaw no. 6767, January, 1983 : amended April 10, 1990, Bylaw 9258

Edmonton : Edmonton Planning and Development Dept., 1990. iii, 118 p. : ill., maps.
MICROLOG 93-03407 2 fiche

The Montrose/Santa Rose area of Edmonton is an older, inner city neighbourhood with an area of about 90 hectares made up of a variety of land uses, designated as general urban. This redevelopment plan concentrates on increasing the compactness of residential development and using existing developed areas for accommodating growth and improving services. It will also increase the amount of future housing in the inner city, establish density nodes around LRT stations, and encourage the development of intensive mixed-use employment nodes at LRT stations. Established commercial areas will be stabilized and a wide variety of commercial activities accommodated, with the relocation or upgrading of obsolete or noxious industrial uses encouraged, and the impact of transportation on inner city communities minimized. This document details the proposed policies for land use, transportation, recreation, and municipal services in the area.

Mortality among Kitchener fire fighiers and Waterloo Regional Police officers from January 1, 1973 to December 31, 1990 with special reference to the fire at Horticultural Technologies Limited on March 6, 1987

by M.M. Finkelstein. Toronto : Ministry of Labour, Health and Safety Studies Unit, 1991. v, 49 p. : ill. *CSI 56258.200*
MICROLOG 93-00552 1 fiche

On March 6, 1987 71 firefighters from the Kitchener Fire Department and 19 police officers from the Waterloo Regional Police Force were dispatched to a fire at Horticultural Technologies Limited (HT) in Kitchener which manufactured cut flower foods, Floral Aerosol, and horticultural foam. The plant also contained materials including foams, inks, dyes, aerosol paints and adhesives. In the 3 years following the fire, 2 firefighters at the HT fire died of cancer, and another firefighter and a police officer were diagnosed with cancer. The men became concerned that exposures at the fire scene caused the tumours. This document examines the cancer experience of the Fire and Police Departments, with particular reference to attendance at the HT fire.

Mortgage broker survey

by D. Cartwright, M. Ainger and K. Ross. Toronto . Ministry of Financial Institutions, 1992. iii, 59 p. *Cover title: Results of the mortgage broker survey. CSI 55097.200*
ISBN 0-7778-1134-0
MICROLOG 93-07386 2 fiche

A survey of mortgage brokers in Ontario was conducted to obtain information on activities undertaken, volume of business, and profiles of borrowers and investors. The survey was conducted in July 1992 by means of a mandatory, self-completed questionnaire sent to 791 mortgage brokers. This report is based on a total sample of 538 brokers, of whom 45 were active in the business and 87 were partially active in their latest fiscal year. A further 66 brokers were not active in the business.

The Mosquitoes of Canada : *Diptera, culicidae*

by D.M. Wood, P.T. Dang and R.A. Ellis. Ottawa : Dept. of Agriculture, Research Branch, 1979. 390 p. : ill., maps. Bibliogr. (The Insects and arachnids of Canada ; pt. 6) ISSN 0706-7313 ISBN 0-660-10402-4
MICROLOG 93-07796 5 fiche

Throughout Canada, mosquitoes are familiar to everyone as biting pests. In addition to their importance as a nuisance, a few species occasionally create problems out of all proportions to their numbers by transmitting disease organisms. This publication identifies adults and fully grown larvae. It presents information on its general biology, geographic distribution, phenology, anatomy, methods of collecting, rearing, and preserving mosquitoes, a key to the genera of mosquitoes in Canada, subfamilies, and species potentially occurring in or incorrectly recorded from Canada.

Motor vehicle emission inspection and maintenance program implementation in the Greater Vancouver Regional District and the Lower Mainland

Vancouver, B.C. : I/M Implementation Task Force, 1989. vi, 113 p. : ill. Bibliogr.
MICROLOG 93-07911 2 fiche

A motor vehicle emission inspection and maintenance (I/M) program is a system for the reduction of air pollution through mandatory testing of emissions and/or inspection of pollution control equipment to ensure that vehicles are properly maintained and have not been tampered with or misfuelled. The federal government has imposed stringent emission standards for both light and heavy duty motor vehicles at the point of manufacture in Canada or importation into Canada. A program for the testing and regulation of emissions from in-use motor vehicles is required to ensure full benefit from the public investment in emission control equipment on new vehicles. This report documents the findings of an I/M Implementation Task Force set up in May of 1989 to complete the preliminary design of a motor vehicle emission inspection and maintenance program for the Greater Vancouver Regional District (GVRD) and the areas in the Lower Mainland to the east of the GVRD.

Movements and distribution of the porcupine caribou herd, 1970-90

by D.E. Russell...et al. Delta, B.C. : Canadian Wildlife Service, Pacific and Yukon region, 1988. 139 p. : ill. Bibliogr. (Technical report series ; no. 138) ISSN 0831-6481 ISBN 0-662-19252-Y
MICROLOG 93-03241 3 fiche

This report represents 20 years of data on the movements and distribution of the international Porcupine caribou herd. Surveys have been conducted by numerous companies and government agencies in response to a few significant development proposals. The report brings together all known data (digitized on a SPANs geographic information system) to standardize the information that is increasingly being used to map sensitive habitats, explore distribution in relation to snow conditions and insect levels, and other relevant conditions. For all distributions, the area occupied and, when available, an estimate of the number of animals associated with each distribution is reported.

A series of 24 focus group discussions were held in order to assess and explore attitudes towards multiculturalism. Eighteen groups were selected on the basis of conformist or multiculturalist attitudes towards multiculturalism and 6 groups consisted of youths, divided into separate male and female groups. The primary purpose of the focus group discussion was to explore the relationship between ethno-cultural diversity, racial discrimination, multiculturalism, and nation building. This report provides a summary of the focus group discussion findings. It presents detailed results of each focus group session in the form of verbatim transcripts of each focus group discussion.

Multidimensional simulations of fuel-rod appendage effects on pressure drop and heat transfer in an annulus flow

by A.O. Banas...et al. Chalk River, Ont. : Atomic Energy of Canada Limited, Chalk River Laboratories, 1992. 24 p. : ill. Bibliogr. *At head of title. AECL research. Presented at the 17th CNS annual Simulation Symposium.* ISSN 0067-0367 ISBN 0-662-20085-3
MICROLOG 93-03869 1 fiche

The general-purpose Computational Fluid Dynamics code, Harwell-FLOW3D, was used to simulate the effect of fuel-rod obstructions on pressure drop and heat transfer in single-phase, turbulent flows in a concentric annular channel. This report gives the results of two- and three-dimensional simulations for obstructions approximating the geometry of bearing pads used in 37-element CANDU fuel bundles. Pressure-drop penalty and augmentation of heat transfer were quantified and correlated with the obstruction geometrical parameters and the dimensionless numbers representing operating conditions. The predicted effects on pressure drop were compared with several experimental correlations.

Multilateral trade negotiations -- Rev.

by A. Chapman. Ottawa : Library of Parliament, Research Branch, 1992. 28 p. Bibliogr (Current issue review , 87-14E) *French ed. (Les Négociations commerciales...) on the same fiche. Revised 22 May, 1992* ISBN 0-660-14622-3
MICROLOG 93-00721 1 fiche

In September 1986 ministers representing the then 92 member nations of the General Agreement on Tariffs and Trade (GATT) met in Punta del Este, Uruguay, to discuss reforms to the international trading system. Agreement was reached for the formal launching of an eighth round of multilateral trade negotiations (MTN). The success of the current MTN is especially important to Canada, given that it is still a relatively small, resource-based economy with a high dependency on international trade. This paper examines the threats to the GATT system, the major negotiating issues in the Uruguay round, and the Canadian position in these negotiations.

Multiple dykes in the Chan Formation, Yellowknife greenstone belt : progress report

by K. MacLachlan. Yellowknife : Indian and Northern Affairs Canada, NWT Geology Division, 1992. 6 p. (Open file ; EGS 1992-4)
MICROLOG 93-04447 1 fiche

This project was initiated in May 1991 to study the field relationships and chemical affinities of mafic dykes, gabbroic and anorthositic bodies, and mafic volcanic rocks in the Chan Formation at the base of the Kam Group in the Yellowknife greenstone belt. The work is being conducted to determine the origin of the dyke complex and to assess whether these rocks formed in an intracontinental rift or oceanic basin environment. The detailed mapping near Oro Lake was undertaken in July and August 1991 and compiled with previous mapping in the area to give a first impression of the temporal and spatial relationships among the various rock types as well as their relative abundance. A number of different sets of dykes were distinguished in the field, based on cross-cutting relationships, weathering colour, mineral assemblages, and phenocryst content.

Multiple-symbol differential detection of DPSK with frequency offset (U)

by M. Turgeon. Ottawa : Defence Research Establishment Ottawa, 1991. xi, 42 p. : ill. Bibliogr. (Technical note ; no. 92-5)
MICROLOG 93-01768 1 fiche

A ground terminal (GT) simulator for an extremely high frequency (EHF) satellite communications (SATCOM) system is being developed as part of the EHF SATCOM project at Defence Research Establishment Ottawa

Copies of these documents are available from:
Micromedia Ltd., 240 Catherine St., Suite 305, Ottawa ONT K2P 2G8
(613) 237-4250 FAX (613) 237-4251

(DREO). The GT demodulator uses multiple-symbol differential detection of DPSK (MSDPSK), a demodulation technique that estimates the phase reference of a differential phase-shift keying (DPSK) modulated, burst signal over a sequence of N symbols. The technique improves upon the bit error rate (BER) performance of DPSK and approaches that of differentially encoded phase-shift keying (DEPSK). This project investigates the BER performance and presents the simulation results. The effects of offset frequency are also investigated and results are presented for a burst-mode transmission with a variable sequence or window size for the phase reference approximation.

Municipal option : local authority for health and social services

Ottawa : Association of Municipalities of Ontario, 1993. 48 p. (Policy direction series ; HSS93D01) ISBN 1-55140-000-6
MICROLOG 93-04510 1 fiche (Available on fiche only)

This paper proposes a future policy direction for the role of municipalities in health and social services. It has been prepared to serve as a starting point for discussion amongst municipalities and with the provincial government. It presents a major, long-term vision for a future municipal role in the belief that this comprehensive framework is necessary to provide a consistent direction for individual health and social services reforms and that municipalities should take the lead in defining their future role.

Mussel aquaculture development planning report

prepared by the Subcommittee on Mussel Aquaculture Development ; under the direction of D.J. Scarratt. Halifax : The Dept., 1992 28 p. (Manuscript and technical report series , project report no. 92-07)
MICROLOG 93-06806 1 fiche

A sector development plan is presented for mussel cultivation in Nova Scotia. At its present stage of development the Nova Scotia mussel industry comprises a handful of large enterprises (production over 100 metric tonnes/year), a larger number of farms of intermediate size, and a number of small experimental or hobby farms producing at most a few thousand kilograms. The plan considers the climate for industry development, site criteria, seedstocks, technology and research, processing and marketing, financial aspects, training, and habitat. The potential for development and a suggested program for development are presented.

The NAFTA's impact on the North American investment regime

by M. Gestrin and A.M. Rugman. Toronto : C.D. Howe Institute, 1993. 20 p. Bibliogr. (Commentary ; no. 42) *At head of title: The NAFTA papers.* ISSN 0824-8001 ISBN 0-88806-316-4
MICROLOG 93-07766 1 fiche

This document discusses three key differences between the Free Trade Agreement and the North American Free Trade Agreement (NAFTA) investment chapters. It also discusses the extent to which NAFTA actually liberalizes the North American investment regime. It provides a summary of the sectoral reservations by country: Canada, the United States, and Mexico. Finally, it argues that NAFTA fails to address two problems of growing concern in the North American investment regime. The first is the lack of standards to ensure fair, nondiscriminatory investment review procedures in the three countries and the second consists of certain investment policies in the United States that discriminate against foreign investors on the basis of often specious national security arguments.

A National Conference on Social and Economic Rights in Canada

sponsored and planned by Canadian Council on Social Development...et al. Ottawa : The Council, 1992. 32, 34 p. *Bilingual (Conférence nationale sur les droits sociaux...).*
MICROLOG 93-06389 1 fiche (Available on fiche only)

The conference was an information sharing experience involving the participation of over 75 equality seeking and social policy organizations. It examined the particular experiences and concerns of women, persons with disabilities, racial and ethnic minorities and children Representatives from Quebec and aboriginal people shared their vision of social and economic rights in the context of their collective rights and, in particular, their right to self-determination. Conference discussions about the protection of social and economic rights in the Constitution were based on the understanding that for people in Quebec and aboriginal nations this might be achieved by some other mechanism. This report attempts to summarize the major views, observations and opinions of both speakers and participants. Hopefully, it will assist readers in realizing the importance of protecting and promoting our social and economic rights.

A National pollutant release inventory for Canada : final report

Multi-stakeholder Advisory Committee (Canada). Ottawa : Multi-stakeholder Advisory Committee, 1992. 49, 49 p. *Bilingual (Inventaire national des rejets...)*
MICROLOG 93-07207 2 fiche

This reports deals with the design of the data base for pollutants, called the National Pollutant Release Inventory (NPRI). The NPRI's benefits to the Canadian public, industry and governments is to identify priorities for action; encourage voluntary action to reduce releases; allow tracking the progress of release reductions; improve public understanding; and support targeted regulatory initiatives. This report recommends the design and reporting procedures for the NPRI.

National rail network study : international review of rail infrastructure policies

by J. Jones ; with research assistance from A. Pignal ; prepared for Transportation Association of Canada. Kingston, Ont. : Queen's University, Canadian Institute of Guided Ground Transport, 1992. xvi, 75 p. : maps. Bibliogr. (CIGGT report ; no. 92-2) *CSI 97964.204.* ISBN 0-88911-111-1
MICROLOG 93-06523 1 fiche (Available on fiche only)

This study examines the international experience in the development of transportation policies that are based on strategic objectives for rail infrastructure development and investment. The study includes Australia, Europe (France, Germany, Sweden, Switzerland, and the United Kingdom), and the United States. In all instances, the objectives were to understand the background, context, influencing factors, and options that were considered in introducing rail infrastructure policies; obtain candid assessments of the effectiveness of such policies and insight to changes that are being considered to address deficiencies; and to assess the relevance of these policies and experience to Canada and to the potential application of such policies to the Canadian context.

Native child care in Canada

by H. McKenzie. Ottawa : Library of Parliament, Research Branch, 1991. 30 p. Bibliogr. (Background paper ; BP-284E) *French ed. (La Garde des enfants...) on the same fiche.* ISBN 0-660-14573-1
MICROLOG 93-01848 1 fiche

Native children in Canada have always been 'legally different.' This difference, or special status, is based on the legal distinctions established by Canada's constitutional provisions and the stipulations of the Indian Act. The creation of special status has led to the evolution of a child care system that is less effective for aboriginal children than for others in society. This document discusses jurisdictional problems in the federal-provincial division of powers, the need for and development of native children's services, native child care needs, existing native child care services, and inquiries and recommendations.

Natural gas for power generation in Alberta : an electric utility perspective

by L.W. DeBlois. Montreal : Canadian Electrical Association, Engineering and Operating Division, Power System Planning and Operation Section, Generation System Planning and Operation Subsection, 1992. 14 p. : ill Bibliogr. *Presented at the Canadian Electrical Association Engineering and Operating*

Conference.
MICROLOG 93-06094 1 fiche

This paper addresses some of the issues surrounding planning the future use of natural gas for power generation in Alberta. It opens with a description of the structure of the industry, with electric utilities, load distribution, existing generation and transmission facilities and goes on to describe new capacity requirements, generation resource alternatives, and fuel availability and pricing. The paper then discusses the economics of resource alternatives with evaluation, and risks and uncertainties. Advantages of natural gas including transmission support, cogeneration, hydro management and small resource utilization precede the document's conclusion.

Natural gas for power generation in Canada : long term supply/demand and transportation issues

by M. Van Egteren. Montreal : Canadian Electrical Association, Power System Planning and Operating Section, Generation System Planning and Operation Subsection, 1992. 20 p. : ill. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06092 1 fiche

This paper details the major advantages of natural gas, inclusive of the economic and environmental advantages, as a fuel for electrical generation. It focusses on the availability and reliability of natural gas, 2 issues of critical importance to utility electric generators and non-utility generators and their regulators. Availability of gas is discussed in the context of up-to-date outlooks for long-term gas supply as compared to demand, inclusive of producer expectations for low price escalation in the long-term. Reliability of gas is addressed in terms of short- and long-term reliable transportation arrangements.

The Natural rate, scarring, cycles, shocks, persistence, and hysteresis

[by] R.S. Preston, Haider Saiyed and Andrew Burns ; with the assistance of P. Nevin. Ottawa : Economic Council of Canada, 1992. v, 86 p. : ill. Bibliogr. (Working paper ; no. 44) *French ed. (Taux naturel, cycles de...) : 93-00123/1. CSI 22215.273.* ISSN 1180-3487
MICROLOG 93-00122 1 fiche

This paper introduces a theoretical model of the unemployment rate that is age-group based. It examines some econometric implications which arise when aggregating age group unemployment rates generated from this model. It also estimates a variant of this model, using seemingly unrelated variable techniques, which builds on the principles set out in the theoretical model. It looks at the dynamic implications of this structure for the aggregate natural rate equation in the presence of outside shocks and cycles. Finally, it looks at the implications of these findings for public policy.

Near-threshold fatigue crack propagation behaviour of Darlington Unit 2 generator rotor material

by O.E. Lepik and H. Seahra. Toronto : Ontario Hydro, Research Division, 1992. ii, 52 p. : ill. Bibliogr. (Report ; no. 91-47-K)
MICROLOG 93-03016 1 fiche

The fatigue crack propagation threshold is an important design parameter in components subjected to high frequency low amplitude loading. For such components, it can be used as a design criterion in the safe crack growth approach, where it is required that any postulated initial damage grows slowly and will not reach a size large enough to cause failure during the component's service life. This report details an experimental program to determine the fatigue crack propagation threshold of material from the Darlington Nuclear Generating Station Unit 2 failed generator rotor. The threshold was determined at a stress ratio of R=-1 in a simulated generator rotor operating environment at 100C. A parallel investigation is also being conducted by ASEA Brown Boveri, the general manufacturer.

Neck injuries amongst motor vehicle occupants involved in a collision

by C. Laberge-Nadeau, X.-T. Tao and U. Maag. Montreal : Université de Montréal, Centre de recherche sur les transports, 1993. 47 p. Bibliogr. (Publication ; no. 885)
MICROLOG 93-05277 1 fiche

This report presents characteristics of car occupants involved in motor accidents in the province of Quebec in 1987 who sustained at least a neck injury. It examines also the duration and the cost of indemnization to these victims. The study is based on data obtained from the government insurance board and the sample used includes 4,328 victims. Frequency, nature, and severity of the neck injuries were examined as a function of occupant and accident parameters. The analysis also includes the costs for medical treatment not covered by provincial hospitalization and health insurance, rehabilitation, compensation for pain, anatomico-physiological deficits, and time lost from work (income replacement).

The Need for public discussion : the relations between aboriginal peoples and the other inhabitants of Québec

Montreal : Gouvernement du Québec, Ministère du Conseil exécutif, Secrétariat aux affaires autochtones, 1991. 39 p. ISBN 2-551-14857-X
MICROLOG 93-04240 1 fiche

In February 1991, the Government of Quebec accepted the principle of a government policy on aboriginal matters. This document identifies reference points for reflection: the long-term objective, human geography, the historical context, constitutional reform, the distinction between ethnic minorities and aboriginal people, cultural and social phenomena, and the notions of difference and inequity. It also identifies three areas in which differences exist: cultural differences, socioeconomic differences, and differences in status. It discusses self-government issues.

The Needs of the adult disabled persons in personal care homes

by P. Soltys. Winnipeg : Manitoba Health Services Commission, Long Term Care Programs Division, 1990. 46 p. : ill. Bibliogr. *CSI 42119.200.*
MICROLOG 93-02941 1 fiche

The study of the needs of disabled Manitobans in personal care homes was initiated in hopes of identifying solutions to the growing problem of meeting the needs of young disabled persons in environments specifically designed for the elderly. This situation is being compounded by an increase in the severity of the disability of those elders being admitted. This document contains the study findings. It presents trends identified from an analysis of data for the past 10 years. It discusses current needs identified by stakeholders. It also presents current needs identified by stakeholders, predictions based on data analysis, and regional considerations.

A Needs study to identify design improvements required to expand abilities of physically handicapped farmers : final report

Prairie Agricultural Machinery Institute (Canada). Regina : Saskatchewan Agriculture Development Fund, 1990. 45 p. : ill. Bibliogr.
MICROLOG 93-05689 1 fiche

A survey was conducted of 18 farmers with a wide range of disabilities. Each area of their farming practice was examined and five areas of priorities were established, including mobility around the home and farm, access into buildings and equipment, operation of equipment, associated farming tasks, and communication systems. The present abilities and limitations in each area were defined. The ways in which these farmers coped with the difficulties caused by their disabilities was examined and the problems limiting greater participation were probed. This report outlines the problems in the key areas, the solutions applied, and ways in which a system could be set up to provide improvements that would permit many physically handicapped farmers to expand their abilities.

Negotiation in the integration of environmental and economic assessment for sustainable development

by A.H.J. Dorcey. Hull, Que. : Canadian Environmental Assessment Research Council, 1988. 24 p. Bibliogr. (Manuscript report ; MR13-92) *Paper presented at a workshop entitled Towards Integrated Environment and Economic Assessments.*
MICROLOG 93-05373 1 fiche

This paper discusses agreements on the contributions of analytical and negotiating approaches in integrating environmental and economic assessment consistent with sustainable development. It expands the definition of negotiation and outlines recent progress in developing principles and practice; considers the definition and operationalization of the concept of sustainable development; reviews the fundamental issues underlying the appropriate roles for techniques of analysis and decision-making processes; and discusses the role of negotiation in the decision-making processes of governance and in their use of analytical techniques.

Network equilibrium models with combined modes

by E. Fernandez...et al. Montreal : Université de Montréal, Centre de recherche sur les transports, 1992. 25 p. Bibliogr (Publication ; no. 868) (Publication ; no. 846)
MICROLOG 93-05450 1 fiche

Many trips in urban areas are taken by using more than one mode, such as the park'n ride trips that use private car and then one or more public transit modes. This paper presents several approaches to formulating network equilibrium models with combined modes. One of these approaches results in a new network equilibrium model, where the combined model is considered as a distinct alternative in a demand model, and the network flows are suitably modelled on different modal networks. The mathematical structure of the model is analyzed and solution algorithms are outlined.

Neural networks for telecommunications and control

by G. Josin. Montreal : Canadian Electrical Association, Engineering and Operating Division, Telecontrol and Telecommunications Section, 1992. 8 p. : ill. Bibliogr. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06221 1 fiche

Knowledge of neurophysiology offers the motivation for attempting to undertand the fundamental principles in the neurobiology of adaptive systems and their interaction with physcial processes for application to engineering. To this end neural networks from a neurophysiological theory to application example are discussed. An example is presented where the neural network learns to map a non-linear toplogical transformation by merely specifying a training set of input/output examples and a performance specification. When a sufficient number of examples characterize the transformation, the network learns to generalize the mapping. Performance results are presented for training a neural network to learn the inverse transformation for a robot arm to illustrate and clarify the

concept of generalization. The potential of neural network application for telecommunications and control is discussed.

Neutron diffraction measurements of residual stress and texture variations in rail steel

by J.H. Root, R. Klassen, and T.M. Holden ; prepared for the Transportation Development Centre, Policy and Coordination Group, Transport Canada. Ottawa : Atomic Energy of Canada Limited, 1990. 21 p. : ill. Bibliogr.
MICROLOG 93-03570 1 fiche

This report gives the results of measurements of the angles and intensities of neutron diffraction peaks as a function of position in the heads of two rails. From these data the residual stress and texture variations are determined for both roller-straightened and head-hardened rails. The residual stress variations were also estimated by an acoustic birefringence technique in samples taken from adjacent positions in the rails from which the neutron diffraction samples were obtained. The two sets of data were then compared to investigate their consistency.

Neutron radiation induced degradation of diode characteristics (U)

by S.M. Khanna, G.T. Pepper and R.E. Stone. Ottawa : Defence Research Establishment Ottawa, 1992. xi, 34 p. : ill. Bibliogr. (Report ; no. 1155)
MICROLOG 93-05028 1 fiche

It is well known that nuclear radiation can destroy or substantially degrade the performance of semiconducting electronic devices and systems. As a first step in understanding the radiation damage mechanisms in such devices, it was decided to study the electrical characteristics of different varieties of diodes. This report provides the results of the effects of neutron radiation on the current-voltage (I-V) characteristics of 12 different types of commercial p-n, p-i-n, and Schottky diodes. A classification scheme consisting of three types of neutron effects on diode forward characteristics is proposed and the results are explained qualitatively.

A New analysis of the multipath radar data measured by standard telecommunication laboratories

by E.K.L. Hung, R.W. Herring and J.E. Morris. Ottawa : Defence Research Establishment Ottawa, 1992. ix, 26 p. : ill. Bibliogr. (Report ; no. 1138)
MICROLOG 93-04244 1 fiche

This report contains a new analysis of the low-angle tracking radar data measured by Standard Telecommunications Laboratories in summer 1991. The radar was an X-band array antenna located at the Fraser Gunnery Range near Portsmouth, United Kingdom. The targets were Hunter and Canberra aircraft flying low over the English Channel. An optical tracker, mounted close to the receive array, provided an independent measure of the target elevation. The data were previously analyzed but in a limited way that did not account for the fact that the SVD method produces more signal elevation estimates than other direction-finding methods. This new analysis is concerned with the development of a practical method for selecting target elevation estimates and studies all the candidate signal elevation estimates generated by the SVD method.

A New approach to architectural modelling and dynamic analysis of information systems and business processes

by C.V. Bochmann...et al. Montreal : Centre de recherche informatique de Montréal, 1992. 24 p. : ill. Bibliogr. (Collection scientifique et technique) (Rapport technique ; CRIM-92/12/10) ISBN 2-921316-08-0
MICROLOG 93-03318 1 fiche

Methodologies for the architectural modelling and high-level requirements specification of business processes and informational systems are becoming increasingly important but lack generality, expressiveness and validation facilities. This report describes a new methodology which is meant to comprehensively support the aspects of technology, business, and information architecture as well as the work organization of enterprises. The methodology includes an object-oriented framework and supports structural descriptions at different levels of detail. The approach has a precise semantics that allows for the validation of architectural specifications by means of logical and performance analyses. It covers static architectures as well as the dynamics of product and information flows and resource utilization. To support and validate the approach, a system called Macrotec was developed. This report discusses the methodology and the Macrotec tool.

New Brunswick-New England air service study : final report

submitted to New Brunswick Dept. of Transportation...et al ; by Fiander-Good Associates Ltd. Fredericton : The Corporation, 1991. 199 p. : ill.
MICROLOG 93-02734 3 fiche

This study analyzed current issues regarding air service between New Brunswick and the New England States, including the potential for improving scheduled air service, the level of usage of air services at Maine airports by New Brunswickers, the potential for fly-drive tourist traffic entering New Brunswick, and the direct and spin-off economic benefits that would be generated from an improved transborder traffic. Information was obtained from a survey of the business community, interviews with several travel agents in New Brunswick and Maine, discussions with airline officials, government officials and industry representatives and various publications. The geographic study area included all of New Brunswick, that part of Nova Scotia served by the Moncton airport, the area of Quebec served or potentially served by Charlo, Edmundston and St. Leonard, the New England States and New York City.

A New dynamic traffic assignment model

by O. Drissi-Kaitouni and M. Gendreau. Montreal : Université de Montréal, Centre de recherche sur les transports, 1992. 18 p. Bibliogr (Publication ; no. 854)
MICROLOG 93-01791 1 fiche

This paper proposes a new dynamic traffic assignment model for the analysis of variations over time of the traffic flows on a road or street network during a day or peak period. The main element of the model is a within-day submodel that performs a macroscopic discrete-time simulation of traffic flows over the network on a specific day for a given set of travel decisions by the drivers. The submodel enforces the first-in-first-out discipline on all links at all times and allows for a detailed modelling of the interactions at road or street junctions.

A New technique to estimate precipitation using GOES and radar data

by M.T.A. Makhdoom, W.D. Hogg and D.W. Colwell. Downsview, Ont. : Atmospheric Environment Service, Canadian Climate Centre, 1988. iv, 22 p. : ill. Bibliogr. (Report ; no. 88-6)
MICROLOG 93-00294 1 fiche

This report presents an investigation to develop a new technique to estimate precipitation using Geostationary Operational Environmental Satellites visible and infrared (IR) data. The use of combined satellite and radar data, wherever available, was also investigated. The developed methodology is based on a threshold optimization technique combined with a statistical model whose parameters are selected on the basis of a physical/mathematical model. Optimum threshold temperature and brightness are selected on the basis of the least standard prediction error of validation using a split sampling technique. The results obtained using the developed technique are also compared with those obtained using some of the existing techniques.

New technologies in hydrometric measurements

by P. Desroches. Montreal : Canadian Electrical Association, Engineering and Operating Division, Hydraulic Power Section, Hydraulic Structures Subsection, 1992 10 p. *Presented at the Canadian Electrical Association Engineering rnd Operating Conference*
MICROLOG 93-06069 1 fiche

The rapid technological evolution in electronics and computers present numerous opportunities for innovation in metering activities. Continuous, accurate and reliable monitoring of phenomena's evolution at stationary networks' points can be made at competitive costs and the stream of data can be analyzed almost in real time from headquarters, by use of teletransmission. Geophysics sounder, georadar, airborne and satellite imagery, show instant spatial distribution of related phenomena. If properly applied, these new capabilities have a very high cost-benefit ratio. They offer powerful tools for the understanding of very complex interrelations between physical parameters, especially in the domain of ecology and impact assessment.

technology over the past few years that enables maintenance personnel to determine winding conditions both more effectively and more efficiently. In particular, the paper discusses improvements to the PDA test to detect hydrogenerator stator winding insulation problems by measuring partial discharge activity; the development of the TGA test, similar to the PDA test, but relying on more advanced technologies to allow on-line partial discharge testing of turbine generators and large motors; and the creation of an expert system computer program that enables utilities to determine the overall condition of machine rotor and stator windings, based on a wide variety of test and inspection data, plus historical data.

New volumetric sampler increases speed and accuracy of peat surveys

by J.K. Jeglum...et al. Sault Ste Marie, Ont. : Forestry Canada, Ontario Region, 1991. 4, 4 p. : ill. Bibliogr. (Technical note ; no. 9) *French ed. (Augmentation de la rapidité ..) on the same fiche. At head of title: Frontline, forestry research applications.* ISSN 1183-2762 ISBN 0-662-19439-X
MICROLOG 93-06469 1 fiche

To characterize peatland sites, volumetric samples of surface organic layers are needed for baseline studies. To meet this need, a sampling tool was developed that quickly extracts a relatively undisturbed volume of peat. This note provides a description, operation, design and operating considerations, and productivity of this new sampling tool.

The Niagara River mussel and leech biomonitoring study : report

by L. Richman. Toronto : Environment Ontario, 1992. v, 61 p. : ill. Bibliogr. ISBN 0-7778-0228-7
MICROLOG 93-03398 1 fiche

The Niagara River Toxics Committee was established in 1981 by the federal governments of Canada and the United States and the province of Ontario and state of New York. The data generated by the 1989 Niagara River Biomonitoring survey augments ongoing Niagara River toxics management plan programs by providing information on contaminant levels in the river between Fort Erie and Niagara-on-the-Lake. This report presents the results of the 1989 mussel and leech biomonitoring survey. Caged mussels and leeches were exposed to the Niagara River for three weeks, after which the tissues were analyzed for PCBs, organochlorine pesticides, chlorinated benzenes, polycyclic aromatic hydrocarbons (PAHs) and metals. Sediment samples were collected at selected sites and analyzed for organic and inorganic contaminants and polychlorinated dioxins and furans.

Nickel/cobalt recovery from midwest raffinate solution : project final report

Midwest Joint Venture (Firm). S.l. : The Corporation, 1992. 2 v. : ill. *Contents: Vol I : Report and Appendix A -- vol II : Appendices B-E. CANMET contract: 23440-1-9153-01-SQ.*
MICROLOG 93-01573 3 fiche

Extensive metallurgical research was performed to develop a process for recovering uranium from the Midwest deposit in northern Saskatchewan. During the course of this research, information became available that suggested that recovery of nickel and cobalt from the uranium raffinate could be economically feasible. This test program was conducted to investigate methods of separating nickel and cobalt from radioactive and other metal contamination to permit production of a saleable product. An extensive literature review was first conducted that produced three possible methods, one of which was pursued and is described in this report.

Nitrates and pesticides in the Abbotsford aquifer, southwestern British Columbia

by H. Liebscher, B. Hii and D. McNaughton. Ottawa : Environment Canada, 1992. 83 p. : ill. Bibliogr.
MICROLOG 93-03730 1 fiche

The Abbotsford aquifer is composed of extensive surficial sand and gravel deposits located in southwestern British Columbia and extending across the international boundary into northwestern Washington State. This report reviews concentrations of nitrates and selected pesticides detected in ground waters in the south Matsqui and Abbotsford municipalities, collected from 1955-90 from an increasing number of monitoring locations. In the early period, chemical analyses were confined to traditional inorganic constituents. From 1970-83, focus shifted to measuring nitrates. Analysis of pesticides was begun in 1984. Samples were collected and analyzed from a large number of wells and piezometers over extended, and often irregular, time intervals

Nitrogen, phosphorus and rhizobial strain responses by lentil

Regina : Saskatchewan Agriculture Development Fund, 1988. 22 p.
MICROLOG 93-05074 1 fiche

This study evaluated the effects of nitrogen, phosphorus, and inoculation on the yield of lentils. Experiments were conducted in the brown, dark brown, and black soil zones Nitrogen was applied at five rates, phosphorus was applied at two rates, and lentil was inoculated with either the Nitragin C inoculant, a new strain called 99A1, or remained uninoculated. Total dry matter production, total grain yield, total nitrogen, and amount of nitrogen derived from nitrogen fixture were measured. Lentil were grown on cereal stubble and the sites had not been previously cropped with grain legumes. At the end of the growing season, lentils were treated with Reglone to promote ripening

No place like home : building sustainable communities

by M. Nozick. Ottawa : Canadian Council on Social Development, 1992. xiii, 237 p. Bibliogr. ISBN 0-88810-415-4
MICROLOG 93-03874 3 fiche (Available on fiche only)

Sustainable community development is a community-based approach to development which relies on self-help, community economic development and ecological principles. This document begins by examining the present state of the global economy as a backdrop for an alternative economic vision. It then looks at five major themes which constitute a framework of action for building sustainable communities. These are. working toward self-reliance, harmonizing with nature, attaining community control, meeting individual needs, and building a community culture.

NOGAP B.6, vol. 9 : hydrocarbon determinations, Mackenzie River and Beaufort Sea

by M.B. Yunker...et al. Sidney, B.C : Dept. of Fisheries and Oceans, Institute of Ocean Sciences, 1992. v, 286 p. : ill. Bibliogr (Canadian data report of hydrography and ocean sciences ; no. 60) ISSN 0711-6721
MICROLOG 93-02857 4 fiche

A major inter-disciplinary study was conducted as part of the Northern Oil and Gas Action Program to measure the transport and fate of hydrocarbons over the Beaufort Shelf and the primary productivity of the coastal waters. A spring and summer sampling program was conducted in 1987, with the spring program operated out of Tuktoyaktuk Polar Continental Shelf project using fixed-wing and rotary-wing support vehicles to carry out the sampling and the Mackenzie River Delta sampling carried out during two 10-day trips from Inuvik in June and July using a workboat. To complete the field program, a cruise was carried out on the CSS JOHN P. TULLY in the summer of 1987. This report describes methods used to collect and analyze the hydrocarbon samples and the analytical results for fractionated samples with concentrations reported for alkanes, alkenes, hopanes and other triterpenes, polycyclic aromatic hydrocarbons, alcohols and sterols.

Non-charitable purpose trusts

Winnipeg : Manitoba Law Reform Commission, 1992. iv, 62 p. Bibliogr. (Report ; no. 77) ISBN 0-7711-0889-3
MICROLOG 93-02268 1 fiche

This document provides an overview of the law of trusts, focusing on the requirements for a valid trust and the distinction between trusts for the benefit of persons and for the benefit of purposes. It deals with the two major problems that can invalidate a non-charitable purpose trust: the absence of a person to enforce the trust and the absence of a mechanism to correct any uncertainty in the method by which the trust is to be carried out. It also deals with the subsidiary issue of trusts which have more than one purpose (charitable or non-charitable). It presents amendments to the Trustee Act which would give effect to the recommendations contained in this report.

MICROLOG 93-00991 1 fiche

A housing sponsor will have to pay GST on the purchase of many goods and services, and may also have to charge GST on the provision of some goods, property, and services. This guide is designed to provide some basic background on how the GST affects the ongoing operations of housing projects. It also provides assistance in determining whether organizations should register as a collection agents for the tax. By following the steps and filling out the worksheets, readers should be able to determine the impact of the GST on the project.

Non-seismic technologies in support of a nuclear test ban

Ottawa : External Affairs and International Trade Canada, 1993. i, 40 p. : ill.
MICROLOG 93-07201 1 fiche

Considerable scientific research has been conducted on the use of seismic techniques for the detection, identification, and location of underground nuclear tests. This paper addresses the importance of the continued use of seismic analysis for underground nuclear test ban monitoring, while at the same time recognizing that other potentially useful non-seismic technologies, when used in a multi-layered approach in conjunction with traditional methods, could make also make an important contribution. Other non-seismic technologies are described that are examples of the types of expertise identified in Canada.

The Nonlinear bilevel programming problem : formulations, regularity and optimality conditions -- Rev.

by Y. Chen and M. Florian. Montreal : Université de Montréal, Centre de recherche sur les transports, 1993. 30 p. Bibliogr. (Publication ; no. 794) (Publication ; no. 782)
MICROLOG 93-08971 1 fiche

The bilevel mathematical programming problem (BLPP) is an optimization problem with a special constraint function, which is implicitly determined by another optimization problem. This paper studies regularity and optimality conditions for the BLPP by using a newly proposed marginal function formulation. It addresses the regularity issue by exploring the structure of the tangent cones of the feasible set of the BLPP.

North American Free Trade Agreement : Canadian environmental review

Ottawa : External Affairs and International Trade Canada, 1992. vi, 121 p. Bibliogr. *Bilingual executive summary (14, 14 p.) laid in. French ed. (Accord de libre-échange...) : 93-01918/2.*
MICROLOG 93-01917 2 fiche

This document addresses the question of extraterritoriality, identifies how environmental concerns have been incorporated into the text of the North American Free Trade Agreement (NAFTA), and analyses certain environmental proposals that are not reflected in the Agreement. It presents an environmental screening of the NAFTA. It addresses global and atmospheric issues; air and water issues; renewable and non-renewable resources, and toxic substances and waste management It also reviews a number of empirical studies that address the relative importance of environmental considerations in the investment decision. Finally, it identifies the various mechanisms that will be in place to ensure that the relationship between trade and the environment continues to be addressed in the future.

Northern paralegal project evaluation : final report

[for] Legal Aid Manitoba , by the Working Margins Consulting Group. Winnipeg : The Group, 1989. 93 p. : ill. *CSI 42102.200*
MICROLOG 93-00599 2 fiche

The Northern Paralegal Project was begun by Legal Aid Manitoba in September 1987 to improve access to legal services in northern Manitoba by introducing paralegal workers with a northern background and a knowledge of Cree and English who would overcome problems of access to, and communications with, the legal system. This report gives a background and description of the project and evaluates its impact, its operation, and its long term implications.

Northern studies : an historical perspective of the Northern Scientific Training Program

by G. Rowley. Ottawa : Indian and Northern Affairs Canada, 1988. 28, 32 p. *Bilingual (Etudes nordiques : historique du...).*
MICROLOG 93-03462 1 fiche

Nearly thirty years have passed since the first Northern Scientific Training Grants were awarded, and hundreds of students who have received these grants in the past are now involved in many fields of northern endeavour. This document reviews the development of the program from its beginning. It identifies lessons to be learned and where improvements might be made. It looks at the origin of the program, the first grants, the development of the program, the level of funding, the coordination of northern research in Canada, and the grants committee.

Northwest Angle area (NTS 52E/SE and part of 52E/SW), districts of Kenora and Rainy River

by D.R. Hallett and M.A. Roed. Toronto : Ministry of Natural Resources, Ontario Geological Survey ; Ministry of Northern Affairs, 1980. iii, 12 p. : map Bibliogr. (Northern Ontario engineering geology terrain study ; 36) *Fold. map not filmed* ISSN 0709-4671 ISBN 0-7743-4312-5
MICROLOG 93-02316 1 fiche

This report contains an inventory of regional engineering terrain conditions in the Northwest Angle area, districts of Kenora and Rainy River. Information was obtained mainly through aerial photographs checked with published and unpublished literature documenting previous field visits and observations. Two automobile field trips were conducted in 1978 to identify major terrain units and verify the airphoto interpretation. The report describes the geological setting and engineering terrain units, including bedrock, moraine, glaciofluvial, glaciolacustrine, alluvial and organic landforms.

Northwest health services review

Victoria : Ministry of Health and Ministry Responsible for Seniors, 1992. v, 129 p. *CSI 37134.201*
MICROLOG 93-02010 2 fiche

This report outlines the current scope of hospital-based services and departmental operations for Prince Rupert Regional Hospital, Mills Memorial Hospital, and Kitimat General Hospital. It presents the current and proposed profile of Specialist Services for the Northwest Region. It also summarizes a number of hospital management issues arising from the review. It reviews community-based services with respect to Continuing Care, Public Health, Mental Health, Alcohol and Drug, Seniors' Services, and Rehabilitation Services. It identifies a number of issues related to improved co-ordination of health programs from an individual community and regional perspective. Finally, it summarizes the opportunities, within available funding, for enhancement of health services in the Northwest.

Nous avons tenu bon : histoire de la région ouest de l'intérieur de la Nouvelle-Ecosse, 1800-1940

par J.H. Morrison et L. Friend. Ottawa : Environnement Canada, Parcs Canada, Direction des lieux et des parcs historiques nationaux, 1981. 174 p. : ill., cartes géogr. Bibliogr. (Histoire et archéologie ; 47) *L'éd. anglaise (We have held our own : the western...) : 88-04057/2.* ISSN 0227-3551 ISBN 0-660-90665-1
MICROLOG 93-03971 2 fiche

La région ouest de la Nouvelle-Ecosse qui borne le lac Kéjimkujik a été habitée par une population fort variée. A part les Micmacs qui furent les premiers habitants, divers groupes ethniques vécurent dans la région: les Français, les Anglais, les Ecossais et les Irlandais. Les colons, utilisant les ressources naturelles de la région, vécurent de pêche, d'agriculture, du commerce du bois, de l'exploitation minière et, plus récemment, de l'industrie du tourisme Vers le milieu du XXe siècle, les communautés de la région conservaient encore, grâce à leur esprit d'initiative et à leur faculté d'adaptation, une culture distincte et profondément enracinée qui continuait à influencer leur mode vie. Ce document porte précisément sur l'histoire de la région ouest de l'Intérieur de la Nouvelle-Ecosse, de 1800 à 1940.

Un Nouvel horizon : éliminer la violence, atteindre l'égalité : rapport final

Comité canadien sur la violence faite aux femmes. Ottawa : le Comité, 1993. 503 p Bibliogr. *L'éd. anglaise (Changing the landscape : ending violence...) : 93-08642/5.* ISBN 0-660-94249-6
MICROLOG 93-08641 6 fiche

Chaque jour au Canada des femmes sont dénigrées, humiliées, méprisées, insultées, bousculées, victimes de coups de pied ou de coups de poing, etc. Bien sûr, certaines sont plus vulnérables que d'autres mais toutes, simplement parce qu'elles sont femmes, sont victimes potentielles de la violence. Ce document présente le rapport final du Comité canadien sur la violence faite aux femmes. Le rôle du Comité canadien sur la violence faite aux femmes est de faire participer la population canadienne à un dialogue national sur la violence faite aux femmes, dans un contexte interactif et dynamique, afin de formuler de solides recommandations en matière de prévention, d'intervention immédiate et de mise en application de mesures à long terme. Le document se penche précisément sur les points suivants: le contexte; la violence telle qu'elle est vécue, selon les formes, les populations et les institutions; et, le Plan d'action national.

Les Nouvelles populations étudiantes des collèges et des universités : des enseignements à tirer

Conseil supérieur de l'éducation ; avis à la Ministre de l'enseignement supérieur et de la science Québec : le Conseil, 1992. 175 p . ill Bibliogr. ISBN 2-550-15945-4
MICROLOG 93-08297 2 fiche

Cet avis comprend trois chapitres. Le premier montre que le sexe, l'âge, l'origine ethnique, le statut socio-économique et la préparation aux études supérieures constituent des sources importantes de différenciation de la population étudiante et laisse entrevoir de nouveaux profils fort variés. Le deuxième explore tour à tour les rapports substantiellement nouveaux que les étudiants entretiennent avec les études, l'emploi rémunéré et le milieu scolaire. Le troisième dégage les défis d'apprentissage, de pédagogie et de gestion que pose une population étudiante de plus en plus hétérogène et dont le mode de vie lui-même a changé.

Nova Scotia agri-food development strategy

Halifax : Dept. of Agriculture and Marketing ; Nova Scotia Federation of Agriculture ; Ottawa : Agriculture Canada, 1992. 28 p.
MICROLOG 93-02130 1 fiche

In 1991, the Nova Scotia Department of Agriculture and Marketing began work to develop a strategic plan for the agricultural industry. Later, the Nova Scotia Federation of Agriculture and Agriculture Canada joined to cooperate in the development process. The agri-food industry in general has also been involved. This strategy identifies key directions to focus programs, activities and policy initiatives. This document describes the current agricultural industry, including primary production, farm education levels, related agricultural sectors, organizations and cost competitiveness; the need for change, including market dynamics, environmentalism, globalization and fiscal capacity; and the elements of a new strategy. The mission, objectives, principles and future directions of the new strategy are described in detail, including market direction, competitive success, research education and technology transfer, human resource development, agricultural awareness, managing change, and information management.

NOx and SO2 emissions with no. 6 and no. 4 fuel oils at Canadian Forces Base Halifax, January 1992

by F.D. Friedrich, V.V. Razbin and F.L. Wigglesworth. Ottawa : Canada Centre for Mineral and Energy Technology, Energy Research Laboratories, 1992. iv, 47 p. : ill. Bibliogr. (Report ; ERL 92-27(IR))
MICROLOG 93-03427 1 fiche

The work described in this report arises from a program initiated by the Department of National Defence in 1990 to prepared for new emissions standards expected to result from the Federal Industrial Boiler Emissions Control (FIBEC) program. National Defence Canada demonstrated low nitrogen oxide combustion technologies in its heating plants at CFB St. Hubert, which normally burns natural gas, and in CFB Halifax Dockyard, which burns No. 6 (Bunker C) fuel oil. Both use No. 2 fuel oil as a backup. In each plant, one boiler was retrofitted with a state-of-the-art burner employing flue gas recirculation to reduce NOx emissions. The boiler at Halifax was tested in January 1991, using the Bunker C oil normally supplied to the plant. Tests showed that sulphur dioxide emissions were almost double the allowable level and NOx emissions were only marginally reduced, regularly exceeding the limits of the draft regulations by 50 percent. A further series of tests were then held to determine whether NOx emission levels could be achieved with No. 4 fuel oil, also known as Bunker A. This report describes a series of 25 tests conducted on three boilers at CFB Halifax Dockyard to compare the emissions obtained using Bunker C and Bunker A fuel oils.

Nuclear fuel waste management program geotechnical studies of Eye-Dashwa lakes research area rock properties

edited by P.J. Chernis and P.B. Robertson. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1992. v, 122 p. : ill. Bibliogr. (Report ; MRL 92-065(TR))
MICROLOG 93-03431 2 fiche

The nuclear fuel waste disposal concept chosen for assessment in Canada involves the isolation of corrosion-resistance containers of immobilized waste in a vault located deep in plutonic rock in the Precambrian Shield. Assessment of the concept requires evaluation of the long-term performance of each of the multiple barriers of the disposal system and the environmental impact of a repository. This volume is part of a series of concept assessment documents that present results of measurements of these properties on core samples from drill holes located at the research areas of Whiteshell Nuclear Research Establishment and Underground Research Laboratory (Lac du Bonnet granite), Massey, Ontario (East Bull Lake layered complex) and Atikokan, Ontario (Eye-Dashwa Lakes pluton). This report presents the results for the ATK research area, illustrating the ranges of values that can be expected within a single pluton. The report gives an overview of the geology of the pluton; describes various physical properties of core samples; describes the magnetic properties of the rocks and the intensity of fracturing and alteration of the core samples examined, and reviews the most important aspects of the work.

Numerical prediction of flows around moving conductors and comparison with experimental results

by O.F. Turan...et al. Montreal : Canadian Electrical Association, 1993. 23 p. : ill. Bibliogr. *Presented at Electricity '93 : distribution power quality.*
MICROLOG 93-05180 1 fiche

The fundamental flow characteristics around moving iced and uniced conductors and the conditions leading to aerodynamic galloping instability were studied experimentally. To understand flow field characteristics around galloping conductors, the effects of stranding and transverse oscillations were studied. One conductor geometry was adapted with two different ice shapes representing heavy and light ice formation. This led to six different wind tunnel models (uniced unstranded and stranded models, light and heavy ice formation on unstranded and stranded models). Numerical simulation was also conducted to understand how the flow field was affected by the conductor motion.

OAC independent study handbook : for independent study as a unit within an OAC course

by W.R. Ross. St. Catharines, Ont. : Brock University, Faculty of Education, 1991. ix, 234 p. Bibliogr. *ONTERIS: ON06107*
MICROLOG 93-07248 3 fiche

In the majority of OAC courses, there is an independent study component. The interpretation of its characteristics, and the roles and responsibilities of the participants in the process, is open to interpretation according to curriculum area. This handbook provides a planning guide for students, teachers, and teacher-librarians, to assist in the development, planning, and completion of each student's OAC independent study, as a unit within a specific OAC course. The students who use this guide may range from the adolescent student with up-to-date skills, proceedures, and processes, to the mature adult student who has not been in school for a number of years and therefore lacks the skills required to successfully complete an independent study. This will provide consistency and a paper schema which can be utilized and altered by students, teachers, and teacher-librarians to accommodate various identified independent study information needs

Obscenity : the decision of the Supreme Court of Canada in *R. v. Butler*

by J.R. Robertson. Ottawa : Library of Parliament, Research Branch, 1992. 13 p. Bibliogr. (Background paper ; BP-289E) *French ed. (Obscénité : la décision de la Cour suprême...) on the same fiche.* ISBN 0-660-14580-4
MICROLOG 93-01772 1 fiche

On 27 February 1992, the Supreme Court of Canada handed down its decision in the case of R. v. Butler. The Court held that the prohibition against pornography contravened the freedom of expression guarantee in section 2(b) of the Canadian Charter of Rights and Freedoms, but went onto hold that the section could be demonstrably justified under section 1 of the Charter as a reasonable limit prescribed by law. This document presents background information on the case. It also presents the reasons of Mr. Justice Sopinka and those of Mr. Justice Gonthier concerning this case.

Observations on the level of infection and intensity of *Nosema fumiferanae* (Microsporida) in two different field populations of the spruce budworm, *Choristoneura fumiferana*

by G.G. Wilson. Sault Ste. Marie, Ont. : Forestry Canada, Forest Pest Management Institute, 1987. 15 p. : ill. Bibliogr. (Information report ; FPM-X-79) ISSN 0704-772X ISBN 0-662-15399-5
MICROLOG 93-02778 1 fiche

The spruce budworm is naturally infected with a wide variety of pathogens including viruses, fungi, bacteria and microsporidia, the most common of which is *Nosema fumiferanae*. Previous field examinations of spruce budworm indicated that the percentage of individuals infected increased with the age of the infestation and that infections tend to increase throughout any one budworm generation. The levels of infection and intensity (spores/insect) of the microsporidium *Nosema fumiferanae* were investigated in two contrasting field populations of the spruce budworm over four years. Study plots were selected at Gargantua and Black Sturgeon Lake in Ontario. Sampling began in 1982 in Gargantua (an area of decreasing budworm infestation) but ended in 1985 because of a collapse of the spruce budworm population. Sampling began at Black Sturgeon Lake (an area of increasing budworm population) in 1983. This report summarizes the data up to and including 1986.

Observing ice processes in the Newfoundland marginal ice zone during CAPS II, March 1992

by R.F. McKenna...et al. St. John's : Memorial University of Newfoundland, Centre for Cold Ocean Resources Engineering, 1992. 2 p. (C-CORE publication ; no. 92-G) *Abstract for the Congress of the Canadian Meteorological and Oceanographic Society*
MICROLOG 93-07762 1 fiche (Available on fiche only)

Experiments were conducted in the Newfoundland marginal ice zone during March 1992 to address the processes which influence the drift and decay of pack ice, to calibrate remotely sensed observations and to improve ice drift forecasts. The work was carried out as part of the Canadian Atlantic Stormes Program (CASP II) from the research ship CSS Hudson. The present results focus on the region between latitudes 50 degrees and 51 degrees north, and longtidues 52 degrees and 48 degrees west.

Occupational exposure of fathers to ionizing radiation and the risk of leukaemia in offspring : a case-control study

by J.R. McLaughlin...et al. Ottawa : Atomic Energy Control Board, 1992. ix, 61 p. : maps. (Research report ; INFO-0424)
MICROLOG 93-01613 1 fiche

An epidemiologic study was performed to determine whether there was an association between childhood leukemia and the occupational exposure of fathers to ionizing radiation prior to the time of the child's conception. The study focused on the effect of exposures received during employment in the nuclear industry, particularly in the period before conception. A case-control design was used whereby children with cancer and children who did not develop cancer were compared with respect to their prior exposure history. Cases occurring from 1950-88 were identified from the Ontario Cancer Registry. The residence of parents at the time of each case's birth was determined from birth certificates. Data pertaining to occupational radiation exposure of the fathers were obtained by a computerized record linkage with the Canadian National Dose Registry and subsequent examination of employer records.

Oceanographic, geographic and hydrological parameters of Scotia-Fundy and southern Gulf of St. Lawrence inlets

by D. Gregory...et al. Dartmouth, N.S. : Bedford Institute of Oceanography ; Dept. of Fisheries and Oceans, Scotia-Fundy Region, Physical and Chemical Sciences Branch, 1993. viii, 248 p. : ill., maps. (Canadian technical report of hydrography and ocean sciences ; no. 143) ISSN 0711-6764
MICROLOG 93-03655 3 fiche

This report presents a tabulation of some of the geographic, oceanographic and hydrological parameters for 141 coastal embayments in the Scotia-Fundy region and southern Gulf of St. Lawrence. Geographic parameters include area at high water and chart datum, perimeter, axis length, low water volume, maximum depth, width and areas at the mouth of the inlet, and watershed area. Oceanographic parameters include mean and large tidal range, mean tidal volume, tidal current at the mouth of the inlet and an estimate of the flushing time. Hydrological parameters include monthly mean and standard deviation of the freshwater discharges into the inlet. Monthly mean temperatures and standard deviations for NAFO fishing areas and the locations of moored thermographs in the area are also given.

Despite the entrenchment of language rights in the Constitution, a number of issues remain unresolved with respect to the implementation of official languages policy in the federal government. Moreover, language issues continue to be a source of controversy in many provinces. This paper examines three continuing areas of concern about language rights and language policy: the consequences of constitutional entrenchment of langauge rights, the practical problems of implementation of offical languages policy in the federal bureaucracy, and the situation of official language minority rights in various provinces.

Official language minority education rights in Canada : from instruction to management

by A. Martel. Ottawa : Office of the Commissioner of Official Languages, 1991. 392, 409 p. : ill. Bibliogr. *Bilingual (Les Droits scolaires des minorités de langue...) CSI 22164.204*
MICROLOG 93-03503 9 fiche

This document determines the rights to instruction and school management conferred on official language minorities. It provides precise data on the current and potential situation of minority instruction and school management. It also describes the changes that occurred mainly between April 1982 and February 1990. It provides guidance for those most involved in the promotion of official language minority education rights. It is designed to increase understanding of the education rights proclaimed by section 23 of the Charter and to help the allies of minority education in every province and territory to better define the issues and objective involved.

Official plan, part I, consolidation : Cityplan final recommendations -- Draft

Toronto (Ont.). Planning and Development Dept. Toronto : The Dept., 1992. 172 p. . ill., maps. *Fold. maps not filmed*
MICROLOG 93-00273 2 fiche

This document comprises a consolidated draft Part I Official Plan for the City of Toronto. The new Plan, if enacted by City Council, would replace the existing Official Plan originally adopted in 1966 and further amended in 1976 by the Central Area Plan developments. The new Plan provides a blueprint for achieving a range of objectives regarding the physical, social, economic, and environmental well-being of the City and established policies for regulating the use of land and buildings and the general form and scale of new development in various parts of the City. The document describes the structure and quality of the city to be fostered and policies on the environment, the physical form and amenity, parks and open spaces, heritage policies, housing, community services and facilities, transportation, economic activity, the arts, institutional policies, residence areas, mixed commercial-residential areas, the waterfront, and community improvement. Implementation methods are also included, as are measures for exceptions, special amendments and modifications.

Oil and gas regulatory/administrative review : report

SEM-Industry Oil and Gas Review. Regulatory/Administrative Subcommittee Regina : The Subcommittee, 1993. ii, 39 p
MICROLOG 93-07603 1 fiche

In September 1992, a review was initiated of the fiscal systems and regulatory/administrative requirements that affect oil and gas exploration and development in Saskatchewan. A steering committee was set up consisting of senior representatives from Saskatchewan Energy and Mines (SEM) and the Canadian Association of Petroleum Producers (CAPP), the Small Explorers and Producers Association of Canada (SEPAC), the Canadian Association of Oilwell Drilling Contractors (CAODC), and the Petroleum Services Association of Canada (PSAC). The committee reviewed natural gas pricing, crude oil and natural gas royalties/taxes, land tenure, resource conservation, and a number of general issues. Issues outside SEM's jurisdiction that were also reviewed include property taxes, utility rates, the number of government departments/agencies involved in regulation, reclamation costs and surface lease costs, cogeneration, land use restrictions, road maintenance fees, service rig anchoring, and pressure vessel licensing.

Oil sands soil reconstruction project : five year summary

HBT Agra Limited. Edmonton : Alberta Land Conservation and Reclamation Council, Reclamation Research Technical Advisory Committee, Oil Sands Reclamation Research Program, 1992. xiv, 109 p. : ill. Bibliogr (Report ; RRTAC 92-4) *CSI 35211.200.* ISBN 0-7732-0875-5
MICROLOG 93-04450 2 fiche

In fall 1983, study plots were established on a near level tailings sand pad on the Syncrude Canada Ltd. oil sands mine site, north of Fort McMurray, Alberta. The plots consisted of soil reconstructed by applying and mixing various quantities of peat and clayey overburden at 20 and 40 cm depths. A total of 18 treatments were established consisting of three application rates each of peat and overburden to form nine reconstructed soil formulations to be tested at each depth. A study was conducted to determine which mixtures would support establishment of an initial vegetation cover that would evolve to support a maintenance-free forest cover of a desired level of productivity. Ten species of trees and shrubs were planted in fall 1984 to act as indicators of soil capability and the original component materials and the various mixtures were analyzed for a variety of soil physical and chemical properties.

Oil sands tailings sludge abandonment dry land reclamation study : final report

by J.R. Gulley. Ottawa . Canada Centre for Mineral and Energy Technology, 1992. iii, 130 p. : ill. Bibliogr. *CANMET contract: 23440-1-9152-01-SQ*
MICROLOG 93-01572 2 fiche

A comprehensive fine tails abandonment research program was conducted by Suncor Inc. during 1991/92, including an investigation of potential environmental impacts associated with dry land reclamation options for the eventual abandonment of fine tails wastes resulting from the extraction of bitumen from the oil sands. The dry land reclamation project was designed to assess the potential impact on the soils resulting from the inclusion of fine tails in the soil amendment. An assessment was also made on the leachates that could be expected to emanate from these fine tails amended soils This report provides a summary of the project; describes the quality assurance/quality control program; gives a summary of the investigative results of the project; and includes a copy of the original consultant report for the project

Les Oiseaux de l'île Anticosti, province de Québec, Canada

par H. Ouellet Ottawa : Musées nationaux du Canada. Musée national des sciences naturelles, 1969. x, 79 p. : ill. Bibliogr. (Publications de zoologie ; no 1)
MICROLOG 93-03033 1 fiche

Ce travail consiste en une analyse détaillée de la faune avienne de l'île Anticosti. Il constitue le résultat de trois mois de travaux sur le terrain, complétés par ce qui a été publié sur les oiseaux de cette région. On y étudie minutieusement toutes les sous-espèces qui ont été décrites pour cet endroit et l'on conclut qu'aucune d'elles n'est acceptable. A chacun des habitats principaux de l'île, on associe une liste des espèces d'oiseaux les plus abondantes. Enfin, il est suggéré que la faune avienne de l'île Anticosti ressemble plus à celle de la péninsule de Gaspésie qu'à celle des autres régions avoisinantes.

Oldman River Dam : 1989 raptor mitigation program

by R.W. Fyfe. Edmonton : Dept. of Public Works, Supply and Services, 1990 v, 30 p.
MICROLOG 93-02246 1 fiche

The Oldman River Dam and resulting reservoir, first announced in 1984, is being built in southwestern Alberta 10 km northeast of Pincher Creek, just east of the confluence of the Oldman, Castle, and Crowsnest Rivers to regulate water flow and replenish storage to provide a dependable water supply throughout the year for domestic, municipal, industrial, agricultural and recreational uses. This project was implemented in response to concerns related to the documented sensitivity of Prairie falcons and Ferruginous hawks, both of which are present and nest in areas impacted by the construction and eventual flooding of the Oldman River Dam. The project determined the current breeding populations of both species; documented disturbance associated with construction of the dam and the effect on territorial pairs, individually marked resident birds of both species for future identification; and documented annual production prior to and subsequent to the completion of the dam This report provides the results of the observations in the 1989 season.

On descent simplicial decomposition methods for the monotone variational inequality problem with its application to the network equilibrium problem

by J.H Wu. Montreal : Université de Montréal, Centre de recherche sur les transports, 1992. ii, 33 p. Bibliogr. (Publication ; no. 853)
MICROLOG 93-01797 1 fiche

This paper first develops a family of descent methods for a monotone variational inequality problem and provides a proof of their convergence where the strong monotonicity assumption is replaced by the monotonicity assumption based on a reformulation of the variational inequality problem. These descent methods are then incorporated into a simplicial decomposition method to solve the variational inequality problem where a series of both symmetric and asymmetric affine variational inequality problems are solved. The resulting methods are adapted for the network equilibrium problem and the computational results for a small network are reported.

On mechanizing the process of dynamic security analysis

by R.J Marceau, R. Mailhot and F.D Galiana Montreal : CEA Committee on Expert Systems, 1992. 15 p. : ill. Bibliogr. *Presented at the Canadian Electrical Association Engineering and Operating Conference*
MICROLOG 93-06080 1 fiche

This paper describes a working prototype for goal-oriented analysis of power-system dynamic security in operations planning. This prototype initiates load-flows and transient-stability simulations (using commercially available, state-of-the-art simulation software), performs result analysis, makes input changes in anticipation of a subsequent case, and repeats this process until a specific goal has been achieved. It is expected that the prototype with enhancements, will considerable reduce study-cycle time, help improve the accuracy of dynamic security margins and transform the present working environment. Eventually the approach will gravitate towards supporting on-line dynamic security.

On preserving shared values : a Committee statement on the occasion of the 40th anniversary of the signing of the North Atlantic Treaty

S.l. : British-North American Committee, 1989. 14 p. ISBN 0-902594-49-4
MICROLOG 93-08432 1 fiche

This statement looks at the future of the Alliance and asks if it is still relevant. It presents the type of questions the leadership of the Alliance should now address together with suggestions for action. It lists questions relating to the unity of purpose and the function of the Alliance and questions relating to economic policy. It also lists members of the British-North American Committee and publications of the British- North American Committee.

On target? Canada's employment-related programs for persons with disabilities

North York, Ont. : Roeher Institute, 1992. xvii, 235 p. *CSI 99190.201.*
MICROLOG 93-02437 3 fiche (Available on fiche only)

People with disabilities are seriously under represented in the labour force. This document outlines this problem across gender, age, geography, occupation, and a number of other lines. It provides a 'snapshot' of the broad policy and program framework that can either contribute to the problem or assist in counteracting it. It also looks at the problem of low participation in the labour force from a variety of perspectives: human rights, addressing labour market disadvantage, personal support and rehabilitation; training and education, the delivery of counselling, placement, information and follow-up services, and the impact of income security measures.

On the brink : endangered species in Canada

by J.A. Burnett...et al. Ottawa : Environment Canada ; Saskatoon, Sask : Western Producer Prairie Books, 1989 viii, 192 p. : ill., maps. Bibliogr. ISBN 0-88833-298 X
MICROLOG 93-01824 3 fiche

This state of the environment report is one of a series of reports published to acquaint citizens with the most important environmental issues facing the country today. This book addresses the extinction of wildlife species, including the reasons for concern, summaries of the situation of a number of species being faced with extinction, discussion of the official efforts being made to bring about their recovery, and the outline of a number of practical steps that groups and individuals can take to assist in the work of preservation. Endangered species are listed by geographic area.

On the convergence of projection methods : application to the decomposition of affine variational inequalities

by P. Marcotte and J.H Wu. Montreal : Université de Montréal, Centre de recherche sur les transports, 1993. 11 p. Bibliogr. (Publication ; no. 878)
MICROLOG 93-05428 1 fiche

This paper discusses the global convergence methods for solving non-linear monotone variational inequalities under a co-coercivity assumption. A similar analysis is applied to asymmetric projection methods, when the mapping is affine and monotone. Under a suitable choice of the projection matrix, decomposition can be achieved. It is proved that this scheme achieves a linear convergence rate, thus enhancing results previously obtained.

On the preparation and transmission electron microscopy of edge-on samples of oxide of Zr-2.5Nb pressure tube material

by Y.-P. Lin and J. DeLuca. Toronto : Ontario Hydro, Research Division, 1992. i, 32 p. ill. (Report ; no. 92-222-K)
MICROLOG 93-04373 1 fiche

A clear understanding of the relationship between microstructural evolution of the oxide and the hydrogen ingress behaviour is crucial to the improvement of the predictive capability on the corrosion and hydrogen pickup of pressure tubes. Analytical transmission electron microscopy is potentially capable of revealing detailed microstructural and micro-chemical information on the nanometer scale. The first and most difficult step to performing microscopy is the preparation of suitably thin, electron transparent foils. As a result of recent concerted effort, cross-sectional samples of steam prefilmed oxide on Zr-2.5 Nb pressure tube material were successfully produced using an ion milling technique. This report describes the method for preparation of the samples.

On the relationship of gold mineralization and ultramafic volcanic rocks in the Timmins area

by D.R. Pyke. Toronto : Ministry of Natural Resources, Division of Mines, 1975. iv, 23 p. : maps. Bibliogr. (Miscellaneous paper ; 62)
MICROLOG 93-00930 1 fiche

Gold mineralization was first discovered in the Timmins area in 1909 and since that time, the nearly 30 mines in the area have had a total production of approximately 50 million ounces. A number of theories have been advanced for the mineralization, with most inferring derivation of the gold from small stocks of quartz-feldspar porphyry, generally considered to be of subvolcanic origin. This paper describes the general geology of the area and the geology of the Timmins gold camp, gives analytical data on the gold content of the rocks and the spatial association of gold mines and ultramafic volcanic rocks, and compares the Timmins camp with other archean gold camps.

On-farm costs of soil erosion, technical version : final report

by B.H. Forsberg and R.P. Zentner. Regina : Saskatchewan Agriculture Development Fund, 1990. vi, 102 p. Bibliogr
MICROLOG 93-05254 2 fiche

Study to determine the on-farm, long-run economic consequences of losses in productivity due to cropping-induced degradation of the soil nitrogen stock for the Brown soil zone of Saskatchewan. Producers were assumed to maximize profit over a 25-year time horizon by choosing combinations of alternate cropping options or control variables. This report outlines the methodology used in the analysis and provides a review of the relevant literature for the model chosen, estimates and formulates the scientific soil moisture and nitrogen models; presents the Neoclassical economic model of soil degradation/conservation, identifies data needs and parameter values for the nitrogen model; and incorporates the knowledge contained to determine the optimal long-run flexible cropping rotation via dynamic programming.

On-farm demonstration programs : evaluation report

Brystra Consultants. Regina : Saskatchewan Agriculture, Agriculture Development Fund, 1987. xv, 110 p. Bibliogr
MICROLOG 93-01605 2 fiche

The Agriculture Development Fund represents a major investment (200 million dollars over five years) in the development of the province's leading economic sector. Prior to ADF, the link between R and D and wide-spread usage of the developed technology was supported by a program of small-scale on-farm demonstrations (OFDs). This evaluation considers the effectiveness of the previous OFDs and the lessons to be learned from them. Key evaluation issues were identified on the basis of staff interviews, a literature review, and program analysis. Alternative evaluation methodologies were developed to suit various combinations of issues. Following a review by senior program staff, an evaluation design was finalized. The evaluation also included a survey of 200 farmers who hosted demonstrations, interviews with industry and university personnel, and a series of case studies based on OFDs.

North York, Ont . le Conseil, 1993 49 p. . ill
CSI 56205.001F
MICROLOG 93-06899 1 fiche

Ce document présente le rapport annuel de 1992 du Conseil du régime de retraite des enseignantes et des enseignants. Le Conseil administre le régime à prestations déterminées des enseignants de la province et leur fournit des services personnalisés. Les Conseil assure aussi la gestion des cotisations et des placements du régime afin d'obtenir des revenus de placement adéquats pour procurer aux participants et à leur famille un revenu de retraite indexé en fonction de l'inflation.

The Commission oversees bargaining procedures between boards and teachers. 286 sets of negotiations fell under its jurisdiction in 1990-91. The annual report reviews negotiation activity and process, including renewals, third party appointments, supervised votes, strikes, lock-outs and school closings, voluntary binding, arbitration and final offer selection, grievance arbitration, advisements, and duration of agreements. Staff activities reviewed include negotiation monitoring, selection and training of third parties, quasi-judicial matters, preventive mediation, and information services. Recapitulates Ontario bargaining history. Also includes statistical tables, statement of expenditures, and biographical information on Commissioners.

Toronto : The Commission, 1992. 15 p.
CSI 56200.001.
MICROLOG 93-01034 1 fiche

The H.A.R.P. Act was passed in 1980 to promote and ensure patient safety in the use of radiation within the healing arts. This annual report gives the Commission's organization and responsibilities, its duties and its method of operation. A summary of the activities during the year discusses the continuing development of Ontario's X-ray safety code in terms of guidelines and interpretation, peer reviews, consumer education and responsibility, the marketing of X-ray safety, new developments in X-ray technology, therapeutic X-ray regulations, and X-ray inspection services. Also included is a list of members on the Commission's advisory committees.

The Health Disciplines Board reviews the complaints committees' decisions of the colleges governing these 5 health disciplines (dentistry, medicine, nursing, optometry, and pharmacy). It can also hear or review proposed decisions of the registration committees of these colleges. This annual report for the calendar year 1989 covers issues and comments, trends in professional and patient attitudes, and communications. Statistical tables provide data for cases by college and by disposition. The document concludes with a brief report on the Denture Therapists Appeal Board.

Ce rapport annuel fait le bilan des activités et des réalisations du Ministère. Ce Ministère a la mission de promouvoir un système agricole et alimentaire économiquement viable et durable sur le plan environnemental au sein duquel les participants coopèrent pour répondre aux besoins des résidents de l'Ontario et pour être compétitifs sur le marché mondial. Ce rapport porte sur les questions suivantes : le Ministère; ses nouvelles orientations; la participation de l'industrie, recherche, éducation et transfert de technologie; la gestion du changement dans le secteur; la durabilité de l'environnement; la confiance des consommateurs, les débouchés commerciaux; et le développement de la collectivité rurale. Le document comprend aussi un organigramme, des données statistiques et les états financiers.

Ontario communications handbook, 1993

Toronto : Ministry of Economic Development and Trade, 1993. xii, 145, xii, 152 p. : ill.
Bilingual (Guide des communications de l'Ontario, 1993). Addendum (6, 6 p.) laid in.
ISBN 0-7778-1121-9
MICROLOG 93-08671 4 fiche

The purpose of this handbook is to provide an overview of broadcast and telecommunications services, facilities, industries and regulation in the province. The 1st part of the document, describing telecommunications services, covers telephone services, business voice and data telecommunications and other business services, special radio services, industry structure, and regulation of the industry. The 2d part of the document describes broadcasting and cable services. This includes radio, television and cable operations. Appendices provide a glossary, and directories of independent telephone systems, of radio and television stations, of cable companies and of specialty cable services. An addendum to the document lists native community radio stations and francophone community radio stations.

Ontario hardwood decline survey, 1989 and 1990

Beak Consultants. Toronto : Ministry of the Environment and Energy, Air Resources Branch, Phytotoxicology Section, 1993. vii, 102 p. : maps. Bibliogr. (Report ; ARB-167-92-PHYTO) ISBN 0-7778-0789-0
MICROLOG 93-07495 2 fiche

A hardwood decline survey was conducted in 1989 and 1990 to reassess the status of deciduous forest decline in the Great Lakes-St. Lawrence deciduous forest regions of Ontario. The survey consisted of visual evaluations of tree conditions at 110 permanent plots, each containing 100 trees greater than 10 cm dbh. Tree decline was assessed with a numerical decline index rating system that ranged from 0 (healthy, no symptoms) to 100 (dead) and a geographic information system was used to assess the spatial distribution of forest decline in the province. This report provides the results of the survey.

Ontario phase-out of ozone-depleting substances : a compliance guide -- Rev.

Toronto : Environment Ontario, 1991. 36 p.
ISBN 0-7729 7829-8
MICROLOG 93-02085 1 fiche

By 1993, the consumption of chlorofluorocarbons (CFCs) in Ontario is to be reduced by more than half of the 1986 consumption level (approximately 10,000 tonnes per year). This guide describes the regulations involved in the control of ozone-depleting substances and those substances banned, including aerosols, foams and spent refrigerants. For each of the banned substances, information is given on the affected products, the banned uses and applications, retail restrictions and exemptions

Ontario police community initial consultation

Toronto : Ministry of the Solicitor General, Strategic Planning Committee on Police Training and Education, 1992. 93 p. *On cover: A police learning system for Ontario Cover title: Report on Ontario police community initial consultation*
MICROLOG 93-04113 2 fiche

This report consists of two sections. The first deals with the consultation that occurred with the small and mid size police services and the second section represents the consultation with the large police services. These consultations identified and prioritized the most significant future issues within the following four major areas: policing issues of the future; training, education, and development needs as related to policing issues; training, education, and development delivery systems; and funding for training, education, and development. This document contains the results of these consultations.

Ontario universities statistical compendium, 1970-91, part A : macro-indicators

Council of Ontario Universities. Research Division. Toronto : The Division, 1992. iii, 42 p. *CSI 97943.002. ONTERIS: ON06128.*
ISBN 0-88799-275-7
MICROLOG 93-02921 1 fiche

Comprises Part A of the Compendium (Part B, containing supporting data, is in another volume). Objectives are to measure the real resources available to the Ontario university system as a function of the volume of activity over time; and to compare trends in the resources made available for higher education in other jurisdictions and to other provincially funded activities. The first section presents statistical tables showing a series of macro-indicators for the years 1970-71 to 1990-91. Included in the series are: ratios of operating revenue to eligible full-time equivalent (FTE) enrolment and basic income units (BIUs); ratios of research expenditures to full-time faculty; percentage distribution of operating expenditures; and interprovincial comparisons. The second section presents complementary analyses providing additional insights or supplementary information: percentage analysis of operating revenues by source of revenue;

The Ontario Wall Drying Project

by E.F.P. Burnett and A.J. Reynolds. Ottawa : Canada Mortgage and Housing Corporation, 1991. xvi, 251 p. : ill. Bibliogr.
MICROLOG 93-03117 3 fiche

The National Building Code of Canada requires that the moisture content of framing lumber be not greater than 19% at the time of installation. Because this code provision is commonly violated, a project to assess the nature and consequences of built-in moisture was developed for Southwestern Ontario conditions. A full-scale, permanent test facility was built on the campus of the University of Waterloo, oriented so that one side faced due north. Twelve pairs of wall panels, paired north-south or east-west, could be tested. The panels were monitored for one year. The selection of different walls systems, stud size, sheathing, cladding and orientation was made by the advisory committee. This report describes the test program, recording, analyzing and presenting the results and drawing general conclusions. Details of calibration, moisture content measurements and other experimental results, and microbiological and air leakage test results are also included.

Open skies backgrounder no. 5 : Canada/Hungary overflight

Ottawa . External Affairs and International Trade Canada, 1992. i, 53 p. : ill., maps. Bibliogr. *Cover title: Open skies backgrounder no. 5 : second trial overflight.*
MICROLOG 93-08536 1 fiche

In preparation for the international conference with the purpose of negotiating an Open Skies regime, Canada and Hungary conceived the idea of a trial overflight of Hungary. The 1st Canadian-Hungarian Open Skies flight took place on 6 January, 1990 when a Canadian Forces Hercules transport aircraft flew over Hungary covering a number of Hungarian and Soviet military facilities. It was agreed that a reciprocal flight would occur in Canada when there was significant progress in the negotiations. The aim of this joint program was to contribute to the negotiations by demonstrating some of the sensor capabilities and limitations, by simulating the exchange of flight recorded data, and by presenting the results to negotiators. It also provided an opportunity to test some operational procedures. This report describes the trial overflight program, and gives results and discussion, and conclusions. Papers included in appendices cover CCRS C-band airborne radar description and test results; airborne remote sensing project planning software; Hungarian-Canadian overflight directorate of avionics, simulators and photography briefing; the trial overflight technical data, and cost estimates.

Operation Kapuskasing

by G. Bennett. ..et al. Toronto . Dept. of Mines, 1967. vi, 98 p. : ill., maps. Bibliogr. (Miscellaneous paper , 10)
MICROLOG 93-02458 2 fiche

The Operation Kapuskasing area lies mainly within the District of Cochrane, with the southwest corner in the District of Algoma, and has an areal extent of 28,000 sq miles. This report presents the results of a survey conducted from 15 May-15 September 1966, the first of a series of large scale helicopter reconnaissance surveys undertaken. Mapping was done by pace-and-compass traverses, canoe reconnaissance, and helicopter reconnaissance. Field work was plotted on one mile to one inch air photographs and transferred to two mile to one inch base maps for preliminary publication. All previous geological mapping was verified before being plotted on the present maps. The report describes the location and access of the area and the topography and natural resources, the general and structural geology, with regional geophysical data; and the economic geology. The possibility of industrial minerals is also discussed.

Operational considerations to prevent voltage instability on the Ontario Hydro system

by D.J. Chee-Hing, G.E. Fahmy and C.E. Graham. Montreal : Canadian Electrical Association, Engineering and Operating Division, Power System Planning and Operation Section, Transmission and Station Planning and Operations Subsection, 1992. 21 p. : ill. Bibliogr. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06098 1 fiche

Computer studies and actual system observations indicate that under certain operating conditions, the Ontario Hydro Bulk Electricity System is vulnerable to low voltages in southern Ontario which, if not corrected, could lead to widespread steady-state voltage instability and voltage collapse. This paper examines the situations under which this is possible, and describes the actions taken by the utility to reduce the risk of the condition from developing. The problem is assessed using current analytical techniques. Both short-term operational solutions which are immediately applicable, and longer term solutions for future implementation, are discussed.

Operational evaluation of just mobility flight access system and Wollard passenger access lift

for Transportation Development Centre, Policy and Coordination, Transport Canada ; by D.J. Ostry. Toronto : Human Factors North Inc., 1992. x, 28 p : ill
MICROLOG 93-04660 1 fiche

This report describes an operation evaluation of the Just Mobility and the Wollard aircraft boarding systems that provide physically handicapped passengers access to commuter aircraft. The report focuses on the operational utility of the lifts, examining equipment design in relation to passenger needs and comfort and to operator performance and preferences. Issues of storage, handling, and maintenance are addressed.

Operational readiness in EFAD systems

by M.J. Kabat. Ottawa : Atomic Energy Control Board, 1992. vi, 47 p. : ill. Bibliogr.
(Research report ; INFO-0407)
MICROLOG 93-08404 1 fiche

Assessment of the operational readiness of the emergency filtered air discharge (EFAD) systems, installed in Canadian CANDU multi-unit nuclear power plants. Relevant Canadian and foreign standards and regulatory requirements were reviewed and documentation on EFAD system design, operation, testing, and maintenance were assessed to identify likely causes and potential failures of EFAD systems and their components under both standby and accident conditions. Recommendations are provided for revisions that are needed to achieve and maintain appropriate operational readiness.

Opinions et attitudes des québécois à l'endroit des autochtones : sondage auprès des Québécois

Montréal : Gouvernement du Québec, Ministère du Conseil exécutif, Secrétariat aux affaires autochtones, 1991. 84 p. : ill. *CSI 67210.200*
ISBN 2-551-14801-4
MICROLOG 93-05541 1 fiche

Ce document présente l'analyse des résultats d'une sondage réalisé par la firme CROP, sondage qui portait sur les connaissances et les opinions des Québécois concernant les populations autochtones. Les résultats reposent sur 1030 entrevues téléphoniques effectuées entre le 13 et le 17 juin 1991. Le taux de collaboration enregistré est de 71 %. le sondage comportait quinze questions, réparties en quatre sections. Les résultats sont analysés en fonction des régions (Montréal métropolitain, Québec métropolitain et le reste du Québec), des groupes d'âge, du sexe, du nombre d'années d'études complétées, de l'activité des individus, des revenus des ménages, et de la langue parlée. Des graphiques sont présentés à la fin de chacune des parties

OPSBA response to Bill 143, Waste Management Act and Ministry of Environment initiatives paper no. 1 : regulatory measures to achieve Ontario's waste reduction targets

Ontario Public School Boards' Association. Toronto : The Association, 1992. 7 p. *ONTERIS: ON05946*
MICROLOG 93-07251 1 fiche

Provides reaction from the OPSBA to the government's regulatory proposals for waste managment as they will impact on school boards. The OPSBA is supportive of the intent of the legislation, but not the methods of implementation suggested. It recommends that the Ministry of Environment and the Ministry of Education consult with school boards and with OPSBA on issues that affect them directly, suggests a schedule for implementation of school board waste audits, recommends that regulations enable local cooperative efforts, suggests a revised definition of educational institution as it applies to school boards; and recommends that the Ministries provide a grant program for school boards and organize staff training seminars related to waste management requirements across the province.

see Submission to the Ministry of Labour on Bill 168 : 'changed circumstances', provision of the Pay Equity Act

OPSBA's proposals for a new education funding system : submissions

to the Fair Tax Commission, Property Tax Working Group [and] to the Ministry of Education's Finance Reform Project. Toronto : Ontario Public School Boards' Association, 1992. xii, 62 p. (OPSBA position paper ; no. 3) *ONTERIS: ON06003*
MICROLOG 93-02031 1 fiche

This is a two-part report. Part I is the Ontario Public School Boards' Association's (OPSBA) comments on the revenue source for education and property taxation and assessment issues to be submitted to the Fair Tax Commission, Property Tax Working Group. Part II contains OPSBA's proposals for a new education funding system to be forwarded to the Ministry of Education's Finance Reform Project. Also gives recommendations on issues under review by the Steering Committee on Provincial-Local Relations (Disentanglement) and will also be forwarded to the Ministry of Municipal Affairs. Proposes a package of education finance and governance reforms. It has become increasingly apparent that, if there is to be a resolution of some of the long-standing education issues, longer-term reform and change to the way we deliver education will be necessary.

L'Optimisation des fréquences d'un réseau de transport en commun

par I. Constantin Montréal : Université de Montréal, Centre de recherche sur les transports, 1993. viii, 183 p. : ill. Bibliogr. (Publication ; no. 881)
MICROLOG 93-05280 3 fiche

Bien que l'optimisation des fréquences constitue une étape importante dans le design d'un réseau, elle n'est pas bien intégrée dans les modèles traditionnels utilisés pour la planification du transport en commun. Jusqu'à maintenant, elle n'a reçu que peu d'attention dans la littérature et a souvent été étudiée en conjonction avec la confection des itinéraires des lignes. De plus, aucun des modèles proposés jusqu'ici ne tient compte de manière explicite du comportement des voyageurs face à leur choix de route. Ce document porte précisément sur l'optimisation des fréquences d'un réseau de transport en commun. Il examine particulièrement la revue de la littérature; le modèle proposé; les extensions du modèle; l'implantation de l'algorythme; les résultats numériques; et, le traitement de la capacité.

Optimization of dragline performance through computer control, phase IV : final report

prepared for N.B. Coal Limited ; by Ray St-Laurent. Ottawa : Energy, Mines and Resources Canada, Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1992. 42 p. : ill. Bibliogr. *CANMET contract: 23440-1-9097-01-SQ*
MICROLOG 93-04279 1 fiche

To enhance dragline mining safety and performance, a four-year, four-phase project was undertaken. The system controls the lubrication system and measures stresses, bearing temperatures, and other operational parameters. The first three phases were used to set up the sensors and equipment to monitor and record system behaviour, alarm any parameters exceeding boundaries, and archive the recorded data at the office. Phase IV established dragline and office software and procedures using the equipment installed in the first three phases of the project. The system implemented demonstrates real-time support for operators, and archival and report generation for the supervisors and office systems

Optimization of hull form for future Arctic tankers, phase I, vol. I : main report

for Transportation Development Centre, Policy and Coordination Group, Transport Canada , by Martin Luce...et al. Ottawa : Canarctic Shipping Company Limited, 1989. xvi, 148 p. ill.
MICROLOG 93-04657 2 fiche

This report describes the development of a tanker hull form suitable for operation 80 percent of the time in open water and 20 percent in ice. The hull form was developed in steps, including a review of the potential environmental conditions, the input from five Canadian Arctic ship designers for overall hull configuration, the development of a transit simulation that included capital and operating costs, physical model testing, and numerical performance prediction. The optimizing criteria for the design was elected to be the required freight rate.

Optimization of hull form for future Arctic tankers, phase I, vol. V : annex 5

for Transportation Development Centre, Policy and Coordination Group, Transport Canada , by Martin Luce...et al. Ottawa : Canarctic Shipping Company Limited, 1989. xi, 230 p. : ill. Bibliogr.
MICROLOG 93-04665 3 fiche

This report describes a series of model tests on a 1:35 scale model for Canarctic Shipping Co. Ltd. in February 1989. The model tests were conducted at the Institute for Marine Dynamics in St. John's, Newfoundland and included open water and ice tank testing. Additional analysis was also conducted on the seakeeping performance of the hull using numerical analysis. The report describes the level ice resistance tests, the level ice channel breakout tests, and the clear water tests.
CA SC TR

Optimization of hull forms for future Arctic tankers, phase I, cont.

prepared for Transportation Development Centre, Policy and Coordination, Transport Canada ; by David Baker. Ottawa : Canarctic, 1992. xvii, 320 p. : ill., maps. Bibliogr.
MICROLOG 93-03705 4 fiche

This work is a direct continuation of work completed in 1989 for the preliminary design of an ice breaking tanker capable of spending 20% of its time in ice and 80% of its time in open water. The first part of the work included technical input from a number of Arctic ship designers, open water and level ice tests, and the development of a transit simulation tool. Following a review of this work, it was evident that additional work was necessary on the specific areas of full scale hull form manoeuvring and non-level ice performance. The only commercial cargo ship for which this type of information is available is the ARCTIC. This report describes the additional work on non-level ice performance, model testing, transit simulation, and manoeuvring simulation

Optimizing frequencies in a transit network : a nonlinear bi-level programming approach

by I. Constantin and M. Florian. Montreal : Université de Montréal, Centre de recherche sur les transports, 1993. 30 p. : ill., maps. Bibliogr. (Publication ; no. 914) (Publication ; no. 868)
MICROLOG 93-06365 1 fiche

This paper considers the problem of optimizing the frequencies of transit lines in an urban transportation network. The problem is formulated first as a nonlinear non-convex mixed integer programming problem and then is converted into a bilevel Min-Min nonconvex optimization problem. This problem is solved by a projected (sub) gradient algorithm, where a (sub) gradient is obtained at each iteration by solving the lower level problem. Computational results obtained with this algorithm are presented for the transit networks of the cities of Stockholm, Sweden, Winnipeg, Manitoba, and Portland, Oregon.

Optimizing nitrogen fertilizer response by winter wheat and rye : technical/final report

by D.B. Fowler, J. Brydon and R.J. Baker. Regina : Saskatchewan Agriculture Development Fund, 1992 239 p. : ill. Bibliogr.
MICROLOG 93-02385 3 fiche

Southwestern Alberta has been the traditional winter wheat production area in western Canada but in recent years the development of a practical snow management system using no-till seeding into standing stubble immediately after harvesting the previous crop has allowed an extension of this production area into most of the western prairies. Winter rye is also adapted to the no-till production system developed for winter wheat. Since most stubble fields are deficient in available soil nitrogen, fertilizer is a major cost in such production. This report summarizes the soil nitrogen response observed in 40 winter wheat and 20 winter rye trials representing a broad range of soil types and environments in western Canada.

Orientations tarifaires a long terme : plan de développement, 1993 : proposition, 7

Hydro-Québec. Montréal : la Société, 1992 63 p. : ill. ISBN 2-550-26729-X
MICROLOG 93-05851 1 fiche

Ce document présente l'annexe 7 du plan de développement de la Société. La première partie de ce document expose les orientations privilégiées en matière de tarification sur les marchés québécois. On y présente d'abord le cadre général dans lequel se situe cette révision. Les modifications proposées aux tarifs domestiques et aux tarifs généraux de même que le plan d'implantation sont ensuite décrits. Cette proposition d'orientations est complétée par une deuxième partie comportant trois chapitres qui permettront de mieux connaître certains des principes retenus pour l'élaboration des tarifs et d'apprécier l'intérêt d'introduire une nouvelle tarification intégrant des tarifs différenciés dans le temps.

Orienter l'économie dans un monde en changement

Ottawa : Ministère des finances, 1993 v, 38 p. : ill. *L'éd anglaise (Charting the economic course in...) : 93-04848/1*
MICROLOG 93-08714 1 fiche

En cette période de changements sans précédent, la principale préoccupation des Canadiens est l'économie. Il est essentiel d'orienter l'économie canadienne si nous voulons qu'elle connaisse une croissance vigoureuse, crée de la richesse et des emplois, et qu'elle procure aux Canadiens un niveau de vie prospère et sûr. Ce document se penche sur la question en examinant de plus près les points suivants: la politique économique du Canada dans un monde en transformation, le rétablissement des fondations de la croissance économique au Canada; le sens des responsabilités financières; la réduction de l'inflation, un régime fiscal plus équitable et plus efficient, l'aide à l'adaptation des travailleurs et des entreprises aux nouvelles réalités économiques, un secteur public plus efficient, l'élargissement des possibilités commerciales, et, la promotion d'un filet de sécurité sociale efficace

Otolith microstructure examination and analysis

edited by David K. Stevenson [and] Steven E Campana. Ottawa : Dept. of Fisheries and Oceans, 1992. vi, 126 p. : ill. Bibliogr. (Canadian special publication of fisheries and aquatic sciences ; 117) ISSN 0706-6481 ISBN 0-660-14747-5
MICROLOG 93-02940 2 fiche

The field of otolith microstructure research has experienced phenomenal growth since the early 1970s and now forms the basis for hundreds of studies in early life history, age, growth, recruitment, migration, mortality and stock structure. This book represents the first effort to compile and summarize the many techniques and procedures associated with studies of otolith microstructure. The complete sequence of events, from sample collection to data analysis, is covered comprehensively, so as to be applicable to most species and situations. The various chapters include both published and unpublished procedures.

Our common bowl : global food interdependence

Ottawa : International Development Research Centre, 1992. 63 p. (Searching series ; 4) *French ed. (Le Sud dans votre assiette l'interdépendance.) : 93-02057/1.* ISBN 0-88936-650-0
MICROLOG 93-02056 1 fiche (Available on fiche only)

This publication examines the issue of where food came from, where it is now, and where it is likely to come from in the future. It looks at solutions to the equation posed by the Resource Clock in the lobby of IDRC's headquarters: the top line relentlessly counts up each new birth while the bottom counts down each lost hectare of productive land on which to grow food to sustain them. It also shows that, although they are intertwined, there is a dichotomy between the world hunger problem and the world food problem.

Outil d'évaluation et de planification : les inscriptions et les sanctions dans les programmes d'études menant à un DEC : l'évolution de 1985 à 1990 : présentation par programme

par L. Daigle et L. Favreau. Québec : Gouvernement du Québec, Ministère de l'enseignement supérieur et de la science, Direction générale de l'enseignement collégial, 1991. 366 p. ISBN 2-550-22709-3
MICROLOG 93-07637 4 fiche

Ce document présente le portrait de chaque programme menant à un DEC. Pour chacun de ces programmes et pour chaque organisme le dispensant, on présente l'évolution des inscriptions, à l'enseignement ordinaire, à temps complet, et des sanctions émises sans distinction de service d'enseignement et de régime d'études. La période d'observation débute à l'automne 1985 et se termine à l'automne 1990. Pour chaque collège ou école dispensant un même programme, on présente les inscriptions à chaque niveau d'études et au total, ainsi que les sanctions émises. Pour chacune de ces variables, on calcule les taux annuels de croissance et les taux de passage pour chaque période pertinente. La dernière série de données de chaque portrait concerne le total réseau (public, privé subventionné ou des écoles gouvernementales) pour le programme. Les portraits des différents programmes sont regroupés en trois sections. la première concerne les collèges publics, la seconde, les collèges privés subventionnés et la dernière, les écoles gouvernementales. A l'intérieur de chaque section, il y a d'abord le portrait du réseau d'appartenance des collèges ou écoles de cette section, suivi des portraits individuels présentés par ordre numérique de programme.

Over-water gust factors

by R.D. Brown and V.R. Swail Downsview, Ont. : Atmospheric Environment Service, Canadian Climate Centre, 1989. iii, 53 p. : ill Bibliogr. (Report ; no. 89-5)
MICROLOG 93-00281 1 fiche

Knowledge of over-water wind speed and turbulence profiles in the 10-100 m elevation range is important for the design of offshore structures, particularly compliant structures that have typical peak response frequencies in the order of 30 seconds to two minutes However, there is considerable disagreement in the gust factors and wind profile power law exponents published in design guidelines for offshore structures. This study was conducted to determine the empirical characteristics of such over-water gust factors as gust duration, record length, height, wind speed, significant wave height, and atmospheric stability, to investigate the magnitude and variation of turbulence intensity over water, and to evaluate the performance of techniques for estimating offshore gust factors. A brief overview of the boundary layer theory related to over-water gusts is provided, along with a discussion of two universal techniques for estimating over-water gust factors.

An Overview of global, national and local trends affecting the delivery of Parks and Recreation services in Calgary -- Rev.

compiled by Ann Dahlberg. Calgary, Alta. : Calgary Parks and Recreation, Planning, Design and Marketing Division, Planning Section, 1993. 57 p. Bibliogr. (Background on business research series ; report no. 1)
On cover: Scan.
MICROLOG 93-06456 1 fiche

The Environmental Scan considers selected socio-cultural global trends and, where possible, puts information into a local context with respect to the city of Calgary. The purpose of an environmental scan is to collect information which can be used to formulate predictions about the shape of things in the near future. With this as the objective, the trends which are discussed in this report are those which seem applicable to Calgary Parks and Recreation for future service delivery. Following a discussion of the plausible changes, it presents strategies for implementing changes both within the corporation and in the delivery of services to the public.

An Overview of long-term zoobenthic monitoring in Alberta rivers, 1983-87

by A.M. Anderson. Edmonton : Alberta Environment, 1991. vii, 115 p. : ill. Bibliogr. (Technical report series)
MICROLOG 93-08825 2 fiche

Zoobenthos, the association of invertebrate animals which live on the river bottom, were sampled in the spring and fall from 1983 to 1987 at 20 long-term monitoring sites in major rivers of Alberta including the Oldman, Bow, Red Deer, South Saskatchewan, North Saskatchewan, Athabasca and Beaver rivers. Data represent the first 5 years of a proposed long-term monitoring database which will consist of alternating 5-year periods with and without sample collection.

This report considers both the reasons leading to the restructuring of service delivery, and its implications for staff, clients, and others who provide services to the Ministry clients. It is written both for a general audience and those with more specific interests in selected reorganization issues. It makes extensive use of charts and figures which provide the reader with a quick visual summary of the pattern of results. It also provides references for each figure or data summary to assist readers who want more detail.

An Overview of selected studies on Canada's prosperity and competitiveness : background paper

Ottawa : Industry, Science and Technology Canada, 1992. iv, 108 p. ISBN 0-662-19355-5
MICROLOG 93-04172 2 fiche

In recent years there have been numerous studies, reports, and statements published by both public and private sector groups that document a growing international challenge to Canada's future prosperity. These publications warn that Canada must prepare itself to face the challenges posed by rapid technological advancement and the globalization of trade. This report provides brief summaries of a number of published reports and their recommendations. It also provides a selective bibliography and an annex. The annex contains a chart indicating the main subject areas addressed by each report

An Overview of the examination of fuel as follow-up to the 1988 November overpower transient in Pickering NGS-A Unit 1

by M.R. Floyd...et al. Chalk River, Ont. Atomic Energy of Canada Limited, Chalk River Laboratories, 1992. 8 p. : ill. Bibliogr. *At head of title: AECL research. Presented at the Third International Conference on CANDU Fuel* ISSN 0067-0367 ISBN 0-660-14769-6
MICROLOG 93-03868 1 fiche

In 1989, fuel elements from eight fuel bundles that experienced power ramps during a November 1988 transient at Pickering Nuclear Generating Station A were examined in the Hot Cell Facilities at Chalk River Laboratories. In 1990, an additional 29 fuel elements were examined to assist in further understanding of the fuel behaviour exhibited. Both ramped and unramped elements were examined to determine the effect of the 40-minute transient of fuel behaviour. This paper reviews the examination conducted of the fuel in 1989 and 1990, and discusses the impact of the transient on performance parameters such as sheath strain, grain growth, and fission-gas release.

La Liste des substances d'intérêt prioritaire énumère des substances (produits chimiques, groupes de produits chimiques, effluents et déchets) qui peuvent être nocives pour l'environnement ou constituer un danger pour la santé humaine. Le présent rapport porte sur l'oxybis(chlorométhane) et l'oxyde de chlorométhyle et de méthyle. Il donne un sommaire des informations essentielles pour l'évaluation de la toxicité, l'identité, les propriétés, la production et l'utilisation, la pénétration dans l'environnement, et les informations sur l'exposition ou les effets des substances. Pour se terminer, il décrit l'évaluation de la toxicité au sens de la Loi canadienne sur la protection de l'environnement, les effets sur l'environnement, et sur la vie ou la santé humaine.

Oxyde de bis(2-chloroéthyle)

Ottawa : Santé et bien-être social Canada ; Environnement Canada, 1993. v, 16 p. Bibliogr. (Liste des substances d'intérêt prioritaire, rapport d'évaluation) *En tête du titre: Loi canadienne sur la protection de l'environnement. L'éd. anglaise (Bis(2-chloroethyl) ether) sur la même fiche.* ISBN 0-662-98127-8
MICROLOG 93-06667 1 fiche

La Loi canadienne sur la protection de l'environnement exige que le ministre de l'Environnement et le ministre de la Santé nationale et du Bien-être social du Canada établissent et publient la Liste des substances d'intérêt prioritaire, qui énumère des substances (produits chimiques, groupes de produits chimiques, effluents et déchets) qui peuvent être nocives pour l'environnement ou constituer un danger pour la santé humaine. En outre, la Loi exige que les deux ministres évaluent ces substances et déterminent si elles sont toxiques. Pour déterminer si l'oxyde de bis(2-chloroéthyle) est toxique au sens de la LCPE, on a déterminé si cette substance pénètre ou peut pénétrer dans l'environnement au Canada en une concentration ou une quantité ou dans des conditions qui pourraient entraîner l'exposition des humains ou d'autres organismes vivants à des concentrations susceptibles de causer des effets nocifs. Les données colligées ont indiqué que l'oxyde de bis(2-chloroéthyle) n'est actuellement pas utilisé ou produit au Canada. Ce composé organique peut être un sous-produit de certains procédés industriels et on en a décelé des concentrations mesurables dans des effluents internes de deux usines dans le sud de l'Ontario.
• CA EV SC

Oxyde de tert-butyle et de méthyle

Ottawa : Santé et bien-être social Canada ; Environnement Canada, 1992. v, 22 p. Bibliogr. (Liste des substances d'intérêt prioritaire, rapport d'évaluation ; no 5) *En tête du titre: Loi canadienne sur la protection de l'environnement. A Parallel branch-and-bound algorithm for multicommodity uncapacitated location with balancing requirements

by B. Gendron and T.G. Crainic. Montreal : Université de Montréal, Centre de recherche sur les transports, 1993. ii, 30 p. Bibliogr. (Publication ; no. 924)
MICROLOG 93-08151 1 fiche

This paper presents a parallel branch-and-bound algorithm for solving the multicommodity uncapacitated location problem with balancing requirements, that is based on the best known sequential method for solving the problem. The algorithm aims to exploit parallelism by dividing the search tree among processes and by performing operations on several subproblems simultaneously. The asynchronous algorithm thus obtained incorporates a filtering coordinator process to balance the workload, as well as an adjustable synchronous initialization phase. Experimental results on networks of transputers and distributed workstations are reported and analyzed

A Parallel route building algorithm for the vehicle routing and scheduling problem with time windows -- Rev.

by J.-Y. Potvin and J.-M. Rousseau. Montreal : Université de Montréal, Centre de recherche sur les transports, 1993. 18 p. Bibliogr. (Publication ; no. 729)
MICROLOG 93-05467 1 fiche

This paper describes an insertion algorithm for the Vehicle Routing and Scheduling Problem with Time Windows. This algorithm builds routes in parallel and uses a generalized regret measure over all unrouted customers to select the next candidate for insertion. Numerical results on the standard set of problems of Solomon are reported as well as comparisons with his sequential algorithm (Solomon 1987).

A Parallel tabu search for the vehicle routing problem with time windows

by B.-L. Garcia, J.-Y. Potvin and J.-M. Rousseau. Montreal : Université de Montréal, Centre de recherche sur les transports, 1993. 17 p. Bibliogr. (Publication ; no. 927)
MICROLOG 93-08160 1 fiche

This paper describes a parallel tabu search heuristic for the vehicle routing problem with time windows. The parallel algorithm is synchronous and run on a multiple-instruction multiple-data computer architecture. Parallelism is exploited by considering many different neighbourhoods of the current solution, and by applying many modifications at once to the current solution. Computational results are reported on a standard set of test problems.

Paralytic shellfish poisoning and implications for aquaculture in the Annapolis Basin and Bay of Fundy waters

by P.M. Smith and K.J. Gaul. S.l. : Canada/Nova Scotia Economic Regional Development Agreement, Fisheries Subagreement, 1988. 24 p. : ill. (ERDA report ; no. 9) ISBN 0-88871-182-4
MICROLOG 93-04608 1 fiche

Seasonal increases in shellfish toxicity resulting in paralytic shellfish poisoning (PSP) occur annually in the Bay of Fundy and its estuaries. Data collected since 1971 on PSP from soft-shell clams, mussels, and horse mussels from areas within the Annapolis Basin were analyzed and condensed. Toxin free mussels from Beaver Harbour, Guysbourgh County were compared with mussels from the Annapolis Basin. This report provides the results of the testing.

MICROLOG 93-03711 1 fiche

This report presents the results of a survey of the ichthyoparasites of Dauphin Lake, Manitoba. Information gathered on the stomach contents of fishes is included as this can be related to the types and numbers of parasites infecting each species. Twenty-three species of fish were collected from 1985-87 using gill nets, pound nets, fyke nets, and beach seines. All were examined for ectoparasites and a complete necropsy was performed on 123 individuals. The remaining fish were inspected for plerocercoids of *Liqula intenstinalis*.

Parliamentarians and science : a discussion paper

by K. Fish. Ottawa . Science Council of Canada, 1983. 49 p. Bibliogr. (Discussion paper , 83/1) ISBN 0-662-12309-3
MICROLOG 93 04928 1 fiche

This discussion paper gives the results of a survey to determine the parliamentary resources and mechanisms existing to promote informed public policy choices based on sound scientific advice. The study was conducted to identify sources of scientific and technical information available to parliamentarians, to identify and assess the mechanisms by which parliamentarians can inject scientific evidence into the decision-making process; and to determine the weighting given to scientific factors in arriving at policy decisions. The survey was conducted through 40 interviews with Members of Parliament, Senators, heads of caucus research branches, Library of Parliament staff, committee clerks, parliamentary research assistants, and members of scientific organizations. The paper discusses the academic and professional backgrounds of MP's and their environment in Parliament, the quality of the debate in the House of Commons; the operation of Standing Committees and Special Committees or Task Forces, and available sources of scientific information

Part scores and questionnaire responses : system-wide student evaluation in grade 9A and 9G mathematics, 1989-90

by R. Bonyun. Ottawa : Ottawa Board of Education, Centre for Research, Professional Development, and Evaluation, 1991 iv, 92 p . ill. (Research report , 91-01) *ONTERIS: ON06157*
MICROLOG 93-07260 1 fiche

Reports a study in which both quantitative and qualitative measures were used to achieve a picture of grade 9 mathematics students. As part of a general, system-wide evaluation, mathematics achievement was tested at general and advanced levels There were 4 parts to the examination: basic algebra; solving equations, inequations, and applications; relations and graphing, and problem solving. To complement results, the Test Construction Committee designed a questionnaire to assess attitudes toward mathematics and gain information about student background and expectations. About 1200 students completed both parts of the evaluation. The report presents a breakdown of achievement scores by sex, school type, and programme. Achievement scores are broken down by student background. Gives corresponding data for the questionnaire's attitude items.

Participant perceptions of inviting and disinviting aspects and affective outcomes of an employment program

by C Nogradi St Catharines, Ont. Brock University, College of Education, 1990 v, 122 p. Bibliogr *ONTERIS: ON06110*
MICROLOG 93-07244 2 fiche

The perceptions of General Welfare Assistance recipients involved in an employment program and the employment services available to them, how the participants viewed the people, program, place, and policies. Inviting and disinviting aspects of each were identified, and the participants' perceived affect of these aspects. The interpretive interactionism approach was used to collect descriptions, identify themes, and interpret meanings. Interviews were conducted with 6 welfare recipients twice during their involvement with the employment program. The people, program, place, and policies encouraged participants to achieve their goals. Involvement in a supportive job search group, following the invitational model, assisted the individuals to develop feelings of positive self-worth - qualities which facilitate re-entry into the work force.

Partners in urban government

by M. Farag. Winnipeg : University of Winnipeg, Institute of Urban Studies, 1991 iii, 13 p. (Urban resources ; 2) ISBN 0-920213-49-9
MICROLOG 93-02882 1 fiche (Available on fiche only)

The increasing complexity and interdependence of governments can be harnessed effectively through a partnership approach between different levels of government. This paper presents the concept of a partnership approach between provincial and urban governments as a model for achieving optimal intergovernmental relations. It discusses the following: a definition of the partnership concept; the objectives of a partnership approach; the need for a provincial urban government partnership; the benefits of the approach; examples of partnership in action between the Province of Manitoba and the City of Winnipeg; and the limitations of the method.

Partnership for renewal : a strategy for the Saskatchewan economy

Regina : Saskatchewan Economic Development 1992. 22 p.
MICROLOG 93-01604 1 fiche

This document expresses the government's fundamental belief in partnership as a strategic approach to the issues facing the province. Much of the economic strategy set out in this paper calls for multi-level action between government, community, and individuals. It presents a strategy for the Saskatchewan economy including goals for economic development, an assessment of the current economic situation, an analysis of economic opportunities and challenges, and criteria for measuring success.

Partnership for the future : the ministers' report on families to the 1990 annual Premiers' Conference

Ottawa : Canadian Intergovernmental Conference Secretariat, 1990. 10, 15 p. : ill. *Bilingual (Partenaires pour demain : rapport...)*
MICROLOG 93-00760 1 fiche

On December 8, 1989 the General Assembly of the United Nations passed a resolution declaring 1994 as International Year of the Family. In July 1989, a symposium about families was held and the results of the symposium were reported to the Premiers a month later at their Annual Conference. The Premiers asked to receive a report in 1990 on continuing cooperation between jurisdictions. This document contains the report. It identifies conditions and trends which are affecting Canadian families and the family policies and programs of governments. It concludes with recommendations to the Premiers for further inter-provincial cooperation.

A Partnership in trouble : renegotiating fiscal federalism

by P.M. Leslie, K. Norrie and I.K. Ip. Toronto : C.D. Howe Institute, 1993. x, 174 p. : ill. Bibliogr. (Policy study ; no. 18) *CSI 99526 204.* ISSN 0832-7912 ISBN 0-88806-319-9
MICROLOG 93-06177 2 fiche

The papers in the document bring the dilemma of fiscal federalism to public attention. Although none focuses directly on deficit reduction, each is premised on the necessity of public cost cutting on a large scale if Canada's economic and social union is to survive. The papers address the following issues: the fiscal crisis of Canadian federalism, an historical perspective on some current policy choices in intergovernmental transfers in Canada, and putting a new face on fiscal federalism.

Partnerships in long-term care : a new way to plan, manage and deliver services and community support : a policy framework

Toronto : Ministry of Health ; Ministry of Community and Social Services ; Ministry of Citizenship, 1993. 65 p. : ill., maps. *French ed (Les Partenariats dans les soins de longue ...) : 93-08670/1. Highlights (40 p.) laid in.* ISBN 0-7778-1252-5
MICROLOG 93-08669 2 fiche

In 1991, the government of Ontario released a report that dealt with possible policy options for the province's systems of long-term care and community support. It was widely distributed and used as the basis for public meetings. The outcome of the public meetings provides the content of this document. It addresses the need for reform. It looks at how the new system will work, who the system will serve, how the new system will affect consumers, and how the new system will be funded. It also looks at the human resources strategy, legislation, and how to get involved.

Pasteurized fluid goat milk industry in Saskatchewan

Saskatchewan. Agriculture Development and Diversification Secretariat. Regina : The Secretariat, 1992. 59 p. Bibliogr.
MICROLOG 93-04299 1 fiche

This study was designed to profile the dairy goat industry in Saskatchewan, examine the market potential for goat milk, discuss potential market segments, identify major competitors in the market, and provide alternatives for the commercialization of the product. The study used a producer summary and a market survey to obtain information. The producer summary consisted of information submitted at a June 1992 meeting of representatives of the Dairy Producers' Co-operative and the Saskatchewan Goat Breeder's Association and was followed by personal and telephone interviews with two of the major producers. The market survey was conducted through telephone interviews with retail and wholesale grocery, confectionery, and health food companies in Saskatchewan. Hospital and nursing homes were contacted to determine demand.

La Paternité : les transformations sociales récentes

par G. Dulac. Québec : Gouvernement du Québec, Conseil de la famille, 1993. x, 93 p. Bibliogr. (Etudes et recherches) ISBN 2-550-27832-1
MICROLOG 93-07507 2 fiche

La vie familiale a connu de multiples changements depuis les dernières décennies. La paternité se transforme alors au rythme où évoluent les relations entre les conjoints, en regard de la généralisation du travail des femmes et de la réduction de la fratrie. Dans la première partie, nous retraçons les transformations récentes dans la manière de définir la paternité. Dans la deuxième partie de l'étude sont traitées les différentes étapes qui précèdent la naissance allant du désir d'enfants aux diverses manifestations de couvade. La troisième partie s'intéresse au vécu de la paternité après la naissance comme le rôle et les fonctions de la socialisation, les relations, les soins et l'éducation des enfants, de même que les tâches domestiques. La quatrième partie de ce rapport considère trois moments particuliers où les pères doivent faire face à de nouveaux défis: le mitant de l'âge, le vécu du grand-père, et celui du père adolescent. La cinquième partie de cette étude examine les conditions de l'exercice de la paternité qui concernent l'adaptation des pères aux nouvelles situations qui résultent de la mobilité conjugale des parents et des nouvelles formes d'associations familiales. En conclusion, nous traitons du malaise vécu individuellement et collectivement: celui de la spécificité de la paternité.

Pâtes et papiers : les répercussions sur l'industrie de la nouvelle réglementation fédérale en matière d'environnement

par O. Madore. Ottawa : Bibliothèque du Parlement, Service de recherche, 1992. 19 p. Bibliogr. (Etude générale ; BP-299F)
L'éd. anglaise (The Pulp and paper industry...) sur la même fiche. ISBN 0-660-94054-X
MICROLOG 93-07432 1 fiche

Dans le présent document, nous tentons de déterminer les répercussions économiques possibles des nouvelles exigences en matière environnementale sur l'industrie des pâtes et papiers. Nous présentons d'abord en bref aperçu de la nouvelle réglementation fédérale, puis nous décrivons de façon sommaire les procédés de fabrication de la pâte et du papier, ainsi que les étapes du processus de production qui ont des effets nocifs pour l'environnement. Nous traçons ensuite le profil général de l'industrie, et, enfin, nous discutons des conséquences de la nouvelle réglementation, compte tenu de facteurs tels que l'état conjoncturel et structurel de l'industrie, les procédés de production utilisés et les produits fabriqués, le lieu d'exploitation ainsi que l'âge des usines et les méthodes de dépollution existantes.

PATHLOSS analysis of UHF propagation and performance in a point-to-point communications system

by C. Roome. Montreal : Canadian Electrical Association, 1991. 14 p. : ill., maps. Bibliogr.
Presented at the Canadian Electrical Association Engineering and Operating Conference
MICROLOG 93-06226 1 fiche

Radio network design often requires working through manual plots of path profiles and endless loss calculations. Automating these calculations speeds up the process and can provide more information on which to base path choices. British Columbia Hydro uses the PC-based program PATHLOSS II, a propagation and performance analysis program for point-to-point and area coverage communications systems. Given a terrain data profile consisting of distance and elevation points along a path, the program will analyze the quality of the radio path. The application of PATHLOSS II to to a proposed UHF packet radio network is discussed. The network in the Campbell and Puntledge River watersheds on Vancouver Island would manage hydrology data retrieval, thereby improving flood prediction and control. The capabilities of PATHLOSS II are analyzed and its path loss algorithms as they apply to VHF/UHF systems are described.

Peat formation in a Westphalian B piedmont setting, Cumberland Basin, Nova Scotia : implications for the maceral-based interpretation of rheotrophic and raised paleomires

by J.H. Calder, M.R. Gibling and P.K Mukhopadhyay Halifax : Dept. of Mines and Energy, Mineral Resources Division, 1991 16 p. : ill. Bibliogr (Contribution series , 91-002) *In* Bulletin de la Société géologique de France : *t. 162, no 2, 1991*
MICROLOG 93-01449 1 fiche

This paper proposes a maceral-based method of interpretation of ancient peat-forming ecosystems (mires), based on criteria used in classification of modern peatlands (groundwater influence, nutrient and ionic supply, pH and vegetation type). This method relies heavily upon an index of groundwater influence (GWI), supported by a vegetation index. The degree of biochemical gelification of plant tissues and the abundance of mineral matter were used as variables in the calculation of GWI. The number three seam of the Westphalian B Cumberland Basin, Nova Scotia, was chosen as a case study. Profiles were studied from each of the piedmont, inner mire and riverine zones of the seam

Dans cette étude, on évalue la rentabilité financière et économique d'une entreprise d'élevage de pétoncle géant oeuvrant au Québec. Plus particulièrement, l'analyse porte sur la méthode classique d'élevage en suspension à l'aide de paniers et de lanternes japonaises. De plus, l'étude fournit un aperçu de la biologie de l'espèce, l'aperçu de l'économie de l'espèce; les techniques d'élevage, le cycle de production étudiée; la structure de l'entreprise, la description des simulations, et, l'analyse des résultats.

Pecuniary loss and the Family Compensation Act

Vancouver, B.C. : Ministry of Attorney General, Law Reform Commission of British Columbia, 1992. iii, 61 p. Bibliogr. (Working paper ; no. 69) *Cover title: Working paper on pecuniary loss and the Family Compensation Act.* ISSN 0712-1741 ISBN 0-7718-9311-6
MICROLOG 93-02965 1 fiche

When one person is injured others may also suffer financially and emotionally. The law acknowledges only a few exceptions to the general principle that the injured person alone is entitled to compensation. This paper discusses ideas and suggestions for changing the law. It looks at compensation and the family, family compensation and fatal accidents, third party rights of recovery in fatal and non-fatal cases, what loss should be recoverable, and the claim for loss of support. It also presents a summary of tentative conclusions.

Pedestrian activity study : Barrington Street and Spring Garden Road

Halifax : Halifax Development and Planning Dept., 1991. vi, 89 p. : ill., maps. Bibliogr.
MICROLOG 93-08645 2 fiche

This study provides an examination of pedestrian behaviourial patterns and looks at the way building design, street furniture and activities such as sidewalk sales affect pedestrian flow and behaviour. Through this examination, it identifies factors which contribute to the success of a pedestrian area. This information provides the basis for an evaluation of existing policies in the Municipal development plan related to the design of buildings and sidewalks which relate to pedestrian safety and comfort. It also raises several issues, which could further enhance the downtown for pedestrians and encourage more people to walk through the downtown

Pembina River dam, Entwistle site preliminary design evaluation

by J.E. McClung and M. Giratalla. Edmonton : Alberta Environment, 1990. 100 p. : ill., maps. *Fold. maps not filmed.*
MICROLOG 93-08915 2 fiche

This report evaluates the design for a dam on the Pembina River at Entwistle in the form proposed in 1969. The technical feasibility is considered, and an estimate of construction costs for the works more or less proposed in 1969 is given. Since the original proposal was made, there have been advances in hydrological and geotechnical engineering, and in the understanding of the engineering properties of the type of bedrock strata which are present in this site. The purpose of this report is to review, revise and update the conceptual design and cost estimated for the Entwistle Dam.

Pembina River Valley floodplain management study, phase I : feasibility evaluation non-structural alternatives : final report

Edmonton : Alberta Environment , IBI Group, 1990. 71 p.
MICROLOG 93-08916 1 fiche

The purpose of this study is to evaluate, at a feasibility level, all non-structural methods for reducing flood damages in the Pembina River Valley and to recommend the most feasible methods for more in-depth evaluation in Phase II, the preliminary evaluation. This report contains a summary of the findings of the various investigations undertaken in fulfilment of the study objectives. It contains a contextual summary and details relevant information for the area, flooding history, flood damages and flood risk. It also examines non-structural measures; presents a detailed analysis of the alternatives selected for application within the flood study, and also provides an evaluation of these alternatives with respect to a set of criteria which considered both commensurable and noncommensurable aspects. Recommendations are included.

Penetrating the U.S. environmental market : prospects and strategies for Canadian consulting engineers, U.S. eastern seaboard focus : a final report

for External Affairs and International Trade Canada ; conducted by Ernst & Young Management Consultants ; with the guidance of the Association of Consulting Engineers of Canada and Industry, Science and Technology. Ottawa : External Affairs and International Trade Canada ; The Association, 1992. x, 100 p.
MICROLOG 93-00100 2 fiche

The federal government and the Canadian industrial community are emphasizing the growth of Canadian capabilities in the U.S. environmental engineering market. This study addresses the considerations of market size and trends; costs of doing business; relevant licensing requirements, major hindrances, inconveniences, and legislated barriers facing potential entrants; relevant legislation; strategies of other Canadian entrants to the U.S. market; options regarding acquisition or joint venturing as a means of entering the market, and local trade shows, trade journals, seminars, associations, companies, and government information sources. The study focuses on the Eastern Seaboard states with an emphasis on private sector projects because of a view that private sector opportunities are substantial, are likely to expand rapidly, and have fewer strings attached than publicly-funded projects. The report describes the U.S. market, the criteria for market entry, and the methods of identifying specific opportunities.

The Peninsula : increasing opportunities for high density housing : a discussion paper

Halifax : Halifax Development and Planning Dept., 1992. 31 p.
MICROLOG 93-08646 1 fiche

This document describes residential intensification and provides a discussion of its benefits and justification. It gives a brief update of housing development statistics in the city. It also summarizes a series of interviews undertaken with people involved in the development of housing in the city. It includes a list of the issues raised as well as a summary of the potential solutions offered for these issues. Finally, it discusses the ways and the locations in which residential intensification is encouraged in the city now, provides basic principles of intensification which have been generally accepted, and proposes four methods the city could pursue to increase the opportunities for additional high density residential development on the Peninsula

Per pupil survey : description of items (schedules A1 and B1)

Toronto : Ministry of Education, 1991. 36, 36 p.
Bilingual (Analyse comparative des dépenses...). CSI 55108.016 ONTERIS: ON05989
MICROLOG 93-00614 1 fiche

Presents data on per pupil expenditure taken from 1990 financial statements and 1991 school boards' estimates. These analyses enable school boards to compare their enrolments, expenditures, grants, etc., with those of other boards of similar size in their area. Boards are listed in ascending order of size. Reports are divided into counties, districts, and defined cities for each of public elementary, separate elementary, public secondary, and separate secondary. Gives pupils in school, average daily enrolment, business and general administration, plant operation and maintenance, pupil transportation, capital expenditure, debt charges, reserve funds, current cost of operating as used in the determination of tuition fees, rate of grant on recognized ordinary expenditure, and excess of ordinary expenditure over maximum recognized per average daily enrolment.

Perceptions of participants in the Orientation Buddy Program in Area 10

by M. Hale and L. Earl. Scarborough, Ont. : Scarborough Board of Education, Program Dept., Research Centre, 1992. iii, 41 p. (Research report ; no. 91/92-10) *ONTERIS: ON06031.*
MICROLOG 93-02024 1 fiche

Scarborough administrators were interested in the perceptions of the participants (1st-year teachers, buddies, and principals of participating schools) of the Orientation Buddy Program. Surveys were developed for the 3 groups involved, to review the program and determine whether it was useful. The survey found that the program greatly helped 1st-year teachers to develop an understanding of the philosophy of the school. Buddies agreed with 1st-year teachers, enjoying the opportunity to talk about development and learning, reflect on their own teaching philosophy, and help another professional grow and learn. Principals said they received positive feedback from their staff members, and all said they would participate in a similar program again. Overall, the program was a success.

Perceptions of teaching and learning in the workplace

by M. Sheasby. Toronto . Ontario Institute for Studies in Education, 1992. 19 p. Bibliogr.
Presented at the Ontario Educational Research Council Conference. ONTERIS: ON06123.
MICROLOG 93-07254 1 fiche

A review of research literature in the area of co-operative education revealed a lack of rigour. Working within a grounded theory paradigm, research began with a systematic observation of the relationships among the supervisor, student and teacher in 7 research triads. Interviews, student records and assessment discussions provided additional data. 4 main learning themes emerged: technical, interpersonal, intrapersonal and career. Results suggest the importance of technical, interpersonal and intrapersonal skills to the participant. Much of the literature in Ontario has stressed developing career awareness as the prime goal of co-operative education or learning in the workplace. The enquiry led to a different perception: that engagement with the workplace, whether through learning technical skills or growth of personal skills, is of greater significance to the participants than previously thought, and further, that career preparation is of lesser importance to participants.

Performance and cost evaluation of best available technology options for the Ontario inorganic chemical sector

CH2M Hill Engineering Ltd. Toronto : Ministry of the Environment, MISA Office, 1992. 579 p. : ill. Bibliogr. ISBN 0-7778-0209-0
MICROLOG 93-03316 7 fiche

The Municipal-Industrial Strategy for Abatement (MISA) program is a regulatory program with the ultimate goal of virtual elimination of persistent toxic contaminants from all discharges to Ontario waterways. To develop effluent limits, pollution control technologies available to the industry for removal of contaminants must be evaluated and their financial and economic impacts on the industry must be known. The best available technology (BAT) economically achievable (EA) for the industry can then be determined and will form the basis for setting effluent limits. To this end, a two-phase study to develop an inventory of BAT applicable to plants in the inorganic chemical sector was developed, the first being a global study and the second an Ontario study. This report presents the results of the Ontario study which evaluated performance and estimated costs of the recommended BAT options if installed at each Ontario plant. The report describes the study methods and the selection of BAT options, site visit reports, and BAT option reports.

Performance appraisal knowledge and administrator practice

by E.S. Hickcox. Toronto : Ontario Institute for Studies in Education, Dept. of Educational Administration, 1989. 15 p. Bibliogr. *ONTERIS: ON06240.*
MICROLOG 93-07249 1 fiche

Examines 3 Ontario school districts and finds 3 stages of performance appraisal conceptualization. Reports that in the traditional stage, principals evaluate teachers by observing classes, making written reports, and informing the teacher about ways to improve. In the developmental stage, school districts realize the shortcomings of the traditional approach and revise policies, reflecting an attempt to help teachers develop professionally. In the highest or emergent stage, implemented in few Ontario boards, the focus shifts from classroom observation to conferences, the development of collegial relationships, and a less judgmental flavour. Offers 6 guidelines for effective action: good supervision involves providing assistance, rather than imparting knowledge; a one-on-one counselling approach suits most teachers better than observation and written reports; appraisal systems work best if individuals high in the organization are involved in appraisal systems of their own to an equal or greater extent compared to subordinates; appraisal for improvement should be separated from appraisal for judgement; multiple sources of data for appraisal are better than a single source; and supervision should have only 2 components: program improvement and personnel growth.

Performance characteristics of four biological filters and the development of a filter sizing procedure

by L.J. Vandenbyllaardt and M.J. Foster. Winnipeg : Dept. of Fisheries and Oceans, Central and Arctic Region, 1992. iv, 21 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1854) *This is the 46th technical report from the Central and Arctic Region, Winnipeg.* ISSN 0706-6457
MICROLOG 93-03708 1 fiche

The types of biological filters used in hatcheries are extremely variable in their construction and operations. As a result, performance of these systems under similar fish loads may also vary. This study monitored the ammonia removal abilities of a downwelling gravel filter with different volumes, a trickle filter with two types of available plastic media, and an upwelling filter with small plastic beads as substrate. Performance and operating characteristics of each system were compared at similar fish densities and feeding rates. A series of predictive equations were developed to size filters, determine ammonia levels, and filter performance at various feeding rates.

Performance evaluation and demonstration of the RANAV, Radar-Assisted Precise Navigation, system in the St. Lawrence River

prepared for Transportation Development Centre, Policy and Coordination, Transport Canada ; by Darrell Kalnicki, and Reynold Harrs. North Vancouver, B.C. : Offshore Systems Ltd., 1992. xiv, 451 p. : ill., maps. Bibliogr.
MICROLOG 93-03700 5 fiche

In 1987, development of a radar-based positioning system with electronic chart display called RANAV (Radar-Assisted Precise Navigation System) was begun to assist ferry navigation and mooring operations during Marine Atlantic's scheduled crossings between Nova Scotia and Newfoundland. This project evaluated the suitability of the system for the St. Lawrence environment and continued development supporting all-season navigation. System development included further integration of RANAV subsystems and compilation of written specifications that detail reflector, shipboard sensors, and radar processor installations and calibrations. Static and dynamic positioning accuracy was analyzed and evaluated aboard a test vessel in the St. Lawrence River and the collected data was processed and statistical tests were performed to determine accuracy values. Qualitative testing was also completed and evaluated for functionality. This report details the work, research, and development performed. Procedural guides written to assist in implementation are also included.

St. Joseph Printing is a family owned corporation which began its history 37 years ago when the founder began printing wedding invitations in his basement. Since then, it has expanded and now has a problem recycling waste paper. This document discusses the performance of waste paper recovery in the printing plant. It addresses the problem, equipment tested and used, costs, insulation and commissioning, and results.

Performance restoration of Bruce A Station

by K.H. Talbot and W.K.G. Palmer. Montreal : Canadian Electrical Association, Engineering and Operating Division, Thermal and Nuclear Power Section, Nuclear Power Subsection, 1992. 10 p. : ill. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06238 1 fiche

In the early 1980s, performance at Bruce Nuclear Generating Station A was better than any other nuclear generating station in the world. However, station performance deteriorated continuously from 1984 to 1990. It appears that during the years of excellent performance, budgetary restraint eroded the capability of performing preventive maintenance and skilled staff were redeployed to newer stations being commissioned. An adversarial forum of labour-management relations was also encountered. Technical problems encountered, equipment rehabilitation, people problems, and quality improvement are discussed. The approaches and programs being taken by Ontario Hydro to return the station to excellent performance are described.

The Periodic changes in gonad weight and spawning cycle of the Baltic and belt cod *G. morhua callarias/G. morhua morhua* in different regions of the Baltic

by M. Berner Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1993. 23 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5604) *Orginally published in German.* ISSN 0704-3716
MICROLOG 93-08462 1 fiche

Studies were made using the ratio of length of gonad weight, the gonadosomatic index, and the percentage change in gonad weight to confirm a number of earlier assumptions such as the earlier sexual and spawning maturity of the males, the early spawning of the large cod, and the late spawning of the small first-time spawners of both sexes in the same spawning community. Because of the varying results in several geographic areas and time periods, the study was given a broader base by including as many Baltic Sea cod stocks as possible and to some extent the same stocks in different years.

Perles de verre provenant du fort de Coteau-du-Lac (Québec)

par K. Karklins. Ottawa : Environnement Canada, Parcs Canada, Direction des lieux et des parcs historiques nationaux, 1979. 160 p. : ill. Bibliogr. (Histoire et archéologie ; 15) *Publié avec: Le Métier de soldat à Coteau-du-Lac (Québec), 1780 à 1856 -- La Verrerie de table de Coteau-du-Lac (Québec) -- Pièces de monnaie retrouvées au fort de Coteau-du-Lac (Québec).* ISSN 0227-3551 ISBN 0-660-90211-7
MICROLOG 93-03439 2 fiche

Les fouilles archéologiques faites au fort de Coteau-du-Lac (Québec) ont livré un grain de plastique et 54 perles de verres de 10 modèles différents. Du total, 44 spécimens proviennent d'un chapelet. Les autres sont toutes des perles de collier dont deux remontent au XVIIe siècle. Ces deux dernières datent d'avant le comptoir d'approvisionnement à ce site et indiquent la présence de marchandises européennes de troc très tôt dans la région. Ce document se penche sur les perles de verre provenant de cette région et examine particulièrement les perles étirées, enroulées et les autres perles.

Permafrost : climate activities within the Canadian Climate Centre

by D.A. Etkin, A. Headley and K. Stoker. Downsview, Ont. : Atmospheric Environment Service, Canadian Climate Centre, 1988. vi, 91 p. : ill., maps. Bibliogr. (Report ; no. 88-7)
MICROLOG 93-00255 2 fiche

This report describes the setting up of a number of long-term untended stations to monitor permafrost temperatures as well as on-site meterological variables. The data collected would form a set of baseline data that could be used to better understand the nature of permafrost-climate relationships. Possible changes would be studied to the permafrost regime of Canada in response to climatic warming through the use of empirical modelling, and a numerical heat flow model would be developed that could be used as a further impact study tool.

Persistance and degradation of diflubenzuron in conifer foliage, forest litter and soil, following simulated aerial application

by K.M.S. Sundaram. Sault Ste. Marie, Ont. : Forestry Canada, Forest Pest Management Institute, 1986. i, 19 p. : ill. Bibliogr. (Information report ; FPM-X-74) *French ed (Persistance et dégradation du .) on the same fiche.* ISSN 0704-772X ISBN 0-662-14876-2
MICROLOG 93-02794 1 fiche

Diflubenzuron ureal was introduced commercially in 1976 under the trade name Dimilin. It is a stomach poison and acts in vivo by interfering with the deposition of chitin, thus inhibiting the moulting process and causing death. Before marketing the chemical for broadcast application to control forest pests in Canada, it must be field tested and assessed for its environmental safety, persistence and fate under Canadian conditions. This study was undertaken specifically to elucidate the behaviour and fate of the chemical in conifer foliage, forest litter and soil samples using a simulated aerial spray application technique. The study was carried out in a privately owned tree farm near Shawville, Quebec in May and June 1976.

Personal experiences with new reproductive technologies : report from private sessions

Ottawa : Royal Commission on New Reproductive Technologies, 1992. iv, 21 p. *French ed. (Expériences personnelles liées ..) on the same fiche.*
MICROLOG 93-07454 1 fiche

As part of its program of consultations with Canadians, the Royal Commission on New Reproductive Technologies offered private, or armchair, sessions to individuals or couples who had personal experiences with one or more of the new reproductive technologies. The primary objective of the private sessions is to provide an opportunity to individuals and couples to share their experiences and to voice their concerns. This document discusses drugs, artificial insemination *in vitro* fertilization, gamet intrafallopian transfer, ova donation, prenational diagnosis, and pre-conception arrangements. It also discusses issues such as motivations and pressure, causes of infertility, information and decision making, counselling, public awareness and education, access, costs, drug costs, multiple pregnancies and birth defects, the medical profession, research, adoption, and leave from jobs for infertility treatment.

Personal income tax coordination : the federal-provincial tax collection agreements

Ottawa : Dept. of Finance, 1991. iv, 54 p.
MICROLOG 93-00973 1 fiche

Within Canada's federal structure, provinces levy their own taxes. Coordinating these independent systems with that of the federal government is a vital element of the national tax system. This document puts forward a framework for considering and evaluating the implications of changes to the tax collection agreements that could be undertaken to provide provinces with the flexibility they seek. It is designed to elicit comments, not to argue a particular view. It presents information on tax coordination in a federal state and tax coordination in Canada. It includes an illustrative model and presents the consultation process.

MICROLOG 93-06144 1 fiche

La structure de l'industrie mondiale de la pêche a subi d'importantes modifications au cours de la dernière décennie suite au prolongement, par bon nombre de pays, de leurs aires de compétence nationale en matière de pêche. Autrefois dominée par un nombre de pays maritimes relativement peu nombreux, cette industrie compte maintenant plus de 100 états côtiers, tant développés qu'en voie de développement, qui s'accaparent plus de 95 pourcent des ressource halieutiques mondiales de la mer. L'industrie canadienne du poisson de fond, concentrée dans le Canada atlantique, doit faire face à une forte concurrence et à des modifications des demandes des consommateurs au sein de ses marchés clés. Le présent aperçu est divisé en trois grandes parties. On examine tout d'abord la demande, ensuite la disponibilité et l'offre de la ressource avant de traiter des prix. Des renseignements statistiques détaillés sont regroupés dans une série de tableaux donnés en annexe.

Perspectives on Canadian housing policy

edited by Tom Carter. Winnipeg : University of Winnipeg, Institute of Urban Studies, 1989. 33 p. Bibliogr. (Occasional paper ; 17) ISBN 0-920213-62-6
MICROLOG 93-02880 1 fiche (Available on fiche only)

This publication is devoted to papers originally presented at the Urban Studies and Housing Conference held in Winnipeg in February 1988. The first paper on housing and urban policy describes and justifies the current policy direction of CMHC and addresses issues that are likely to concern housing policy analysts over the next few decades. The second paper on Canadian housing policy examines the historical development of housing policy in Canada. The third paper on federal housing policy examines current CMHC policy and its implications for provincial agencies. The final paper focuses on housing distribution and how housing problems can be addressed by better use of existing stock.

Les Petits bâtiments : une technologie en transition

Ottawa : Conseil national de recherches du Canada, Institut de recherche en construction, 1990. vi, 66 p. : ill. Bibliogr. (Comple rendu ; no 17) *Exposés présentés dans le cadre du Regard '90 sur la science du bâtiment. L'éd anglaise (Small buildings : technology in transition) : 93-05550/1* ISSN 0835-6548
MICROLOG 93-05549 1 fiche (Available on fiche only)

Le programme 'Regard sur la science du bâtiment' est une série annuelle de séminaires d'une journée qui sont présentés aux praticiens de l'industrie canadienne de la construction. Le 'Regard 90, Les petits bâtiments : une technologie en transition' a été présenté dans 15 villes canadiennes à l'automne de 1990. Cette publication contient les quatre documents qui ont fait l'objet d'exposés dans le cadre de Regard 90. On y examine la réduction des risques d'incendie dans les petits bâtiments; le contrôle de l'écoulement de la chaleur, de l'air et de l'humidité par l'enveloppe du bâtiment; les stratégies de ventilation pour les petits bâtiments; et, les développements dans le domaine de la lutte contre le bruit.

Petrographic and geochemical evidence for a hypogene origin of Granite-Hosted, vein-type Mn mineralization at the New Ross Mn deposits, Lunenburg County, Nova Scotia, Canada

by G.A. O'Reilly. Halifax : Dept. of Mines and Energy, Mineral Resources Division, 1992. 27 p. : ill. Bibliogr. (Contribution series ; 92-009) *In* Economic Geology *: vol. 87, 1992.*
MICROLOG 93-07161 1 fiche

This paper reports the results of petrographic and geochemical studies based on a diamond drilling program carried out by the province of Nova Scotia in 1986 at the former Dean and Chapter mine. The program consisted of three drill holes positioned to: examine the fault zones at depths of 75, 170, and 370 m below the previous mine workings; test a model of metal zonation with depth proposed for this and similar deposits by Hewett (1964, 1968) and Bishop and Wright (1974); test for the presence of a mineralizing granite cupola beneath the deposit; and provide complete sections of the zone(s) for better petrographic and geochemical studies to obtain a better understanding of the origin of the deposits.

Petrography and utilization of Paleozoic, Middle Ordovician carbonate rocks in southern Ontario

by L. Dolar-Mantuani. Toronto : Ministry of Natural Resources, Division of Mines, 1975. vii, 59 p. : ill., maps. Bibliogr. (Industrial mineral report ; no. 42) *Fold. maps not filmed*
MICROLOG 93-02365 1 fiche

The Middle Ordovician Simcoe Group in southern Ontario consists mainly of limestone and very subordinately of dolostones. Six quarries were studied in detail and samples of rocks were analyzed petrographically and classified according to Folk to determine the lithologically different formations of the Gull River, the Bobcaygeon, the Verulam and the Lindsay.

MICROLOG 93-06629 3 fiche

Les problèmes et préoccupations des Autochtones tels que les revendications territoriales et l'autonomie gouvernementale ont piqué l'intérêt des Canadiens. Ce document examine les efforts déployés au cours des dernières années pour assurer une plus grande représentation des Autochtones à la Chambre des communes. Il examine particulièrement les points suivants: les autochtones et la réforme constitutionnelle et électorale; les circonscriptions autochtones au Canada - les leçons de la Nouvelle-Zélande, les peuples autochtones et la couverture médiatique des campagnes électorales dans le Nord; et la réforme électorale et la population autochtone du Canada - évaluation des circonscriptions autochtones.

Les Peuples autochtones vivant en milieu urbain : rapport

Table ronde nationale sur les préoccupations des populations urbaines autochtones (1992 : Edmonton, Alb.). Ottawa : Commission royale sur les peuples autochtones, 1993. viii, 111 p. : ill. *L'éd. anglaise (Aboriginal peoples in urban centres : report) : 93-07686/2.* ISBN 0-660-94169-4
MICROLOG 93-07687 2 fiche

Du 21 au 23 juin 1992, la Commission royale sur les peuples autochtones a parrainé une table ronde nationale sur les préoccupations des populations urbaines autochtones. La Table ronde sur les préoccupations des populations urbaines autochtones s'articulait autour de quatre thèmes, soit les services, la structure de gouvernement, l'économie, et la santé et le bien-être. Seize ateliers ont eu lieu simultanément sur les quatre thèmes et ont été suivis de séances plénières. Le lecteur trouvera plus loin un compte rendu du déroulement des ateliers. Ce rapport se penche donc sur la situation des autochtones vivant en milieu urbain et vise à mobiliser la volonté générale, autochtone comme non autochtone, notamment des dirigeants municipaux et des décideurs, afin de trouver solution aux questions soulevées à la table ronde et au cours des autres consultations menées par la Commission.

Phenolics (4AAP) in reagent water and STP effluent : report

by S.S. Selliah. Toronto : Environment Ontario, 1992. 22 p. : ill. Bibliogr. (Interlaboratory study ; 91-3) ISBN 0-7778-0010-1
MICROLOG 93-02077 1 fiche

This is the second interlaboratory study initiated as part of an ongoing program to evaluate the ability to measure phenolics in reagent water and sewage treatment (STP) plant effluent. Forty laboratories agreed to participate in this study and two failed to report results after receiving the samples. Three samples in reagent water and STP effluent were prepared and distributed to the participants, who were requested to use the 4-AAP method specified in the Municipal-Industrial Strategy for Abatement (MISA) regulations. The performance of the participants was evaluated using King-Selliah graphical procedures. This report provides the results of the tests.

A Phenomenological study of ethical teaching practice in nursing education from the perspective of nurse educators

by C.M. Scott. St. Catharines, Ont. : Brock University, Faculty of Education, 1991. vi, 146 p. Bibliogr. *ONTERIS: ON06104.*
MICROLOG 93-07245 2 fiche

Investigates ethical teaching pratices in nursing education from the perspective of nurse educators. In taped sessions, 12 female nurse educators described their own experiences in the ethical domain of their teaching and discussed influences to this aspect of their practice. Phenomenology, an inductive descriptive research approach, was used and the data was analyzed according to Colaizzi's procedure. 60 theme clusters fell into 26 categories under how ethical teaching practice evolved, what influences it, and how it is demonstrated. Data gathered in response to the question of whether being female made a difference to the participants' teaching practice was analyzed separately. A description of the phenomenon and its essential structure are given, implications for practice, theory, and research are discussed, and recommendations are made.

Phosphorus placement and row spacing in field pea : final report

by T. Wright. Regina : Saskatchewan Agriculture Development Fund, 1990. 11 p.
MICROLOG 93-05690 1 fiche

Research on the response of field pea to row spacing and phosphorus placement combinations was conducted on three soil types in northeastern Saskatchewan from 1986-88. Three phosphorus levels were used with three placement-row spacing combinations. Ten station years of data was gathered and analyzed. Nutrient analyses were conducted on the plant material to determine total uplake and concentration of phosphorus for each of the row spacing and fertilizer placement combinations. Soil tests were taken at each site and meteorological data were collected. At flowering, total plant biomass was evaluated for yield, phosphorus concentration, and phosphorus content to determine the effect of row spacing and fertilizer placement combinations on field pea vegetative growth. At harvest, the grain was similarly analyzed for yield, phosphorus concentration, and phosphorus content.

A Photo-series for assessing fuels in natural forest stands in northern Ontario

by B.J. Stocks...et al. S.l. : Canada-Ontario Forest Resource Development Agreement, 1990. v, 161 p : ill. Bibliogr. (COFRDA report ; 3304) ISSN 0847-2866 ISBN 0-662-17677-4
MICROLOG 93-01271 2 fiche

Over the past 20 years, an experimental burning program has resulted in detailed documentation of fuel loads in selected fuel types. However, very little quantitative data has been gathered on the majority of Ontario's fuel complexes found in the Boreal and Great Lakes-St. Lawrence forest regions. This photo-series was designed to present photographs and a detailed inventory of fuels for important stands in the area. During the first phase of the study, a database was compiled on natural fuel loads for 300 stands in a variety of fire-dependent ecosystems across northern Ontario. The 75 stands included in this document depict a representative cross-section of fuel types from the 300 stands. All stands were coded according to the Forest Ecosystem Classification of Ontario.

MICROLOG 93-00021 3 fiche (Available on fiche only)

This report presents the findings of a study undertaken to develop a database of physical and chemical characteristics for 16 different waste sludges and solids produced by the natural gas processing industry. The study represents Phase I of a three-phase project designed to assess treatment technology options for these waste materials. The database used information obtained from a review of existing data and a comprehensive field sampling and laboratory analytical program in which three samples of each sludge type from different gas plants were analyzed for up to 40 different physical and chemical parameters. A quality assessment was prepared using the results obtained from the laboratory quality control program implemented for the project. A preliminary evaluation of the physical and chemical characteristics of the sludges and solids in relation to the definition of hazardous waste as defined in the Alberta Hazardous Waste Regulation was carried out.

Phytotoxicology assessment investigation in the vicinity of American-Standard, Cambridge, 1990

by G.N. Vasiloff. Toronto : Environment Ontario, 1992. 21 p. ISBN 0-7778-0000-4
MICROLOG 93-02070 1 fiche

On 30 August 1990, a vegetation survey was conducted at established sites in the vicinity of the American Standard plant in Cambridge, Ontario. Vegetation at 17 sites initially established in 1989 was examined in 1990 for evidence of injury and sampled for chemical analysis. Three new sites west and northwest of the plant were added for the 1990 survey. At each site, either silver maple, Norway maple or both were used for observational and sampling purposes. Vegetation at each site was examined for air pollution injury symptoms and injury severity ratings and the percentage of injured foliage at each site. Following the observational phase, and depending on availability, silver, Norway or amur maple foliage was collected in duplicate for chemical analysis. The foliage samples were analyzed for boron, fluoride, barium, titanium, sodium, nickel, zinc, lead, magnesium, copper, sulphur and iron. This report provides the results of the analysis.

Phytotoxicology assessment survey in the vicinity of the Shell, PetroCanada and Imperial Oil petroleum tank farms, Toronto, 1991

by J.C. Kinch. Toronto : Ministry of the Environment and Energy, Air Resources Branch, 1993. 10 p. (Report ; ARB-251-92-PHYTO) ISBN 0-7778-0801-3
MICROLOG 93-07491 1 fiche

In August 1991, Health and Welfare Canada investigators expressed concerns that vegetables grown and sold from a market garden in the City of North York were being contaminated by adjacent petroleum storage tank farms owned by Imperial Oil, PetroCanada, and Shell. As a result of this concern, the Ontario Ministry of the Environment conducted a field investigation on 23 September 1991. Initial visual surveys of the crops and near surface soils were conducted prior to sampling. Composite soil samples were collected from 12 sampling sites, selected to be increasingly distant from the petroleum storage areas and to represent the diversity of crop types within each agricultural block. Samples were analyzed for volatile organics and petroleum distillates. This report provides the results of the sampling.

Phytotoxicology assessment survey investigations on Cornwall Island in Ontario in the vicinity of the Reynolds Metals Company (RMC), Massena, New York, 1989 and 1991

Ontario. Phytotoxicology Section. Toronto : The Section, 1993. 35 p. Bibliogr. (Report ; ARB-014-92-PHYTO) ISBN 0-7778-0790-4
MICROLOG 93-07488 1 fiche

A federal-provincial study with participation by a number of government agencies has been ongoing on the Cornwall Island Reserve (Mohawks of Awkwesasne) since 1975. Before that, the Ontario Ministry of the Environment had been conducting annual vegetation assessment programs and responding to complaints concerning the adverse effects of airborne fluoride emissions on vegetation and cattle since 1969. The source of the fluoride emissions was identified as the Reynolds Metal Co. in Massena, New York. This report presents the results of the most recent investigations in 1989 and 1991 on Cornwall Island.

Phytotoxicology assessment surveys in the vicinity of Eldorado Resources Ltd., Port Hope, 1986 and 1987 : report

by D.L. McLaughlin. Toronto : Ministry of the Environment, Air Resources Branch, Phytotoxicology Section, 1991. v, 74 p. : ill., maps. Bibliogr. ISBN 0-7729-8701-7
MICROLOG 93-06772 1 fiche

Soil and vegetation surveys conducted in the vicinity of Eldorado Resources Ltd. in Port Hope, Ontario, are summarized. Eldorado Resources manufactures uranium hexafluoride and uranium dioxide, used to produce fuel for nuclear power plants. The surveys examined atmospheric emissions of U, F and As, and quantified injury to vegetation from fluoride emissions. Soil concentrations of U, Cu, Ni, Pb, Zn, Fe, As, Co, Cr, Sb and various radionuclides were also measured. Results of the 1986 and 1987 soil assessment surveys are presented, along with results of maple foliage analysis, heavy metals analyses, and grass surveys.

Phytotoxicology investigation in the vicinity of a tire fire at Gormely, Ontario, August 31, 1990

by W.D. McIlveen. Toronto : Ministry of the Environment, Air Resources Branch, 1993. 4 p. (Report ; ARB 004-91-Phyto) ISBN 0-7778-0146-9
MICROLOG 93-06439 1 fiche

On 30 August 1990, a fire consumed approximately 3,000 discarded automobile tires at the Don Mills Steel and Metal wrecking yard, located about 1 km south of Gormley, Ontario. Concern was expressed that the field and garden crops grown in proximity to the fire site might be contaminated by chemicals in the smoke from the burning tires. This report summarizes information obtained during an investigation of the site and the taking of vegetation samples which were analyzed for polycyclic aromatic hydrocarbons, copper, nickel, iron, zinc, lead, cadmium, sodium, cobalt, molybdenum, manganese, chromium, aluminum, strontium, and vanadium.

In 1986 and 1987, surveys were conducted to assess the condition of vegetation growing in the vicinity of Hamilton Brick in Hamilton, Ontario. The foliage of sensitive plant species in close proximity to the brick plant was found to have symptoms typical of fluoride injury. Samples collected during each of those visits confirmed that elevated concentrations of fluoride were present in the tissues of foliage. In 1991, the survey was repeated and the results of the survey are presented in this report.

Phytotoxicology investigation report in the vicinity of Laidlaw Environmental Services Ltd., Corunna, 1991

by R. Jones. Toronto : Ministry of the Environment and Energy, Air Resources Branch, 1993. 23 p. : ill. Bibliogr. (Report ; ARB-087-92) ISBN 0-7778-0791-2
MICROLOG 93-07489 1 fiche

Laidlaw Environmental Services Ltd. at Corunna operates an industrial waste disposal facility that includes both the land filling of hazardous materials and the incineration of industrial wastes. There has been considerable public concern about the environmental impact of the company. An annual assessment survey in the vicinity of Laidlaw has been conducted in every year since 1977, except for 1980 and 1988. This report provides the results from the 1991 survey, in which silver maple foliage was sampled at 20 locations within 12 km of the Laidlaw site. Duplicate samples were collected at each location for chemical analysis and visual inspections of the native vegetation were made at each site for symptoms of air pollution injury. The foliage was analyzed for 29 elements.

Phytotoxicology Section investigation in the vicinity of Laidlaw Environmental Services Ltd. (formerly Tricil Ltd.), Corunna, in 1988 and 1990

Toronto : Ministry of the Environment, 1992. ii, 58 p. : ill. ISBN 0-7778-0071-3
MICROLOG 93-03763 1 fiche

The Laidlaw Environmental Services Ltd. (formerly Tricil Ltd.) operation at Corunna is an industrial waste disposal operation that includes both the land filling of hazardous materials and the incineration of industrial wastes. There has been considerable public concern about the company, with numerous complaints of vegetation damage reportedly caused by emissions. Surveys have been carried out since 1977 at 30 sampling stations within 10 km of the operations. The number of stations has changed from year to year, with different types of vegetation sampled. In 1989 and 1990, the survey was increased to determine if the high chloride levels were due to soil salinity or emissions from the Laidlaw operation. This report summarizes the methods and the results of those surveys for 29 elements.

Phytotoxicology Section investigation in the vicinity of Welland Chemical, Sarnia on August 23, 1989 : report

Ontario. Phytotoxicology Section. Toronto : The Section, 1991. 8 p. : maps. Bibliogr. ISBN 0-7729-7892-1
MICROLOG 93-01810 1 fiche

Welland Chemical, Scott Road, Sarnia, is a manufacturer of anhydrous aluminum chloride. During manufacture of the product, there are fugitive emissions which react with the air to produce hydrochloric acid and aluminum oxide. Complaints of damage to vegetation in the immediate vicinity of the company have been observed since 1970. Annual assessment surveys were carried out around the plant from 1978-87 documenting injury to vegetation. On 23 August 1989, a phytotoxicology investigation was conducted in the vicinity of Welland Canal. This report gives the results of that investigation.

Phytotoxicology Section verification sampling of the South Riverdale soil replacement project

by W.I. Gizyn. Toronto : The Section, 1993. 16 p. Bibliogr. (Report ; ARB-008-92-PHYTO) ISBN 0-7729-9998-8
MICROLOG 93-07486 1 fiche

In 1987, the South Riverdale neighbourhood north of the Canada Metal Co. plant in Toronto, Ontario was involved in a soil removal project for residential and school properties and municipal road allowances in which soil was contaminated with lead over 500 ppm. Soil was removed to a depth of 30 cm and replaced with uncontaminated soil and sod, and gravel from areas used for parking was replaced to a depth of 15 cm. Near the completion of the project, a verification study involving a randomly selected 10% of the qualifying sites was conducted to assess its success. This report describes the soil replacement area and procedures and the results of the sampling.

Phytotoxicology vegetation assessment survey in the vicinity of Canada Brick, Burlington, August 1991

Ontario. Phytotoxicology Section. Toronto : The Section, 1992. 7 p. ISBN 0-7778-0030-6
MICROLOG 93-01941 1 fiche

On 26 August 1991, a vegetation assessment survey was conducted in the vicinity of Canada Brick, Burlington, Ontario to determine the effects of fluoride emissions on surrounding vegetation. Previous surveys conducted in 1990, 1989, 1987 and 1986 indicated that emissions of fluorides increased after expansion of the brick production facilities in late 1986 through mid-1987. Tree foliage was collected from exposed middle branches at the same sites sampled in previous years. At each site, duplicate foliage samples were collected. All sites, except for three, were off company property. In addition, foliage of trees and other vegetation growing in the vicinity of the collection sites was inspected for fluoride injury. This report gives the results of the sampling.

Ce rapport décrit le plan visant la récupération, le recyclage et la régénération essentiels des chlorofluorocarbures (CFC) en vue de leur réutilisation au Canada, afin d'assurer que l'important stock commercial de ces composés ne soit pas libéré dans l'atmosphère. Il porte également sur le besoin de récupérer les hydrochlorofluorocarbures (HCFC) en vue de leur réutilisation. Un plan d'action national harmonisé contenant un ensemble d'objectifs et de tâches acceptés a été élaboré de façon à servir de base aux programmes fédéraux et provinciaux, aux mesures réglementaires et à l'élaboration des données.

Dans les différentes études sur l'architecture canadienne du XIXe siècle, les édifices publics et religieux conservent toujours une place très importante. De plus, les plans de ces deux catégories d'édifices ont toujours été plus faciles à retrouver que ceux des maisons privées et des édifices commerciaux. Ce document présente les plans de l'architecture publique, religieuse et du génie mécanique inventoriés aux Archives nationales du Québec à Montréal.

Plant Biotechnology Institute (Canada) : Annual report 1991-92

Saskatoon, Sask. : The Institute, 1992. 44 p. : ill. Bibliogr. *CSI 22405.001.*
MICROLOG 93-01897 1 fiche (Available on fiche only)

The National Research Council operates more than a dozen national laboratories along with programs for scientific-technical information and industrial research assistance. In the biotechnology program, the Plant Biotechnology Institute has the mission of delivering new, exploitable biological and biochemical methods for the control and genetic alteration of plant development, especially at the cellular and molecular levels. This annual report covers the highlights of the year, the institute and its organization, activities, management and administration, resource profiles, the Advisory Board, and research activities. Also presents a list of publications, awards and distinctions, patents and licenses, presentations, participation on committees, and personnel.

Plant diseases of irrigated cereals : final report

by L. Duczek. Regina : Saskatchewan Agriculture Development Fund, 1990. 27 p. Bibliogr.
MICROLOG 93-05072 1 fiche

The study was conducted to determine the incidence and severity of diseases of cereals grown under irrigation and to evaluate methods for control. The study monitored plant diseases through a disease survey, assessed the relative importance of diseases on test plots at the irrigation farm and in commercial fields, evaluated chemical control of diseases, evaluated cultivars for disease reaction, and conducted other trials on crop management that related to disease incidence and productivity. This report gives the results from 1986-89.

Plantation weeding with glyphosate : effects on crop growth

Truro, N.S. : Dept. of Natural Resources, Forestry Branch, Forest Research Section, 1993. 8 p. : ill. Bibliogr. (Forest research report ; no. 45)
MICROLOG 93-06581 1 fiche

Controlling competing vegetation in forest plantations increases the chances of obtaining healthier, faster growing crop trees. A study of two 11-year-old Norway Spruce plantations in Georgefield, Nova Scotia showed crop-tree volume in areas weeded with glyphosate.2 to be 13 times that of unweeded areas. To obtain estimates of crop growth for other species and locations in Nova Scotia, a survey was made of eight operational plantations containing glyphosate weeded and unweeded areas. This note gives the results.

Plants of the prairie aquatic ecosystems

by J.R. Allan and J.A. Braglin-Marsh. Ottawa : Agriculture Canada, Research Branch, 1991. ii, 31 p. : ill. Bibliogr. (Technical bulletin ; 1991-9E) (Lethbridge Research Station contribution ; no. 15) ISBN 0-662-18839-X
MICROLOG 93-02189 1 fiche

Native and introduced aquatic plants have been surveyed in southern Alberta and Saskatchewan since 1966. The generally accepted belief is that diversity in plant species increases as one moves south towards the equator. However, the wide range of aquatic environments, natural and man-made, has created favourable habitats for many submergent, floating-leaved, free-floating and emergent aquatic plants. This publication lists the taxa of the aquatic vascular plants found in Prairie ecosystems, provides a description of the common and less common species and one or more characteristics of the dominant species found in the various environments.

Pleistocene geology and ground water resources, Township of Etobicoke, York County

by A.K. Watt. Toronto : Dept. of Mines, 1968. vi, 50 p. : ill., maps. Bibliogr. (Geological report ; 59) *Fold. maps not filmed.* ISSN 0472-9889
MICROLOG 93-08616 1 fiche

This is the second in a series of reports dealing with the ground water resources of townships where special ground water problems exist. The Township of Etobicoke has an area approximately 50 square miles and is situated in the southwest corner of York County. It is bordered on the east by the Humber River, and on the west by the Etobicoke Creek and Toronto township; it extends from Lake Ontario in the south to Vaughan township in the north. Ground water data on 1,160 wells assembled in this report are intended to be of help to the great many home-owners and others in the township to whom the municipal water supplies are not available. The majority of these home-owners have to use ground water. The locations and particulars of wells listed in this report will give some idea of ground water conditions in various parts of the township.

Pleistocene stratigraphy and till geochemistry of the Miramichi zone, New Brunswick

by M. Lamothe. Ottawa : Energy, Mines and Resources Canada, Geological Survey of Canada, 1992. vii, 58 p. : ill., maps Bibliogr. (Bulletin ; 433) *Fold map not filmed.* ISBN 0-660-14649-5
MICROLOG 93-03416 1 fiche

Mineral exploration in large parts of Canada is difficult because the bedrock is hidden beneath thick layers of glacially derived sediments. One technique to overcome this, called drift prospecting, identifies high concentrations of economically significant minerals or elements in the glacial sediments and helps to identify their bedrock sources. This project was designed to interpret Quaternary geology to assist in mineral development. This report shows how the geochemistry and lithology of the glacial sediments vary across the region and how the stratigraphy and provenance of those sediments can be interpreted so that geochemical anomalies or mineralized boulders may be traced back to their bedrock sources.

Pliensbachian (Lower Jurassic) biostratigraphy and ammonite fauna of the Spatsizi area, north-central British Columbia

by R.C. Thomson and P.L. Smith. Ottawa : Energy, Mines and Resources Canada, Geological Survey of Canada, 1992. 87 p. : ill., maps. Bibliogr. (Bulletin ; 437) ISBN 0-660-14440-9
MICROLOG 93-03408 1 fiche

In the northern Spatsizi area where lateral variations in facies and structural complexity are common, the age relationships between rock units can be accurately established using ammonite faunas. The Pliensbachian ammonites described in this bulletin were collected as part of a biostratigraphic study of the Spatsizi Group and Cold Fish volcanics. The study area includes most of the Eaglenest Range in the Spatsizi Plateau Wilderness Park, an area situated on the Stikine Terrane. The ammonite fauna was collected from sedimentary and volcanic rocks distributed along the southern flank of the Stikine Arch and exposed from beneath the Bowser Lake Group in small inliers. The bulletin gives a summary of the stratigraphy and provides a systematic paleontology.

Policy statement on opening exercises and religious education in the public schools of Ontario

Ontario Public School Boards' Association. Toronto : The Association, 1988. 11 p. *ONTERIS: ON05890.*
MICROLOG 93-00613 1 fiche

The Ontario Public School Boards' Association (OPSBA) believes that knowledge about religions, through the provision of opening exercises and religious education, in a way that is comparative and stresses similarities, can teach tolerance and promote understanding. Recognizing the pluralistic nature of Ontario society and the multi-cultural nature of the public school system, OPSBA believes that any form of opening exercises or religious education must be multi-faith and multi-cultural in approach, have a clear ethical basis, but must not be confessional. OPSBA supports an opening exercise format which includes the national anthem, a multi-faith approach to reading selections and provides guidelines on developing individual school guidelines, local school board decisions; compulsory opening exercises; exemptions; and school board policies. For religious education, OPSBA provides elementary and secondary schools with guidelines on curriculum, teachers, and exemptions.

MICROLOG 93-03136 1 fiche

The Yukon and Northwest Territories have been undergoing considerable political changes in recent years. Governmental and administrative processes have been transformed, and the question of evolution towards provincial status is now frequently raised. This issue attracted particular attention in the wake of the provisions of the 1987 Meech Lake Constitutional Accord concerning the creation of new provinces. The possibility of dividing the Northwest Territories between east and west into the native homelands of Nunavut and Denendeh has also been a focus of concern. This document focuses on aboriginal claims, provincial status, and the division of the Northwest Territories.

La Politique culturelle du Québec : notre culture, notre avenir

Québec : Gouvernement du Québec, Ministère des affaires culturelles, 1992. xiv, 150 p. : ill. ISBN 2-550-26893-8
MICROLOG 93-00657 2 fiche

Ce document constitue l'énoncé de la politique que le gouvernement du Québec entend suivre, en matière de culture, au cours des prochaines années. Il s'appuie sur les témoignages entendus lors de la Commission parlementaire sur la culture à l'automne 1991, sur les travaux du Groupe-conseil sur la politique culturelle et sur les recherches et analyses produites par le ministère des Affaires culturelles et par divers autres ministères et organismes gouvernementaux. Il se penche précisément sur l'affirmation de l'identité culturelle; le soutien aux créateurs et aux arts; l'accès et la participation des citoyens à la vie culturelle; et, de nouveaux leviers pour la mise en oeuvre de la politique culturelle.

La Politique d'admissibilité au transport adapté : document de consultation

Québec : Transports Québec, 1992. x, 53 p.
MICROLOG 93-04158 1 fiche

Ce document comporte cinq chapitres. Après un bref rappel du contexte historique et de la problématique qui s'en dégage, on y expose le cadre conceptuel (définitions, principes, portée et objectifs) qui constitue la toile de fond de la politique. On traite ensuite plus spécifiquement de l'approche qui devra être respectée lors de l'analyse des demandes d'admission. Y sont également précisés les critères d'admission à considérer et les facteurs devant guider la décision quant au type d'admission et au besoin d'accompagnement. Les chapitres 4 et 5 identifient, d'une part, les rôles et responsabilités des différents intervenants dans l'application de la politique et précisent, d'autre part, les principales règles administratives encadrant les différentes étapes du cheminement de la demande: transmission, informations demandées, traitement de la demande, gestion des dossiers. Enfin, le chapitre 6 donne des précisions sur la mise en application de la politique et les dispositions transitoires prévues.

Politique relative à la vente directe de poisson à des navires étrangers dans le Canada atlantique

Ottawa : Ministère des pêches et des océans, Opérations des pêches, 1993. 5, 5 p. *Bilingue (Policy on direct sales of fish to...)*.
ISBN 0-662-59663-3
MICROLOG 93-04571 1 fiche

La vente directe englobe deux réalités, la vente directe en mer, de bateau à bateau, et la vente à quai. La vente en mer donne aux pêcheurs un autre moyen d'écouler leurs prises en les vendant directement à un navire étranger, sans qu'elles n'aient été débarquées au Canada pour y être transformées. Dans la vente à quai, un navire de pêche étranger achète du poisson d'origine canadienne qui a subi, dans une usine canadienne enregistrée, un traitement répondant à certains critères minimaux. Ce document se penche sur la politique relative à la vente directe de poisson à des navires étrangers dans le Canada atlantique. Il examine principalement les principes directeurs, les critères, les lignes directrices, ainsi que les niveaux minimaux de transformation.

La Politique sur les services de garde à l'enfance : résumé -- Rév.

Québec : Office des services de garde à l'enfance, 1990. 53 p. ISBN 2-550-21146-4
MICROLOG 93-05265 1 fiche

La Loi sur les services de garde à l'enfance vient d'avoir dix ans, tout comme l'Office des services de garde à l'enfance. Le moment était donc bien choisi pour présenter une nouvelle politique en cette matière, une politique qui bonifie le contenu de la loi et qui renforce ses objectifs en ce qui a trait à l'accessibilité des services, à la liberté de choix et à la participation des parents. Ce document décrit les orientations gouvernementales rendues publiques en novembre 1988 dans l'Enoncé de politique sur les services de garde à l'enfance et confirmées le 15 mai 1989. Dans la mesure du possible, les chiffres indiqués dans le Résumé de politique sont ceux connus au 31 mars 1990. On y présente également les modifications apportées à la Loi sur les services de garde à l'enfance, lesquelles ont été sanctionnées en juin 1989.

Polynuclear aromatic hydrocarbons : Atlantic Region data summary and review

prepared for the Research and Monitoring Sub-Committee, of the Regional Toxic Chemical Committee ; by Hugh J. O'Neill, Kathleen M. Kieley. Ottawa : Environment Canada, Conservation and Protection, Atlantic Region, 1992. xii, 64 p. : ill. Bibliogr. (Technical report series ; no. 92-01) ISSN 1192-3377 ISBN 0-662-19996-0
MICROLOG 93-07197 1 fiche

To assess regional toxic substance information, a project was initiated to compile and assess existing regional data on a substance by substance basis. Polynuclear aromatic hydrocarbons (PAHs) were selected as the first substance for review since this group of compounds is in Group I of the National Priority Substances List, a large amount of data is available, and the largest environmental clean-up in Atlantic Canada involved PAHs. Spatial and temporary analyses of environmental data were undertaken to apply as broad an ecosystem approach as possible, and data gaps were identified and recommendations proposed.

Parliament, Research Branch, 1992. 18 p. (Current issue review ; 84-3E) *French ed. (La Pornographie) : 93-00906/1. Revised 10 March, 1992.* ISBN 0-660-14601-0
MICROLOG 93-01109 1 fiche

Traditionally, society's response to sexually explicit material has been to prohibit or restrict what is beyond the community's level of tolerance. The implicit rationale of this approach is that pornography may be forbidden because it offends a common standard of taste. On the other hand, there are those who contend that there is no convincing evidence of any causal relationship between pornography and actual physical harm, and that any other effects are too attenuated or insignificant to justify the infringement of the constitutionally guaranteed freedom of expression. This review presents a survey of this debate.

Portrait de la fiscalité des corporations au Québec : statistiques, 1988

Sainte-Foy, Québec : Gouvernement du Québec, Ministère du revenu, 1992. xi, 175 p. *CSI 66127.002.* ISSN 1180-0224 ISBN 2-550-22904-5
MICROLOG 93-01276 2 fiche

Cette publication fournit des données sur la fiscalité des corporations au Québec. On y présente le sommaire des modifications apportées à la Loi sur les impôts ainsi qu'à certaines autres lois qui ont une incidence sur la production des déclarations de revenus des corporations pour la période visée par ce document; un aperçu de la fiscalité des corporations du Québec sur le plan statistique en faisant ressortir les principaux traits du profil des entreprises ayant produit une déclaration de revenus durant cette période, des données fiscales réparties par tranche de revenus, par tranche d'actifs, par région administrative, etc.; les définitions et les descriptions des données présentées dans les tableaux statistiques; et, la méthodologie d'échantillonage et les formulaires de déclaration de revenus de l'année.

Portrait social du Québec

par S. Asselin...et al. Québec : Bureau de la statistique du Québec, Statistiques sociales, 1992. 353 p. : ill. Bibliogr. *CSI 67131.248.* ISBN 2-551-15232-1
MICROLOG 93-04471 4 fiche

Cet ouvrage est le résultat d'une démarche importante d'une équipe pluridisciplinaire de la Direction des statistiques socio-démographiques qui s'est attachée à décrire huit domaines de l'activité humaine particulièrement significatifs quant aux conditions de vie des Québécois. Chacun de ces grands domaines fait l'objet d'une analyse étayée de statistiques et d'indicateurs sociaux ventilés selon plusieurs variables socio-économiques. Les comparaisons dans le temps et avec d'autres sociétés occidentales permettent de dégager les tendances de leur évolution et d'apporter certaines nuances. Les principaux domaines étudiés sont les suivants: portrait démographique de la population du Québec; la santé; l'éducation; l'accès à l'emploi et les conditions d'emploi; la capacité acquisitive de biens et de services; l'emploi du temps; la sécurité des personnes; et, le milieu de vie.

Portrait statistique de l'effectif régulier de la fonction publique du Québec, 1990

Québec : Gouvernement du Québec, Office des ressources humaines, 1990. xii, 222 p. *CSI 67216.002.* ISBN 2-550-21453-6
MICROLOG 93-04613 3 fiche

L'Office des ressources humaines présente, pour une troisième année, la publication annuelle intitulée Portrait statistique de l'effectif régulier de la fonction publique du Québec, portant sur l'année 1990. La publication vise à regrouper en un seul document l'information sur l'effectif régulier de la fonction publique du Québec afin d'en faciliter la consultation et d'ainsi mieux répondre aux nombreuses demandes de renseignements. La première partie porte sur la répartition de l'ensemble de l'effectif régulier, la deuxième porte sur la répartition de l'ensemble de l'effectif régulier selon la classification des emplois, et la troisième partie présente la répartition de l'ensemble de l'effectif régulier par ministères et organismes et par catégories d'emploi, selon les régions administratives, le sexe, et les groupes cibles.

Positive and negative aspects of women's experience in non-traditional occupations

Quebec : Gouvernement du Québec, Ministère de l'éducation, 1990. i, 131 p. Bibliogr. *Highlights (iv, 41 p.) laid in. CSI 66109.207.*
ISBN 2-550-14985-8
MICROLOG 93-01272 2 fiche

This document discusses the rational for a study on women working in non-traditional jobs. It gives a profile of the survey respondents. It describes the occupational situation of the respondents. It discusses the salaries of non-traditional jobs, myths about non-traditional occupations, sexism and non-traditional occupations, the level of satisfaction for women in non-traditional occupations, the reasons why the women chose these careers, the training the women received, and the level of equal treatment in the training. It examines variations in experience in relation to level of education, occupation, and to the rate of female participation in occupation and training programs. Finally, it looks at possible and necessary changes.

Positive compliance programs : their potential as instruments for regulatory reform

Ellen Baar ; with the assistance of Theodora Carroll Foster and Barbara Erskine. Ottawa : Dept. of Justice, Research and Development Directorate ; Corporate Policy and Programs Sector, 1991. xvii, 276 p. Bibliogr. (Working document ; WD1991-12e) *French ed. (Les Programmes d'observation...) : 93-01909/4.*
MICROLOG 93-01908 4 fiche

This report maps out strategies for regulatory reform through the alternative of positive compliance programs. It provides Canadian regulators with a theoretical framework, and some practical tools, for constructing a more effective system for regulating hazardous activities in an increasingly fragile political, economic, and ecologically aware environment. It provides an in-depth study of the nature and goals of regulation and positive compliance, including discussions of the theory of control and its balance, the role played by regulators under various programs, approaches taken in different regulatory sectors, and the contingencies affecting the design of regulatory strategies.

Positive void reactivity : an assessment of its treatment in safety analysis

by D.J. Diamond. Ottawa : Atomic Energy Control Board, 1992. vii, 36 p. Bibliogr. (Research report ; INFO-0423)
MICROLOG 93-03238 1 fiche

This report is a review of important aspects of the analysis of large loss-of-coolant accidents (LOCAs), one of which is the calculation of positive void reactivity. To study this subject, the lattice physics codes used for void worth calculations and the coupled neutronic and thermal-hydraulic codes used for transient analysis are reviewed, along with the measurements used to help validate the codes. The application of these codes to large LOCAs is focused on the uncertainty factor for the void worth, used to bias the results and the acceptance criteria applied, including the criterion for peak fuel enthalpy, in which fuel behaviour measurements and calculations are reviewed, and the question of whether prompt-criticality should also be a criterion.

Possible impacts of climatic warming scenarios on water resources in the Saskatchewan River subbasin

by S.J. Cohen, L.E. Welsh and P.Y.T. Louie. Saskatoon, Sask. : National Hydrology Research Centre, Atmospheric Environment Service, Canadian Climate Centre, 1989. vi, 85 p. : ill., maps. Bibliogr. (Report ; no. 89-9)
MICROLOG 93-00223 1 fiche

Regional scale studies of the impacts of global warming scenarios provide a useful mechanism for identifying potential regional sensitivities, data gaps and research needs, and for rising awareness of the global warming issue at the regional level. A pilot study of water resources in the Saskatchewan River subbasin was undertaken in order to test a Thornthwaite-based methodology, to provide first-cut estimates of impacts in this region, and to identify future research needs. The scenarios were constructed using two hypothetical growth rates for irrigation and output from five general circulation models. During the course of this study, a number of methodological questions were raised, including the representativeness of data points, interpolation of observed and scenarios data, and the quantification of uncertainty.

Post-logging regeneration of reindeer lichens *Cladina* spp. as related to woodland caribou winter habitat

by A. Harris. Thunder Bay, Ont. : Ministry of Natural Resources, Northwest Region Science and Technology, 1992. iv, 33 p. : ill. Bibliogr. (Technical report ; no. 69)
MICROLOG 93-06335 1 fiche

Ontario's timber management guidelines for the provision of woodland caribou habitat are based upon the assumption that logging will replace fire as the means of regenerating winter habitat (lichen-rich forests). This study was designed to provide information on the re-establishment of reindeer lichens in northwestern Ontario cutovers. Lichen sampling was conducted at 51 sites including mature stands, cutovers, and burns that had been potential winter caribou habitat before disturbance. Included is a literature review that compares the effects of fire and logging on lichen regeneration.

Post-project analysis : a case study of the Jolu Gold Mine, northern Saskatchewan

by A.F. Bres. Hull, Que. : Canadian Environmental Assessment Research Council, 1992. 74 p. : ill. Bibliogr. (Manuscript report ; MR1-92)
MICROLOG 93-05385 1 fiche

Post-project analysis provides a means of improving environmental impact assessment (EIA) by learning from the experiences gained from past projects. This paper presents the results of a post-project analysis of the Jolu gold mine in Northern Saskatchewan. An EIA for the mining operation was conducted in 1988 and the mine and mill were in operation from 1988-91. The report first describes the formal Saskatchewan Environmental Assessment and Review Process and then compares it to the process applied during the Jolu EIA. Then the Jolu environmental impact statement is critiqued, concentrating on the technical and scientific soundness of the environmental impact statement, its clarity, and its focus on important issues. An evaluation is then conducted on the accuracy of the predictions of environmental impacts made during the initial assessment.

Post-project analysis of visual impact assessment : implications for visual resource management

by S. Dakin. Hull, Que. : Canadian Environmental Assessment Research Council, 1992. iv, 35 p. : ill. Bibliogr. (Manuscript report ; MR4-92)
MICROLOG 93-05383 1 fiche

In development projects where visual concerns are identified, visual impact assessment (VIA) is an important and necessary part of environmental impact assessment (EIA). This study involved post-project analysis of three projects for which EIA, including a visual impact component, was carried out. For each case, written documentation, photographs, and computer-generated simulations were reviewed, and interviews with key people and site visits were conducted to collect relevant information. Using this information, each case was analyzed according to four criteria relating to the VIA methods and procedures used, the accuracy of visual predictions made, the effectiveness of visual mitigation measures implemented, and the clarity and completeness of project documentation.

Poste Lavaltrie 120-25kV : a new Hydro-Quebec substation built with medium voltage metal clad switchgear

Montreal : Canadian Electrical Association, Engineering and Operating Division, Distribution Section, Protection Control and Substation Committee, 1991. 21 p. : ill. Bibliogr. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06036 1 fiche

A new trend in Hydro-Quebec medium voltage substations, metal-clad switchgear, is described. This technology allows the design of smaller substations than conventional switchgear technology. The first new substation built with this technology required extensive consultation. Non-standard and special aspects concerning the substation design and switchgear construction are highlighted. Substation design, operation, construction, main and transfer bus arrangement, ease of maintenance, grounding and testing are discussed.

The Potential for engineered wood products in Alberta's residential construction

by J.J.R. Cheng. Edmonton : Alberta Municipal Affairs, Innovative Housing Grants Program, 1991. v, 94 p. : ill. Bibliogr. ISBN 0-88654-329-0
MICROLOG 93-00982 2 fiche

This project identified reinforced or modified wood technologies that have application in residential construction and can be commercially exploited by Alberta's manufacturers using Alberta's raw materials. A preliminary literature and patent search was conducted to identify the available technologies and the experts or research organizations actively working in this area. This was followed by a comprehensive consultation with external contacts and field investigations. A preliminary selection of potential engineered wood technologies was made, then selection of five potential technologies was made by active practitioners in the research, manufacturing and construction industries. Top-rank technologies were chosen based on performance of the product, current technical status of the technology, availability of the product in Alberta, economies of the product and potential for export of the technology.

The Potential for producing capelin roe in Newfoundland and Labrador for sale in world markets

Newlantic Group. St. John's : Dept. of Fisheries and Oceans, Fisheries Development Division, 1989. 64 p. : ill.
MICROLOG 93-00544 1 fiche

Capelin is usually harvested through an inshore fishing effort during the spawning season to supply the Japanese market for frozen whole female roe-in capelin. There is also a Japanese market for capelin roe that has been served by Norway and Iceland. However, the supply from these countries has become erratic, presenting Newfoundland with an opportunity. This study reviewed world markets for extracted capelin roe and determined specifications for products intended to serve those markets; identified the resource potential for extracted roe production, identified procedures and equipment for roe extraction and processing, along with associated costs, and recommended appropriate strategies for development of an industry based on extraction of capelin roe.

Potential gains from using emissions trading to manage emissions of NOx and other ozone precursors

by A.L. Nichols. Montreal : Canadian Electrical Association, 1992. 6 p. Bibliogr. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06231 1 fiche

Environment Canada commissioned a study to assess the feasibility of using emission trading to meet the ground-level ozone objectives, with particular focus on potential applicability to nitrogen oxide sources located in southern Ontario, which experiences the most frequent and severe exceedences of Canada's one hour ozone objective of 82 parts per billion. The emission trading plan integrated trading into the basic regulatory scheme from the start, avoiding problems that have plagued prior emissions trading programs. The plan would cover all large, stationary sources of nitrogen oxides in the area. Cost savings and environmental effects of the proposed plan to allow nitrogen oxide trading among Ontario Hydro's power plants are discussed and the results of the Environment Canada feasibility study are presented.

Potential Western Hemisphere Shorebird Reserve Network sites for migrant shorebirds in Canada

by R.I.G. Morrison...et al. Hull, Que. : Canadian Wildlife Service, Headquarters, 1991. 98 p. : maps. Bibliogr. (Technical report series ; no. 144) ISSN 0831-6481 ISBN 0-662-19334-X
MICROLOG 93-00174 2 fiche

The Western Hemisphere Shorebird Reserve Network is an international conservation initiative designed to protect the key habitats and resources used by shorebirds throughout their migration ranges. Many species of shorebirds depend on a chain of critically important sites to complete their annual migrations, and for conservation to be successful, all the links in the chain need to be preserved. This report is intended as a first inventory of potential sites in non-Arctic areas of Canada. It summarizes information currently available on locations meeting criteria for inclusion in the network and discusses the methods used to establish those criteria.

Potentially exploitable deepwater resources off Atlantic Canada

by G. Pohle, T.J. Kenchington and R.G. Halliday. Dartmouth, N.S. : Dept. of Fisheries and Oceans, Bedford Institute of Oceanography, Biological Sciences Branch, Marine Fish Division, 1992. v, 79 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1843) ISSN 0706-6457
MICROLOG 93-01481 1 fiche

There has been little development of deepwater fisheries off Atlantic Canada by the domestic fishing industry and not much is known about the continental slope and adjacent oceanic fauna that might support such fisheries. This report reviews the development of deepwater fisheries elsewhere in the world to determine the species involved and whether they, or analogues to them, occur in Canadian waters. The report also summarizes what is known about their distribution and abundance in Canadian waters and a list of candidates deserving of research and development efforts to establish whether they could support viable new fisheries is drawn up.

Power line carrier transmission in the presence of cable inserts and other discontinuities

by L.M. Wedepohl. Montreal : Canadian Electrical Association, Engineering and Operating Division, Telecontrol and Telecommunications Section, Cable and Networks Subsection, 1992. 11 p. : ill. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06224 1 fiche

Power line carrier has been in use since the 1920s as a communications link in power systems. With the increasing cost of way-leaves, it is becoming common to have significant lengths of high voltage cable at the ends, and sometimes in the middle, of overhead power lines. This can cause large insertion losses in power line carrier channels at certain frequencies. Other discontinuities such as trapped feeders, line-traps and items of plant such as transformers and generators can also cause losses. The most important parameters which cause these losses are derived and appropriate ways to ameliorate their effects are indicated. The underlying philosophy of broad-band trap design, which is known but not well documented, is presented.

The Power of positive linking : how families can empower people who have a mental handicap through mutual support groups

Downsview, Ont. : G. Allan Roeher Institute, 1989. 56 p. : ill. Bibliogr. *French ed. (L'Efficacité des liens constructifs...) : 93-02425/1.* ISBN 0-920121-48-9
MICROLOG 93-02426 1 fiche (Available on fiche only)

This study is about the experience and practice of five informal, mutual support groups in Canada. It tracks the development of such groups in their attempts to build personal relationships of trust and commitment, to develop individual strengths and initiative. It looks at how the groups form, what makes them stay together, and the process they go through in pursuit of change. It describes the specific goals the groups seek including securing and delivering services; finding a means through which to lobby government for change; creating a climate of friendship and support that helps to secure personal development and growth; and providing emotional support that encourages self-esteem and a sense of dignity.

The Power to choose : an examination of service brokerage and individualized funding as implemented by the Community Living Society

North York, Ont. : G. Allan Roeher Institute, 1991. v, 184 p. Bibliogr. *French ed (Pouvoir choisir : un examen...) : 93-02384/3.* ISBN 0-920121-88-8
MICROLOG 93-02382 3 fiche (Available on fiche only)

This document describes the framework for evaluating the effectiveness of service brokerage and individualized funding and identifies the five criteria for decision-making opportunity used in the study. It examines the impact that service brokerage and individualized funding have had in terms of each of these criteria. Specifically, it examines access to planning resources; access to funding according to individual need; accountability to individuals in decision-making; the range of alternatives for community-based services; and securing recognition of and status for individuals' close family and friends in the decision-making process. It also assesses the applicability of service brokerage and individualized funding to other groups including individuals with a physical disability, individuals with a psychiatric disability, and individuals who are elderly.

Precambrian geology : Seagram Lake area

by D.U. Kresz and B. Zayachivsky. Toronto : Ministry of Northern Development and Mines, Mines and Minerals Division, Ontario Geological Survey, 1993. xi, 93 p. : ill., maps. Bibliogr. (Ontario Geological Survey report ; 287) *Fold. maps not filmed.* ISSN 0704-2582 ISBN 0-7778-0043-8
MICROLOG 93-04907 1 fiche

The map area is located east of Long Lake and comprises Daley Township and the eastern part of Ginoogaming First Nation Indian Reserve, formerly Long Lake Indian Reserve 77. Field work was carried out in summer 1988 and consisted of mapping the Precambrian bedrock and its mineral deposits. Rock samples were collected in the field, with 50 samples submitted for gold and silver assays, 40 for whole-rock geochemistry, and 88 for thin sectioning. This report describes the general geology, rock geochemistry, structural geology, metamorphism and alteration, geochronology, and economic geology of the area, including descriptions of existing properties, and the possibilities for gold, silver, base metals, iron, corundum, stone, and sand and gravel.

Precambrian geology : Vista Lake area

by P.M. Smith. Toronto : Ministry of Northern Development and Mines, Mines and Minerals Division, Ontario Geological Survey, 1993. x, 84 p. : ill., maps. Bibliogr. (Ontario Geological Survey report ; 282) *Fold. maps not filmed*
ISSN 0704-2582 ISBN 0-7729-8992-3
MICROLOG 93-04906 1 fiche

The Vista Lake area is approximately 300 sq km, with its centre about 75 km south-southwest of Dryden and 55 km north-northeast of Fort Frances. Mapping was conducted from May-August 1988. Many of the concepts, faults, and lineaments were interpreted fusing geophysical data in addition to field data. Five-five unaltered samples of major volcanic rock types were selected for whole rock, trace element, and rare earth element geochemical analysis. Eight mineralized and later specimens collected were analyzed for selected trace elements. This report describes the general and economic geology of the area, including a description of gold properties.

Indin Lake map area straddles the boundary between the Slave Structural Province on the southeast and the south-central zones of the Wopmay Orogen on the northwest. This report and map is a compilation of work up to 1974 but takes into account more recent studies in the Bear Structural Province, now referred to as the Wopmay Orogen, to the northwest of the map area. The report gives a general description of the area, general and detailed geology, a history of exploration, and detailed descriptions of mineral deposits.

Predicting forest responses to atmospheric sulphate and nitrate loadings

by A.L. Torrenueva, P.A. Arp and A.E. Kingsley. Montreal : Canadian Electrical Association, Engineering and Operating Division, Thermal and Nuclear Power Section, Environmental Requirement Subsection, 1993. 11 p. Bibliogr. *Presented at Electricity '93 : distribution power quality.*
MICROLOG 93-05201 1 fiche

An acid sulphate/nitrate loading model named FORSVA for upland forest soils was developed to predict the amount of soil ion losses and effects on forest biomass given certain atmospheric inputs of sulphates and nitrates. The results can be applied in the environmental assessment of thermal generation projects as well as the assessment of impacts of various thermal power generation scenarios. A case study using an Ontario Hydro project is discussed.

Predicting the vapour pressures of gasoline samples

prepared for Gasoline and Oil Testing Laboratory, Alberta Research Council, Canadian Petroleum Products Institute, Energy, Mines and Resources Canada ; by Ding-Yu Peng. Ottawa : The Institute, 1992. 81 p. : ill. *CANMET contract: 23440-1-917101-SQ.*
MICROLOG 93-04265 1 fiche

Evaluation of the vapour pressure data for 66 different gasoline samples collected from various refineries throughout Canada. This report assesses the suitability of the instrument used to determine the vapour pressures and gives an evaluation of the reliability of the vapour pressure data obtained for the selected gasoline samples. The absolute vapour pressures of n-heptane and methanol were determined by means of a CCA-VP vapour pressure tester manufactured by Grabner Instruments. To assess the suitability of the vapour pressure tester for determining the vapour pressures of pure substances, the experimental data was compared with values calculated from vapour pressure equations.

Prediction of aggregate performance in concrete structures exposed to freezing and thawing

by Z. Rusin. Toronto : Ontario Hydro, Research Division, 1992. iv, 129 p. : ill. Bibliogr. (Report ; no. 91-234-K)
MICROLOG 93-02894 2 fiche

A study was undertaken to develop a rapid technique for the prediction of aggregate performance in concrete structures exposed to freezing and thawing, especially under saturated conditions. Seventeen types of coarse crushed aggregates were examined in the laboratory by a new test technique called RAO-Method and also by mercury intrusion porosimetry. RAO, in Polish, stands for Roznicowa Analiza Odksztalcer, which means differential analysis of strains. The aggregates were previously used in concrete blocks that were placed in water-filled tubs and subjected to outdoor exposure conditions for many years. The results of long-term observations of the concrete blocks, as well as those of the RAO, mercury intrusion porosimetry, and other laboratory standard tests, were compared.

Prédiction quotidienne des incendies de forêts causés par la foudre

par P.H. Kourtz et B. Todd. Chalk River, Ont. : Forêts Canada, Institut forestier national de Petawawa, 1993. v, 19 p. : ill. Bibliogr. (Rapport d'information ; PI-X-112F) *L'éd. anglaise (Predicting the daily occurrence of lightning ..) : 93-06390/1.* ISSN 0228-0736
ISBN 0-662-98344-0
MICROLOG 93-08723 1 fiche

La foudre cause le tiers des 9 000 incendies de forêt qui se déclarent au Canada. Chaque année, les incendies de cette origine consument 90 % de la superficie totale brûlée par les incendies et ils coûtent aux Canadiens au moins 150 millions de dollars en biens détruits et en opérations d'extinction. Contrairement aux incendies causés par la négligence humaine, les incendies allumés par la foudre surviennent souvent en nombre élevé dans des localités éloignées. Cette publication décrit la méthode dont on se sert pour prédire le nombre et l'emplacement quotidiens des incendies causés par la foudre. Les résultats des évaluations sont présentés et expliqués.

MICROLOG 93-08721 1 fiche

Au Canada, deux incendies de forêt sur trois sont causés par négligence. Afin de les éteindre lorsqu'ils sont encore petits, un service moderne de lutte doit être en mesure de prédire le nombre et le lieu de ces incendies un jour à l'avance. Contrairement à ce que l'on pense, l'expérience montre qu'ils se déclarent dans des conditions météorologiques précises, quand le combustible forestier s'y prête, et qu'ils sont prédictibles. Ce document se penche sur la question de prédiction quotidienne des incendies de forêts causés par négligence. On y examine la difficulté de les prédire; le Programme québécois de prédiction; l'intégration de chiffres récents; la prédiction quotidienne des incendies; et, l'évaluation des prédictions.

Preliminary assessment of the impact of fluctuating water levels on northern pike in Reindeer Lake

by M. Chen. Regina : Saskatchewan Environment and Resource Management, Fisheries Branch, 1993. iii, 15 p. : ill. (Fisheries management report ; 93-2)
MICROLOG 93-07615 1 fiche

Reindeer Lake is located in northeastern Saskatchewan and extends partly into Manitoba. Water level of the lake has been regulated since 1942 by the Whitesand Dam on the Reindeer River, the sole outflow river of the lake, to enhance water flows on the Churchill River at the Island Falls Hydroelectric Station. Since the beginning of the Whitesand Dam, there have been many concerns and issues related to the altered water levels in the lake and stream-flow levels in the Churchill River, as well as other fisheries issues, the most recent of which led to a request by the Saskatchewan Outfitters Association in 1993 for a full biological study. This report briefly addresses the extent of water level fluctuations during the pike spawning period in Reindeer Lake and its effect on spawning success as a preliminary to a decision on a biological study.

A Preliminary biophysical assessment of Atikaki Provincial Park, Manitoba

by Daniel F. Brunton ; for Parks Branch, Manitoba Dept. of Natural Resources. Ottawa : Daniel Brunton Consulting Services, 1987. v, 74 p. : ill., maps. Bibliogr.
MICROLOG 93-04834 1 fiche

This study was undertaken in fall 1986 to assess the potential for significant life science features and processes in Atikaki Provincial Park and to provide guidance for park planners. The study was conducted to guide the setting of goals and objectives for initial planning, to develop background biophysical data on the study area, to identify data gaps and deficiencies, and to assist in the resolution of immediate management concerns. Discussions were held with Manitoba Natural Resources and at the Manitoba Museum of Man and Nature in Winnipeg, as well as with resource specialists elsewhere. A review of the computer-generated vegetation map of the area was conducted, as was literature on earth science resources. The 1985 provincial parks systems plan was reviewed to place planning options into a provincial context and the fire history of the park was recorded from Manitoba Natural Resources fire books. A brief reconnaissance of the park was undertaken by helicopter in October 1985 to verify off-site information and to develop information on vegetation composition and significant species.

Preliminary economic geology of volcanic rocks in the Annidale and Shannon areas

by G.G. Lutes. Fredericton : Dept. of Natural Resources and Energy, Mineral Resources, 1993. ii, 16 p. : ill., maps. Bibliogr. (Open file report ; 93-2) *Fold. maps not filmed.*
ISSN 1183-5508 ISBN 1-55137-097-2
MICROLOG 93-07414 1 fiche

Little exploration work has been recorded in areas underlain by felsic volcanic rocks within the Annidale Belt and detailed mapping has not been undertaken to establish intraformational stratigraphic and structural relationships. Mapping at a scale of 1:10 000 was undertaken near Annidale and Shannon to distinguish, subdivide, and interpret the geological setting of the known rhyolitic volcanic rocks in these areas. Prospecting was also undertaken to obtain direct evidence of potential buried volcanogenic massive sulphide mineralization spatially associated with these known centres of felsic volcanism. A regional program of stream-sediment sampling was conducted over the Annidale Belt in concert with the focused mapping-prospecting.

Preliminary field trials to detect microseismic activity in Lingan Colliery Sydney Coalfield, Cape Breton, Nova Scotia (PERD)

Golder Associates. Mississauga, Ont. : The Corporation, 1992. v, 173 p. : ill. *CANMET contract: 23440-1-9096-01-SQ*
MICROLOG 93-01568 2 fiche

Preliminary field trials were carried out to detect microseismic activity around roadway driveage operations at the Cape Breton Development Corp.'s Lingan Colliery in the Sydney Coalfield. The driveages of Lingan Colliery were approaching similar depths to the No 26 Colliery that had experienced several violent sandstone/gas outbursts during blasting when mining had approached within 2.7 m of a sandstone erosion channel at 700-800m. This project investigated the possibility that sandstone/gas bursts could occur (in the absence of blasting) through a mechanism resulting from microseismic activity and/or acoustic emission. A Roctest Geo-Monitor portable geophone and monitor was used to establish whether dynamic rock failure takes place in the rock at the Lingan faces during the advance of the faces by roadheader. A BMX blast monitor was used to record the characteristic ground motion during and after several blasts, including brushing blasts and updip development blasting, to detect any microseismic activity that may have been triggered as a result of the blasting.

Preliminary local magnitude scales for mining-induced seismicity at some mines in the Sudbury Basin

by M. Plouffe. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1992. iv, 49 p. : ill. Bibliogr. (Report ; MRL 92-109(TR))
MICROLOG 93-03422 1 fiche

In Canada, magnitudes of mining-induced seismic events are determined from amplitudes measured on S-phases recorded by the National Seismograph Network (NSN). The lower decision threshold for these seismographs for seismic events originating from the Sudbury Basin is about magnitude 1.6-1.8 and the determination of these thresholds has become possible through the development of the Sudbury Local Telemetered Network. No magnitude values can be determined for small seismic events originating from Sudbury from the NSN stations. To overcome the problem, local magnitude scales were developed, using the data recorded by the Sudbury network, to determine the magnitude of the smaller events. Three seismically active mines in the Sudbury Basin were chosen as prospects to develop these types of magnitude scales.

A Preliminary mine stability assessment at Dumagami Mine, Quebec

by Y.S. Yu...et al. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1992. vi, 61 p. : ill. Bibliogr. (Report ; MRL 92-003(TR))
MICROLOG 93-00504 1 fiche

This report is a preliminary mine stability assessment of the Dumagami Mines Ltd., Quebec, using three-dimensional finite element analysis techniques. The study evaluated the overall stability of the mine based on long-range planning from 1991-2000. The impact of mining activities in the adjacent mining property was only partially taken into account due to lack of detailed information. The overall structural stability based on Drucker-Prager yield criterion and Hoek & Brown's empirical failure criterion was also examined. The research project contributed to the development of a geomechanical database on the physical and mechanical properties of mine rocks; assessed the regional and local stability of the mine structure by means of numerical simulation, based on the determined rock properties and the in-situ stress measurement; and provided essential design guidelines for making long range mine planning and ground control decisions.

A Preliminary report on geological, geochemical, fluid inclusion and isotopic studies of the Gays River Zn-Pb deposit, Nova Scotia

by D.J. Kontak. Halifax : Dept. of Natural Resources, 1992. v, 223 p. : ill., maps. Bibliogr. (Open file report ; OFR 92-014)
MICROLOG 93-00816 3 fiche

The Gays River zinc-lead deposit is located in southern Nova Scotia about 65 km northeast of Halifax and 10 km east of the town of Shubenacadie. This investigation re-examined the Gays River deposit because of renewed interest in this locality specifically and to extend the results to the basal Windsor Group stratigraphy of Nova Scotia on a broader scale. The project examined previous drill hole data and construction of composite cross-sections to determine geometrical relationships between various stratigraphic units and mineralization and the elemental zonation of lead and zinc. Studies conducted included a detailed petrographic study of the host rock and ore material; a detailed study of fluid inclusions to determine the physical and chemical characteristics of the fluids involved in the mineralizing process; a geochemical study of the ore and host rock to evaluate the primary geochemical signature of the ore and to commence compilation of a data base for comparative purposes; a chemical study of syn- and post-ore calcite to assess the nature of the fluids involved at the deposit site; and an sulphur isotopic study of the massive ore zone to compare to the lower-grade disseminated ore and a carbon, oxygen and strontium isotope study of the carbonates within the host rock and ore.

A Preliminary report on magnitude scaling of mining induced seismicity at Kirkland Lake

by M. Plouffe. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1992. iii, 12 p. : ill. Bibliogr. (Report ; MRL 92-113(TR))
MICROLOG 93-04255 1 fiche

In Canada, magnitudes of mining induced seismic events are determined from amplitudes measured on S-phases recorded by the National Seismographic Network (NSN). To record smaller mining induced seismic events, a regional seismograph station was installed at Kirkland Lake. The availability of records from this regional station allowed the development of a magnitude scale for the local mines to determine the magnitude values for seismic events previously undetected by the NSN. The mining induced seismic events from Lac Minerals Ltd.'s Macassa Mine from June 1990 to the present were chosen to develop this magnitude scale.

Preliminary report on the geology of the Jackfish-Middleton area

by J.W.R. Walker. Toronto : Dept. of Mines, 1956. ii, 6 p. : map. Bibliogr. (Geological circular ; no. 4) *Fold. map not filmed.*
MICROLOG 93-07519 1 fiche

During the 1953 field season, reconnaissance mapping was conducted along the north shore of Lake Superior on a strip about six miles wide bounded by the Little Pic River on the east and Jackfish Lake on the west. In the summer of 1954, the work was extended northward to meet the area covered by the Schreiber and Big Duck-Aguasabon maps. The areas in the immediate vicinity of Foxtrap, Prairie, and Glory Lakes were only investigated by aeroplane reconnaissance and cursory shore-line work. A very brief reconnaissance was also made along the Ontario Paper Co.'s road that leads from Neys station on the Canadian Pacific railway to Killala Lake. This report describes the topography and access of the area; general and structural geology; and economic geology, including the chief occurrences of gold, copper, lead-zinc-silver, molybdenum, iron, pyrite, and radioactivity.

The Preliminary report on the second six months of process effluent monitoring in the MISA pulp and paper sector, July 1, 1990 to December 31, 1990

Ontario. Water Resources Branch. Toronto : The Branch, 1991. i, 159 p. : ill. ISBN 0-7729-8765-3
MICROLOG 93-04018 2 fiche

The Municipal-Industrial Strategy for Abatement (MISA) program is a regulatory program with the ultimate goal of virtual elimination of persistent toxic contaminants from all discharges to Ontario waterways. The MISA effluent regulations were promulgated for nine industrial sectors and require direct dischargers to monitor the types, concentrations, and total amounts of toxic substances present in their effluent. This report is a preliminary report on the second six months of process effluent monitoring data for the 27 pulp and paper mills. Monitoring was conducted for effluent from process systems, cooling water, backwash, stormwater, waste disposal site, emergency overflow, and quality assurance/quality control.

Preliminary results of physical model tests of ice scour

by M.J. Paulin...et al. St. John's : Memorial University of Newfoundland, Centre for Cold Ocean Resources Engineering, 1991. 20 p. : ill. Bibliogr. (C-CORE publication ; no. 91-29) *Presented at the International Conference on Port and Ocean Engineering under Arctic Conditions.*
MICROLOG 93-06003 1 fiche (Available on fiche only)

Two physical model studies were undertaken to investigate the process of ice scour of the seabed. The first involved eight model tests conducted within a laboratory scour tank at one gravity. The modelling was carried out in both dry and partially saturated, submerged sand. Sand conditions, model iceberg dimensions, and scour cut depth were varied in the tests. The second study involved two model tests performed on a geotechnical centrifuge, each at an acceleration level of 100 gravities. Model scours were created in saturated, submerged clay samples of two different soil stress histories. In both studies, data were obtained on the effects of scouring, including surface and subscour soil deformation, stress changes within the soil, and model iceberg loading. Experimental procedures and preliminary test results are presented.

A Preliminary review of Buttle Lake water quality

by M.J.R. Clark. Victoria : Ministry of Environment, 1980. vi, 151 p. : ill. Bibliogr. (Report)
MICROLOG 93-04143 2 fiche

In 1966, Western Mines began operating the concentrator at their copper-lead-zinc mine After May 1967, tailings from the concentrator were discharged by submerged outfall to the south end of Buttle Lake. Monitoring programs were begun to ascertain the impact of the discharge to the lake. Initial reports showed no detrimental effects, but five years later, an increasing trend for zinc was seen. As a result, a statistical analysis of the water quality of the lake was made, including a random pairs comparison of sites and surface vs depth, student's t tests for change over time, a check against water quality criteria, and an analysis of tailings and lake-bottom sediment.

Preliminary studies to determine the effects of pressure on zebra mussel mortality

by R. Koopmans. Toronto : Ontario Hydro, Research Division, 1992. iii, 29 p. : ill. (Report ; no. 91-118-K)
MICROLOG 93-03019 1 fiche

A study to determine the effects of positive and negative pressure on the survival rate of zebra mussels was undertaken as part of a research program to prevent the attachment of zebra mussels to the inside of water intake facilities and piping networks. These preliminary experiments were carried out to explore the observation that few mussels were observed in the pressurized station fire fighting systems. This report discusses the parameters, equipment, techniques, results and recommendations of a program aimed at determining the effects of vacuum, low pressure and high pressure on the mortality of juvenile zebra mussels.

Preliminary study for the establishment of a railway management training institute

prepared for Transportation Development Centre, Policy and Coordination Group, Transport Canada ; by Canac International Inc. Montreal : The Corporation, 1991. vii, 67, vii, 67 p. : ill. *Bilingual (Etude préliminaire pour la mise en place..)*
MICROLOG 93-03578 2 fiche

This report provides a preliminary investigation of the need for a Canadian-based railway management training institute, together with the options for the mandate, organization and structure of the institute and the costs involved. The proposed institute would offer high level railway management courses to the senior management of railways in developed and developing countries. The study involved a review of the management training issues at Canadian railways as well as at a select number of railways in developed countries. A questionnaire was prepared and submitted to officials involved in railway projects at the World Bank, the Canadian International Development Agency, the Asian Development Bank and other interested organizations. The input of Canadian universities was also sought.

Prescribed fire for forest vegetation management

compiled by Sybille Haeussler. S.l. : Canada-British Columbia Forest Resource Development Agreement, 1991. 19 p. : ill. Bibliogr. (FRDA memo ; no. 198) *In* Synopsis : topic summary for the operational forester : *August 1991*
MICROLOG 93-01295 1 fiche

Prescribed burning is one of the most effective and efficient tools available to the silviculturist for manipulating the growth of vegetation on logged areas, although it does have the potential to create adverse environmental impacts and great public concern. This summary focuses on prescribed burning of logging slash on newly clearcut logged areas, although information on less common burning practices is also included. The document gives the objectives of the practice and plant response to burning; and provides methods for predicting post-fire succession, developing prescribed fire prescriptions for vegetation management, using prescribed burning to convert or rehabilitate backlog vegetation types and managing vegetation to protect or enhance non-timber values. Decision aids for planning, executing and monitoring prescribed burns are also included.

Present and future use of energy in the cement and concrete industries in Canada

Holderbank Consulting Ltd. Ottawa : Canada Centre for Mineral and Energy Technology, Efficiency and Alternative Energy Technology Branch, 1993. xxviii, 152 p. : ill. Bibliogr. *CANMET contract: 23440-1-0464.* ISBN 0-662-20562-6
MICROLOG 93-06869 2 fiche

A report on the present and future use of energy in the cement and concrete industries in Canada is presented in four parts. Part 1 considers certain aspects of energy consumption, as presently prevailing in these industries. Part 2 is a projection of the level of energy consumption and environmental effects by the year 2000, as determined by technological and market developments. Part 3 is a similar projection of the level of energy consumption and environmental effects for the year 2010. Finally, part 4 deals with incentives for promoting the energy efficiency in these industries.

Prices monitoring survey, December 1991

Winnipeg : Manitoba Bureau of Statistics, 1992. 19 p. : ill. *CSI 42108.012.*
MICROLOG 93-03645 1 fiche

Each year, the Manitoba Bureau of Statistics conducts a survey to collect, tabulate and disseminate current information on the cost of food items in the form of average commodity prices as well as comparisons to Winnipeg. This document includes 4 tables: Table 1 presents the spatial indices for the 16 Manitoba communities in the December 1991 survey. The indices are based on a matched brand sample, and weighted with the present Consumer Price Index food weights for Winnipeg. Each of the communities is compared to base Winnipeg; Table 2 presents the average prices of a subset of the food basket for Winnipeg and the other 16 communities surveyed on a matched brand basis; Table 3 presents the spatial indices for the 16 Manitoba communities surveyed in 1990; and Table 4 presents the average prices of a subset of the food basket for these communities and Winnipeg, in December 1991.

Prince Albert National Park 1991 visitor survey

prepared for Socio-Economic Services Unit, Prairie and Northern Region Office, Canadian Parks Service ; by Karen M. Fox...et al. Winnipeg : University of Manitoba, 1992. v, 157 p. : ill. *Executive summary (17 p.) laid in.*
MICROLOG 93-07613 2 fiche

Prince Albert National Park, created in 1927, is located about 88 km north of Prince Albert, Saskatchewan. In 1991/92, the park is scheduled for a number of important internal reviews, including a review of the management plan and marketing strategy, an evaluation of capital projects for visitor information and service requirements, and the development of a service plan. This study was conducted to provide the Canadian Parks Service management with a valid and reliable measure of the quality of the park's operation from its actual and potential visitors' point of view. The study addressed the views of general, backcountry, camping, seasonal residents, and lake users, focusing on demographics, visitor behaviour, participation, and delivery of services.

Priorités de la recherche forestière au Canada : survol, 1992

Conseil consultatif de la recherche forestière du Canada. Ottawa : le Conseil, 1992. 6, 5 p. *Bilingue (Forest research priorities in Canada...). De* The Forestry Chronicle : *vol. 68, no 6, décembre, 1992. CSI 22143.002.*
ISSN 1188-0791 ISBN 0-662-59361-8
MICROLOG 93-05112 1 fiche

Ce quatrième survol annuel des priorités de la recherche forestière pour l'ensemble du Canada a été colligé par le Conseil consultatif de la recherche forestière du Canada pour le Conseil canadien des ministres des forêts. Il se fonde sur les cinq priorités en matière de recherche forestière indiquées par les organismes provinciaux et territoriaux chargés de la question. Le Conseil consultatif de la recherche forestière du Canada a compilé ce quatrième survol annuel des priorités de la recherche à l'intention du Conseil canadien des ministres des forêts. La compilation fait suite à la proposition avancée en 1987, voulant que chaque province et chaque territoire établissent un organisme consultatif de recherche forestière et qu'un rapport soit publié annuellement sur le classement des sujets de recherche par priorité. Ce document en présente donc un survol.

Priorités, 1992-93

Conseil de perfectionnement des ressources humaines (Canada). Ottawa : le Conseil, 1992. 17, 17 p. *Bilingue (Priorities, 1992-93)*
MICROLOG 93-06319 1 fiche

Le document 'Stratégie axée sur les personnes' présentait le cadre stratégique du Conseil et établissait quatre secteurs-clés d'intervention: milieu de travail réceptif, culture axée sur l'apprentissage continu, habilitation, gestion participative à l'égard du leadership, de l'imputabilité et des récompenses. Outre la mise en oeuvre de la Loi C-26, les priorités pour l'année à venir découlent de ces stratégies. Six domaines demandant action immédiate sont définient. Ce document vise à présenter les secteurs d'intervention pour 1992-93, les résultats attendus et les projets ou initiatives en cours avec la coopération de plusieurs ministères

Priorities, 1992-93

Human Resources Development Council (Canada). Ottawa : The Council, 1992. 17, 17 p. *Bilingual (Priorités, 1992-93).*
MICROLOG 93-06319 1 fiche

The Council presented its strategic approach in a document called 'Strategies for people'. Four strategies are pursued. implementation of a responsive work environment; a continuous learning culture, empowerment; and participatory management. Besides the implementation of Bill C-26, our priorities for this coming year are aligned with these strategies. Six areas requesting immediate attention have been defined. The purpose of this document is to present these areas of intervention for 1992-93, the results expected to be achieved in each area and the projects or initiatives that are on-going with the cooperation of many departments.

Prisoners in Quebec City : the ongoing saga

by G. Piédalue. Ottawa : Environment Canada, Parks Service, 1992. 4 p. : ill. Bibliogr. (Research bulletin ; no. 298) *French ed (Prisonniers à Québec...) on the same fiche.*
ISSN 1184-7182
MICROLOG 93-02156 1 fiche

On August 11, 1986, during restoration work on part of the west front of the fortification wall of the old capital, human graves were discovered in the rampart, more than five metres below the top of the parapet. This document presents information on the excavations in the terreplein in 1990-91. It describes two individuals and discusses their identity. It also discusses the arrangement of the graves.

Prisonniers à Québec : l'histoire continue

par G. Piédalue. Ottawa : Environnement Canada, Service des parcs, 1992. 4 p. : ill. Bibliogr. (Bulletin de recherches ; no 298) *L'éd. anglaise (Prisoners in Quebec...) sur la même fiche.* ISSN 1184-7174
MICROLOG 93-02156 1 fiche

Le 11 août 1986, lors de la restauration d'une partie du front ouest du mur de fortification de la vieille capitale, des sépultures humaines ont été découvertes dans le rempart, à plus de cinq mètres sous le sommet du parapet. Au cours des mois suivants, un total de 50 individus ont été exhumés le long de la courtine Saint-Louis et des faces gauche et droite du bastion des Ursulines. Un certain nombre de dépouilles reposaient le long du mur d'escarpe et des contreforts alors que d'autres gisaient en partie sous l'emplacement du mur de revêtement intérieur. Ce bulletin porte sur les travaux de restauration et examine principalement les interventions dans le terre-plein en 1990-1991 et le schéma d'enfouissement.

Privacy revealed : the Canadian privacy survey

by F. Graves, N. Porteous and P. Beauchamp. Ottawa : Ekos Research Associates Inc., 1993. vii, 64 p. : ill. Bibliogr. *French ed. (La Vie privée exposée...) : 93-06275/1. Study sponsors, Communications Canada...et al.*
ISBN 0-662-20253-8
MICROLOG 93-06274 1 fiche

The purpose of the study was to provide an authoritative benchmark survey of Canadian attitudes, expectations, opinions, values, and experiences. The study issues include a range of questions which reflect the inherent complexity of the topic. This document provides basic coverage of six core issue areas: individual rights and ownership of personal information; control over the use of information and tradeoffs; awareness and experience; technology and privacy; attitudes to government and private sector; and attitudes to regulation/legislation.

Le Prix à payer : un aperçu sur la dette et le développement

Ottawa : Centre de recherches pour le développement international, 1992. 48 p. Bibliogr. (Collection quête d'avenir ; 5) *L'éd. anglaise (The Global cash crunch : an examination...) : 93-01581/1.* ISBN 0-88936-665-9
MICROLOG 93-02054 1 fiche (Available on fiche only)

Ce texte sur la dette et le développement a pour objet d'examiner la nature et l'énormité de la crise de la dette. Bien que certains pays développés, dont le Canada et les États-Unis, aient de gigantesques dettes nationales, on s'interroge ici sur ce qu'on appelle la crise de la dette du tiers-monde. On discute des solutions possibles et on tente de voir si elle commence à se résorber.

Prix d'excellence en habitation de la SCHL, 1990

Société canadienne d'hypothèques et de logement. Ottawa : la Société, 1992. 47 p. : ill. *Bilingue (CMHC housing awards, 1990).*
MICROLOG 93-07809 1 fiche

Le programme des prix d'excellence en habitation de la SCHL a mis en question la capacité des jeunes familles d'obtenir un logement convenable pour son 2e concours et symposium. En publiant ce recueil des participations jugées les plus innovatrices et les plus aisément transférable, la Société entend stimuler l'application de ces idées et en engendrer de nouvelles. Les catégories de prix inclut les suivantes: financement et statut d'occupation, technologie et production, planification et réglementation, création et conception, et processus et gestion.

Proactive environmental monitoring systems for the Alberta Power Limited generating stations

by P. Pedersen. Montreal : Canadian Electrical Association, Engineering and Operating Division, Thermal and Nuclear Power Section, Environmental Requirements Subsection, 1991. 9 p. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06250 1 fiche

Alberta Power Limited is installing environmental monitoring systems at their coal-fired generating stations. These systems are intended to provide accurate and reliable information to the control room operators, and to report and record this information in compliance with Alberta Environment's reporting requirements. The systems surpass Alberta Environment's requirements in that nitrogen oxides and carbon dioxide emissions will be monitored.

Micromedia Ltd., 240 Catherine St., Suite 305, Ottawa ONT K2P 2G8
(613) 237-4250 FAX (613) 237-4251

The installed data acquisition system equipment is intended to integrate with the plant's distributed control systems. The general system requirements, equipment that has or will be added at each plant, and how replacement systems are expected to satisfy these requirements are discussed.

Probabilistic evaluation of a transmission system planned with deterministic criteria

by C.K. Siew and F.P.P. Turner. Montreal : Canadian Electrical Association, Engineering and Operating Division, Power System Reliability Subsection, 1992. 7 p. : ill. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06076 1 fiche

Probabilistic evaluation of power systems planned with deterministic criteria can be used to predict the incremental performance with planned additions. In performing the reliability evaluation, several factors such as choice of the model and use of the appropriate outage data should be considered carefully as they will significantly affect the results of the study. This paper describes the probabilistic analysis of a simple 4 bus network and the incremental reliability afforded by the addition of a transmission line.

PROBABILITY : the P-2 program for the standard and generalized BOX-COX LOGIT models with disagreggate data -- Rev.

by T. Liem and M.J.I. Gaudry. Montreal : Université de Montréal, Centre de recherche sur les transports, 1993. 36 p. Bibliogr. (Publication ; no. 527)
MICROLOG 93-05282 1 fiche

The P-2 program is designed for the maximum likelihood estimation of the Multinomial LOGIT model in which the dependent variables are of discrete type. In transportation, the basic unit of observation is often an individual (disaggregate data), and the behaviour of the latter faced with the choice of travel model between two or more alternatives is by nature a discrete event. This paper describes the statistical model, estimation results, and special options.

Problem or paradox? Human resources for R&D

by J.E. Halliwell. Ottawa : Canadian Intergovernmental Conference Secretariat, 1991. 15 p. *Notes for the keynote address to the Canadian Research Management Association 29th annual meeting. French ed. (Problème ou paradoxe? Les...) on the same fiche*
MICROLOG 93-04135 1 fiche

This document discusses human resources for research and development, whether it is a problem or a paradox. It presents the problem of people dropping out of school or not working in the field they studied for after graduation.

La Problématique des besoins de services de santé au collégial : portrait de la situation : rapport de recherche

par G. Rousseau. Québec : Ministère de l'enseignement supérieur et de la science, 1992. xx, 162 p. Bibliogr. *CSI 66131.209.*
MICROLOG 93-06713 2 fiche

Ce rapport dresse un portrait des besoins de santé des jeunes qui fréquentent les cégeps et des services de santé qui leur sont offerts. Il comporte quatre chapitres traitant des divers aspects des besoins de santé des jeunes et des moyens mis en oeuvre pour le combler. Le premier chapitre décrit le mandat de la recherche, son contexte de réalisation et la méthodologie de la démarche. Le second chapitre traite de la problématique de la recherche. On y aborde dans une première section la question de la représentation démographique de la jeunesse inscrite dans les établissements d'enseignement collégial. La seconde section traite du concept de jeunesse et de la réalité sociale qu'il recouvre. La troisième pour sa part décrit les principaux problèmes de santé chez les jeunes. Au chapitre trois on décrit l'offre des services de santé dans les cégeps. Enfin, le quatrième chapitre traite des éléments de la réforme du système des services de santé et des services sociaux qui concernent particulièrement les services de santé offerts aux jeunes.
